Toward a Sociobiological Hermeneutic M. Wainwright, 2012-05-15 This book draws on post Darwinian advances in scientific disciplines to reanalyze canonical works of literature This wide ranging analysis includes studies of the works of Oscar Wilde Sophocles Shakespeare Giovanni Boccaccio Theodore Dreiser John Roderigo Dos Passos and William Faulkner

The Oxford Handbook of Oscar Wilde , 2025-09-09 The Oxford Handbook of Oscar Wilde puts Wilde the Icon into an expansive literary and dramatic context It offers a readable guide to Wilde studies for the early twenty first century Its chapters reflect Wilde s status as a queer writer while filling in the gaps that this focus have left and looking forward to the next generation of critical studies on Wilde It is designed to appeal to students and those with a general interest in Wilde as well as professional academics Its comprehensive discussions of his writings show how these interact with and transfigure both their age and his life while providing readers with clear and extensive suggestions on approaches to reading thinking and writing about them It is organized in four sections Places Works Intellectual Contexts and Reception The first section on Places tells the story of Wilde s life and intellectual evolution through the places that defined its contours Dublin Oxford London America France and Italy The second section on Wilde s Works provides new and in depth directions to close reading Wilde s writing with generative ideas on the development style structure and significance of each of his major works The section on Intellectual Contexts brings together chapters on the main ideas and cultures of thought that shaped Wilde s thinking from late nineteenth century sexuality and fashion to the ancient world and Charles Darwin s theory of evolution The final section on Reception focuses on the central categories in which Wilde s works and life have been read and influenced cultural movements since his death Wilde s afterlife has been vibrant and chapters in this section include discussions of how he influenced camp and pop alongside the contentious textual history of his works *Game Theory and Postwar American Literature* Michael Wainwright, 2017-02-14 If game theory the mathematical simulation of rational decision making first axiomatically established by the Hungarian born American mathematician John von Neumann is to prove worthy of literary hermeneutics then critics must be able to apply its models to texts written without a working knowledge of von Neumann s discipline in mind Reading such iconic novels as Fahrenheit 451 In Cold Blood and Kiss Tomorrow Goodbye from the perspective of the four most frequently encountered coordination problems the Stag Hunt the Prisoner s Dilemma Chicken and Deadlock Game Theory and Postwar American Literature illustrates the significant contribution of mathematical models to literary interpretation The interdisciplinary approach of this book contributes to an understanding of the historical political and social contexts that surround the texts produced in the post Cold War years as well as providing a comprehensive model

of joining game theory and literary criticism *The Rational Shakespeare* Michael Wainwright, 2018-08-22 The Rational Shakespeare Peter Ramus Edward de Vere and the Question of Authorship examines William Shakespeare's rationality from a Ramist perspective linking that examination to the leading intellectuals of late humanism and extending those links to the life of Edward de Vere Seventeenth Earl of Oxford The application to Shakespeare's plays and sonnets of a game theoretic hermeneutic an interpretive approach that Ramism suggests but ultimately evades strengthens these connections in further supporting the Oxfordian answer to the question of Shakespearean authorship **Game Theory and Minorities in American Literature** Michael Wainwright, 2017-03-07 This interdisciplinary monograph applies the theory of games of strategy or game theory to an important subset of American literature minoritarian texts Fittingly John von Neumann's game theory as a mathematical subdiscipline practically abandoned by its founder after the publication of *Zur Theorie der Gesellschaftsspiele* 1928 but purposefully reengaged with on his permanent relocation to America in 1938 carries the minoritarian credentials of a Hungarian born national of Jewish descent The state of international politics in the late 1930s certainly contributed to von Neumann's renewed interest in his theory but a socioeconomic environment built on the legacy of slavery focused a reengagement with coordination problems that would last until his death In these strategic situations people must make choices in the knowledge that other people face the same options and that the outcome for each person will result from everybody's decisions The four most frequently encountered coordination problems are the Stag Hunt the Prisoner's Dilemma Chicken and Deadlock Minoritarians find majoritarian attempts to control these social dilemmas particularly challenging Hence a game theoretically inflected hermeneutic that identifies the logical rational and strategic state of human interrelations not only helps to categorize but also to analyze minoritarian texts The authors under detailed consideration are Benjamin Franklin Frederick Douglass Harriet A Jacobs Zora Neale Hurston William Faulkner Toni Morrison and Mohsin Hamid *Darwin and Faulkner's Novels* M. Wainwright, 2013-10-17 Displaying a wide range of knowledge and interpretive skill *Darwin and Faulkner's Novels* reexamines the fiction of the great twentieth century American author from the interdisciplinary perspective of sociobiology Challenging the assumption that Faulkner's South was nothing other than a reactionary wilderness and charting the manner in which Faulkner learned and applied his evolutionary concepts this book unsettles staid interpretations of the Faulknerian canon and overturns habitual judgments as to the value of his later novels *Meat Planet* Benjamin Aldes Wurgaft, 2020-10-13 In 2013 a Dutch scientist unveiled the world's first laboratory created hamburger Since then the idea of producing meat not from live animals but from carefully cultured tissues has spread like wildfire through the media Meanwhile cultured meat researchers race against population growth and climate change in an effort to make sustainable protein *Meat Planet* explores the quest to generate meat in the lab a substance sometimes called cultured meat and asks what it means to imagine that this is the future of food Neither an advocate nor a critic of cultured meat Benjamin Aldes Wurgaft spent five years researching the phenomenon In *Meat Planet*

