White, 2022-05-25 As nurses we hear about mindfulness all the time but what does that actually mean in practice In this book readers are invited into conversation to explore how mindfulness influences palliative care nurses approaches to caring for themselves and others through experiences of living dying Under the guise of stress reduction and self care the assumption often made is that mindfulness can smooth out difficult experiences Instead the objective of this inquiry is not to bypass the practice of caring in those spaces that are really hard but to understand how nurses are working directly within them Calling out from the shadows and our bodies the intensity of palliative care nursing practice arises In this text a dialogue unfolds of nurses caring in deeply meaningful practice environments while searching for ground that is perpetually shifting uncertain and fraught with suffering and strong emotion Integrating literature across nursing sociology and contemplative scholarship evocative stories from palliative care nurses lead in this conversation their words in italics showing how they are guided into action through connection with in their bodies At other times stories show how nurses are taking pause and drawing on various somatic practices to unravel entanglements that touch on their own humanity These stories also offer insight into how systemic forces across educational and organizational institutions are either enhancing or constraining the way nurses engage mindfulness as a relationally embodied ethic of care This insightful volume is not a how to guide rather it is a timely resource exploring approaches for palliative care nurses to care for themselves and others with mindfulness and compassion Those seeking nuanced perspectives particularly in relation to embodying mindfulness through suffering and strong emotion will be drawn to this text Qualitative researchers studying emotionally sensitive topics may also find inspiration in the

Culham,2016-07-01 Spirituality and spiritual experiences have been the bedrock of every civilization and together form one of the highest mechanisms for making sense of the world for billions of people Current research paradigms due to their limitation to empirical sensory psychologically or culturally constructed realities fail to provide a framework for exploring this essential area of human experience The development of a spiritual research paradigm will provide researchers from the social sciences and education the tools and abilities to systematically explore fundamental questions regarding human spiritual experiences and spiritual growth A spiritual research paradigm requires an ontology that considers all reality to be multidimensional interconnected and interdependent It requires an epistemology that integrates knowing from outer sources as well as inner contemplation acknowledging our integration of soul and spirit with the body and mind Three additional aspects are useful to a spiritual research paradigm axiology methodology and teleology An axiology concerns what is valued good and ethical A methodology is the appropriate approach to systematic inquiry A fifth and less frequently mentioned aspect is teleology an explanation of the goal or end

telos to which new knowledge is applied such as gaining wisdom and truth touching the divine increasing inner peace exploring hidden dimensions or improving society This book takes the first step to develop such a research paradigm We draw from world spiritual traditions as well as scholarship that has arisen from contemplative practices We also attempt to build a bridge between science and spirituality Spiritual research is not necessarily opposed to scientific research in fact each can shed light on the other
