Holovnia O., Zakharova T., Lopatiuk R., Melnyk S., Prylutskyi A., Stavskaya U., Tabenska O., 2022-09-22 The development of the world economy indicates the growth of its integration and integrity through the deepening of specialization and cooperation of countries and business entities Integration appears as an inevitable objectively determined process that covers most spheres of economic life in the world and takes place according to its own laws general principles and goals taking into account the various grounds conditions and levels of such integration Today we can observe two mutually exclusive features of integration processes globalization of the world economy and simultaneous national protectionism which has gained considerable influence in the last decade We are observing on the one hand the strengthening of integration processes in the world economy in all spheres of social life there is a reassessment of the system of risks for the modern state and most importantly we are witnessing an increasing pragmatism of relations between countries the basis of which is dominated by economic factors At the same time significant changes are taking place in the field of hospitality and tourism The diversification of hospitality and tourism services the development of the hospitality and tourism industry in new territories and competition in the market require the governments of different countries to reconsider their attitude to the development of this industry and to approach the development of its strategy more seriously In modern conditions the governments of many countries pay more attention to the formation of strategies for the development of regions including strategies for the development of the hospitality and tourism industry Considering the fact that the field of hospitality has changed significantly in recent years and continues to change we have seen modern trends in the field of tourism and the hospitality industry which are definitely relevant The strategy for the development of the hospitality sector should harmoniously complement the socio economic strategy of the country and combine the solution of priority socio economic tasks increasing the scientific technical and innovative potential increasing investment attractiveness and economic stability improving the quality of life of residents It should be noted that the first sector of the world economy affected by the global pandemic of COVID 19 is tourism In the current conditions of the global pandemic it is obvious that tourism is losing employees and customers due to the impossibility of flights to different countries and the risk of contracting the disease from COVID 19 Nevertheless even in this situation you can find a way out to reorient from outbound tourism to domestic tourism and discover your country from a completely different side At the same time the economic consequences of the war in Ukraine are felt all over the world Russian aggression has put pressure on global commodity prices exacerbated disruptions in supply chains and fueled inflation in most countries around the world The world economy will lose a trillion dollars this year alone due to Russia's invasion of Ukraine The presence of unsolved problems and the contradictions of certain issues the theoretical and practical
