The Psychological Development of Girls and Women Sheila Greene, 2014-02-25 In this book Sheila Greene presents a challenging new perspective on the psychological development of girls and women which emphasises the central role of time in human development She critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those claiming to be focused on development have presented a view of women s lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Greene s approach places primary importance on temporality itself and on the competing discourses on time age and development which play an active role in the construction of the lives of girls and women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasises temporality emergence and human agency The result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history The Psychological Development of Girls and Women will be essential reading for students and researchers in the psychology of women developmental psychology and women s studies

Human Development and Faith (Second Edition) Felicity B. Kelcourse, 2015-07-28 This book now in its second edition brings together the best available understandings of human development from a multidisciplinary perspective Uniquely inclusive of the moral and faith dimensions of context and life cycle development Human Development and Faith examines the interplay of mind body family community and soul at every stage of development It addresses two central questions What are the good enough conditions of parenting family and community in each phase of life from birth to death which support growth and development What gives life adequate meaning as development proceeds If human development describes the normative and hoped for passages of life then faith provides the necessary component of meaning Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live The Journal of Pastoral Theology called the first edition of Human Development and Faith an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development This second edition includes a new chapter on infancy updates reflecting our growing awareness of cultural diversity and a new preface

Violence Research Wilhelm Heitmeyer, John Hagan, 2005-08-12 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedhelm Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage

Developments Erica Burman, 2008-02-19 How does developmental psychology connect with the developing world What do cultural representations tell us about the contemporary politics of childhood What is the political economy of childhood This companion volume to Burman's *Deconstructing Developmental Psychology* helps us to explain why questions around children and childhood their safety their sexuality their interests and abilities their violence have so preoccupied the late twentieth and twenty first centuries In this increasingly post industrial post colonial and multicultural world this book identifies analytical and practical strategies for improving how we think about and work with children Drawing in particular on feminist and postdevelopment literatures the book illustrates how and why reconceptualising our notions of individual and human development including those informing models of children's rights and interests will foster more just and equitable forms of professional practice with children and their families The book brings together completely new previously unpublished material alongside revised and updated papers to present a cutting edge and integrated perspective to the field Burman offers a key contribution to a set of urgent debates engaging theory and method policy and practice across all the disciplines that work with or lay claim to children's interests *Developments* presents a coherent and persuasive set of arguments about childhood culture and professional practice so that the sustained focus across a range of disciplinary arenas psychology education cultural studies child rights gender studies development policy and practice social policy strengthens the overall argument of each chapter It will be invaluable to teachers and students in psychology childhood studies and education as well as researchers in gender studies It will also be a must read for professionals working with children and adolescents
