continues to develop the importance of people's health is becoming increasingly prominent. It is imperative to speed up the construction of a multilevel medical security system with the goal of effectively addressing people's concerns about illness and continuously improving the quality of health. In addition, as an important production factor in the information age, health care big data has profoundly changed the health service model, comprehensively enhancing the ability to handle public health emergencies, improving the quality and effectiveness of health care services, and promoting the sharing of medical resources for the benefit of all, which has strongly contributed to the leapfrog development of health care. Moreover, the construction of high-quality health insurance data is of great significance to better benefit the people and the public. Therefore, it has become a research goal to actively explore the use of health insurance data to empower and build institutional mechanisms to help the pharmaceutical industry to innovate and develop.
