The Tragedy of European Civilization Harry Redner, 2017-09-08 The tragedy of European civilization is a protracted historical event spanning the twentieth century and in many ways is ongoing During this time some of the greatest modern thinkers were active producing works that both reflected what was happening in history and contributed towards shaping it This work is a critique of their ideas Harry Redner establishes where and how they went wrong in some cases with apocalyptic consequences for Europe and the world The great intellectuals of the age at once philosophers sociologists political theorists historians and much else besides include Marx Weber Freud Elias Spengler Wittgenstein Heidegger Arendt Nietzsche and Foucault All of them had a historical impact even if only in molding academic

disciplines and shaping of public opinion as was the case with the philosophers Wittgenstein and Arendt This book explores the close links between anti-Semitism and cultural pessimism and the relation between psychology and sociology Other themes range from the history and theory of the state to the misconception of language and power Suitable for students of sociology philosophy political theory history and cultural studies this brilliant exploration of our civilization and its tragedies will also be of interest to intellectual general readers Politics, Ethics and Culture in Our Time Harry Redner, 2023-01-30

Global capitalism is effecting changes in human life as momentous as those that occurred during the Neolithic Revolution the Axial Age 700 300 BC and the modern era post 1500 when industrial capitalism state power and science reshaped the civilized world The transformation is paradoxical however Science and technology ensure material progress but the market promotes cultural obsolescence and erodes belief in the Enlightenment ideals that inspired the quest for progress In Western democracies liberty and equality are proving irreconcilable citizens becoming demoralized fraternity fractured meanwhile despotic Eurasian states are recycling old faiths and concocting neo imperialist ideologies These contradictions must be confronted if the cultural values that sustain civilized life are to be conserved **Weber, Schumpeter and Modern Capitalism** John Love, 2017-07-20 This book provides the groundwork for a general theory of modern capitalism by reinterpreting Max Weber's work on the origins and institutional underpinnings of modern capitalism and Joseph Schumpeter's thought on the mechanisms and functioning of the capitalist economy Focusing on the lesser known works of both figures particularly in the case of Weber whose writings on economics and economic history are frequently overlooked the author contends that a combination of Schumpeter's and Weber's theoretical schemas incorporating their many valuable insights provides the basis of a unified overall theory of modern capitalism that is comprehensive coherent and persuasive With attention to the important theoretical connections between Weber and Schumpeter and the respective contributions of both with regard to the nature and workings of capitalism the author explores the compatibility of the two approaches arguing that the full significance of the contributions of the two writers has not been adequately appreciated A systematic and sympathetic comparison and synthesis of the contributions of two of the central figures in social and economic theory which highlights the enduring relevance of their work in times of political and economic crisis Weber Schumpeter and Modern Capitalism will appeal to scholars across the social sciences with interests in social and economic theory classical sociology and economic history *The Magna Carta of Humanity* Os Guinness, 2021-05-11 What kind of revolution brings true freedom to both society and the human soul Cultural observer Os Guinness contrasts the secular French Revolution with the faith led revolution of ancient Israel Arguing that the story of Exodus is the richest vision for freedom in human history his exploration charts the path to the future for America **Trailblazers in Politics** Anne Perkins, 2014-12-15 Throughout time monarchies empires republics democracies dictatorships and more have risen and fallen But often the leaders at their helm and the political philosophies they espoused have legacies that are far more enduring The fifty individuals and ten

political movements surveyed in this convenient handbook represent some of history's most critical schools of thought. Summarizing the lives of thinkers and leaders as diverse as Thomas Paine, Karl Marx, Genghis Khan, Catherine the Great, Adolf Hitler, Nelson Mandela, and Abraham Lincoln, this volume highlights the strengths and weaknesses of each as well as their lasting influence on political thinking.

A Perilous Path Anne R. Pierce, 2016-07-05 Exposing the moral and strategic deficits of the Obama, Clinton, and Kerry approach to world affairs, *A Perilous Path* takes a close look at American history while at the same time providing fresh thought-provoking analysis. It calls for renewal of the best American foreign policy traditions which emphasize peace through strength and human rights. Anne R. Pierce tells the fascinating story of Obama administration foreign policy and illustrates its disturbing consequences. She shows that President Obama and his Secretaries of State expended more effort in improving relations with dictatorships than in strengthening ties with democracies or encouraging ideas of freedom. With meticulous research, Pierce documents the administration's decisions and discusses its worldview. She reveals vital information regarding Hillary Clinton's tenure as Secretary of State, providing a cautionary account of what we can expect from a Clinton presidency. Whoever becomes president, *A Perilous Path* offers a moral and strategic compass for both policymakers and the public.

The Triumph and Tragedy of the Intellectuals Harry Redner, 2017-07-05 This fourth instalment of Harry Redner's tetralogy on the history of civilization argues that intellectuals have a brilliant past, a dubious present, and possibly no future. He contends that the philosophers of the seventeenth century laid the ground for the intellectuals of the eighteenth century, the Age of Enlightenment. They in turn promoted a fundamental transformation of human consciousness; they literally intellectualized the world. The outcome was the disenchantment of the world in all its cultural dimensions: in art, religion, ethics, politics, and philosophy. In this fascinating study, Redner demonstrates how secularization took the sting out of both the dread and promise of an afterlife, and intellectuals learned to die without the hope of immortality popularized by philosophy and religion. Ultimately, they produced the ideologies that generated the totalitarian regimes of the twentieth century, which subsequently exterminated these intellectuals through mass murder on a scale never before experienced. The book traces the sources of this fatal entanglement and goes on to examine the contemporary condition of intellectuals in America and the world. Wherein lies the future of the intellectuals? Redner suggests that in the present state of globalization, dominated by technocrats, experts, and professionals, their fate remains uncertain.
