Tolkien's Modern Middle Ages J. Chance, A. in various ways depending on the moment at which he began teaching translating or editing a specific medieval work and simultaneously composing a specific poem fantasy or fairy story What Tolkien read and studied from the time before and during his college days at Exeter and continued researching until he died opens a door into understanding how he uniquely interpreted and repurposed the medieval in constructing fantasy **The Legend of Charlemagne in the Middle Ages**

The Space of Culture - the Place of Nature in Estonia and Beyond Tiina Peil, 2011. This volume sets out to construct a tentative bridge between the physical and perceived academic worlds between the understandings of culture and nature, their spatiality and temporality, by tackling the spatiality of culture phenomena across disciplinary boundaries. The contributions are arranged around a general question of how humans organise the spaces in which they live. The book is divided according to three themes: the humanities and ecosemiotic approach to nature, constructing nature, and examining environmental and landscape change. The first provides an historical review of the humanities and expands on the more theoretical themes. The second section discusses some ways in constructing wild nature with specific examples. The final one illustrates the changes that various cultures have brought about in the environment, examining landscapes and domestication. The space of culture and the place of nature in various cultures are discussed critically throughout the volume in a way that challenges their ontological separations and invites to discuss culture-nature relationships on a more balanced basis.

The Lord of the Rings, 1954-2004 Wayne G. Hammond, Christina Scull, 2006. The fiftieth anniversary of the first publication of *The Lord of the Rings*, the enormously popular and influential masterpiece of fantasy by J. R. R. Tolkien, is celebrated in these twenty papers presented at the Marquette University Tolkien conference of 21-23 October 2004. They are published in honor of the late Dr Richard E. Blackwelder, who gave his important Tolkien collection to the Marquette University Libraries, long a major center for Tolkien research. Half of the papers in this book focus on *The Lord of the Rings*, while others investigate the larger body of Tolkien's achievements as a writer of fiction, a maker of language, and one of the leading philologists of his day. The contributors to *The Lord of the Rings 1954-2004* include a who's who of scholars in Tolkien studies: Douglas A. Anderson, David Bratman, Marjorie Burns, Jane Chance, Michael D. C. Drout, Matthew A. Fisher, Verlyn Flieger, Mike Foster, John Garth, Wayne G. Hammond, Carl F. Hostetter, Sumner G. Hunnewell, John D. Rateliff, Christina Scull, T. A. Shippey, Arden R. Smith, Paul Edmund Thomas, Richard C. West, and Arne Zettersten. As preface, Charles B. Elston, former director of Special Collections and University Archives, provides a reminiscence of Dr Blackwelder and his generosity to Marquette. Fans and students of Tolkien alike will find these essays informative and entertaining.
