Toward A New Regionalism Environmental Architecture In The Pacific Northwest:

Toward a New Regionalism David E. Miller, 2005 Green design is the major architectural movement of our time Throughout the world architects are producing sustainable buildings in an attempt to preserve the environment and our globe's natural resources However current strategies for forming sustainable solutions are typically too general and fail to take advantage of critical geographical environmental and cultural factors particular to a specific place By focusing on the Pacific Northwest this book provides essential lessons to architects and students on how sustainable architecture can and should be shaped by the unique conditions of a region Pacific Northwest regionalism has consistently supported an architecture aimed at environmental needs and priorities This book illuminates the history of a green trail in the work of key architects of the Northwest It discusses environmental strategies that work in the region organized according to nature's most basic elements earth air water and fire and their underlying principles and forces The book focuses on technologies materials and methods with a final section that examines thirteen exceptional Northwest buildings in detail and in light of their contributions to sustainable architecture Critical case studies by Northwest architects illustrate some of the best environmental design work in North America Notable architects from Seattle Portland and British Columbia are included These projects feature innovative design in water and site stewardship intelligent technologies passive energy strategies ecologically sound building materials and environmentally sensitive energy management systems

Modern Architecture of Quito Christian Parreno, 2024-08-22 Situated at the crossroads of the foreign and the vernacular Quito the capital of Ecuador with its world famous yet understudied built environment stands as a testament to architectural in betweenness This book interweaves history and theory to explore how near and far influences have shaped its unique character Case studies present diverse and unexpected episodes in the architectural history of this city spanning the intricacies of its topography the design of modernist houses and the appropriation of the motel typology Together they show how fluxes of different origins have created an architecture marked by diversity and interrelation To theoretically frame these investigations this anthology readdresses the notions of the global and the local examining their tension and unavoidable coexistence while introducing the in between as a phenomenon with many variations and embodiments increasingly referenced in architectural thinking This book not only furthers the evolution of these concepts but also demonstrates their value as tools for analyzing the architectures of Latin America and the Global South more broadly With contributions from both international experts and a new generation of Ecuadorian scholars Modern Architecture of Quito is an indispensable resource for students and researchers investigating the development of architectural modernism in Latin America

Precedented Environmental Futures Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation

Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment *Narratives of Architectural Education* James Thompson, 2019-01-14

Narratives of Architectural Education provides an overview of life as an architecture student detailing how a layperson may develop an architectural identity This book proposes becoming an architect as a personal narrative of professional development structured around various stages and challenges associated with identity transformation Using a case study of aspiring architects along multiple time points of their professional education Thompson investigates the occupational identity of architects how individuals construct a sense of themselves as future architects and position themselves within the architectural community This book provides previously unexamined insights into not just the academic development of an architect but also the holistic and experiential aspects of architectural education It would be ideal for those in the educational field of architecture to include students educators interns and mentors *USA* Gwendolyn Wright, 2008-02-15

From the Reliance Building and Coney Island to the Kimbell Museum and Disney Hall the United States has been at the forefront of modern architecture American life has generated many of the quintessential images of modern life both generic types and particular buildings Gwendolyn Wright's *USA* is an engaging account of this evolution from the late nineteenth century to the twenty first Upending conventional arguments about the origin of American modern architecture Wright shows that it was not a mere offshoot of European modernism brought across the Atlantic Ocean by migrants but rather an exciting distinctive and mutable hybrid *USA* traces a history that spans from early skyscrapers and suburbs in the aftermath of the American Civil War up to the museums schools and green architecture of today Wright takes account of diverse interests that affected design ranging from politicians and developers to ambitious immigrants and middle class citizens Famous and lesser known buildings across America come together model dwellings for German workers in rural Massachusetts New York's Rockefeller Center Cincinnati's Carew Tower Frank Lloyd Wright's Taliesin West in the Arizona desert the University of Miami campus the Texas Instruments Semiconductor Plant and the Corning Museum of Glass among others to show an extraordinary range of innovation Ultimately Wright reframes the history of American architecture as one of constantly evolving and volatile sensibilities engaged with commerce attuned to new media exploring multiple concepts of freedom The chapters are organized to show how changes in work life home life and public life affected architecture and vice versa This book provides essential background for contemporary debates about affordable and luxury housing avant garde experiments local identities inspiring infrastructure and sustainable design A clear concise and richly illustrated account of modern American architecture this timely book will be essential for all those who wonder about the remarkable legacy of American modernity in its most potent cultural expression **Architectural Record** ,2006 Abstracts of Public Administration, Development, and Environment ,2005 *The Journal of Environment & Development* ,2006 *Washington*