he reveals how debates about lab grown meat reach beyond debates about food examining the links between appetite growth and capitalism Could satiating the growing appetite for meat actually lead to our undoing Are we simply using one technology to undo the damage caused by another Like all problems in our food system the meat problem is not merely a problem of production It is intrinsically social and political and it demands that we examine questions of justice and desirable modes of living in a shared and finite world Benjamin Wurgaft tells a story that could utterly transform the way we think of animals the way we relate to farmland the way we use water and the way we think about population and our fragile ecosystem s capacity to sustain life He argues that even if cultured meat does not succeed it functions much like science fiction as a crucial mirror that we can hold up to our contemporary fleshy dysfunctions *Pragmatism and the Reflective Life* Stuart Rosenbaum,2009-07-16 Pragmatism and the Reflective Life explains the moral perspective embedded in the American pragmatist tradition and offers pragmatist moral thought as an alternative to analytic moral theory Following the lead of John Dewey Rosenbaum explores what it means to make the ideal of the reflective life implicit in pragmatism central to an understanding of morality The discussion illuminates how this ideal of the reflective life captures the value of both individual autonomy and communal ideals and encourages commitment to a radically idealistic and ecumenical hope in the power of inclusive democracy and global egalitarianism *The Journal of American History* Organization of American historians,1997 **Sociological Abstracts** Leo P. Chall,1988 *Forthcoming Books* Rose Arny,1999-08 **The Human Factor** Philip Hefner,1993 This amazing book takes into account all of the leading premises of the modern concept of biocultural evolution and builds a bridge to religious theory Its value lies in its ability to pose the major questions and sketch proposals for dealing with them To my knowledge it is the first work to make such an attempt Solomon H Katz University of Pennsylvania Hefner s book is a major breakthrough in doing constructive theology His view of human beings as created co creators is filled with balanced insight regarding how humans are united with the rest of creation while having a special place because of their brains and culture Karl E Peters Coeditor *Zygon Journal of Religion and Science* Subject Guide to Books in Print ,1993 **Index to Book Reviews in Religion** ,1990 Arts & Humanities Citation Index ,1984 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals **The Philosopher's Index** ,1988 **Directory of American Scholars** Jaques Cattell Press,1982 Interdisciplinary Essays on Darwinism in Hispanic Literature and Film Jerry Hoeg,Kevin S. Larsen,2009 Darwin and his work have influenced the entire world so this book by experts on the Darwinian influence in the Hispanic world as reflected in the cultural artifacts of literature folklore myth and film is especially appropriate and important It is a contribution to the fields of science and literature and Hispanic area and cultural studies The Darwinian Heritage and Sociobiology Johan M. van der Dennen,David Smillie,Daniel R. Wilson,1999-12-30 The editors present a collection of essays dealing with both the

life and ideas of Charles Darwin as they relate to human sociobiology. They represent themes coming from evolutionary theory, cultural anthropology, political science, sociology, and psychology and psychiatry. Consistent with E. O. Wilson's Consilience, the compilation also reflects an interest in the humanities and thus offers materials exploring the possibility of a broad synthesis of knowledge relating to human nature.
