area of interest for tourists is a major challenge both for planners and for tourism managers. It involves complex consideration to both the preservation of the physical site and community mining heritages as well as the health safety and environmental factors inherent in opening these vast sites to the public. Mining Heritage and Tourism includes contributions from internationally recognized authorities and is the first book to focus on the issues, challenges and potentials in redeveloping mines as cultural heritage attractions which are explored thematically throughout the book. It draws on multidisciplinary research to consider the dichotomy between heritage preservation and tourist development goals for mining heritage sites as well as to explore the practical challenges of developing these sites. These themes are illustrated by case studies from a vast range of geographical locations around the globe to offer operational insights into the planning and management of these sites for both heritage and tourism purposes as well as innovative site management techniques.
