PreK 12 to higher education focusing on the various constituent groups namely students teachers and communities in education and the effects of educational technology on learning and empowerment Provided by publisher **Social Information Technology: Connecting Society and Cultural Issues** Kidd, Terry T.,Chen, Irene,2008-04-30 This book provides a source for definitions antecedents and consequences of social informatics and the cultural aspect of technology It addresses cultural societal issues in social informatics technology and society the Digital Divide government and technology law information security and privacy cyber ethics technology ethics and the future of social informatics and technology Provided by publisher **STEM in the Technopolis: The Power of STEM Education in Regional Technology Policy** Cliff Zintgraff,Sang C. Suh,Bruce Kellison,Paul E. Resta,2020-05-27 This book addresses how forward thinking local communities are integrating pre college STEM education STEM pedagogy industry clusters college programs and local state and national policies to improve educational experiences drive local development gain competitive advantage for the communities and lead students to rewarding careers This book consists of three sections foundational principles city regional case studies from across the globe and state and national context The authors explore the hypothesis that when pre college STEM education is integrated with city and regional development regions can drive a virtuous cycle of education economic development and quality of life Why should pre college STEM education be included in regional technology policy When local leaders talk about regional policy they usually talk about how government universities and industry should work together This relationship is important but what about the hundreds of millions of pre college students taught by tens of millions of teachers supported by hundreds of thousands of volunteers who deliver STEM education around the world Leaders in the communities featured in STEM in the Technopolis have recognized the need to prepare students at an early age and the power of real world connections in the process The authors advocate for this approach to be expanded They describe how STEM pedagogy priority industry clusters cross sector collaboration and the local incarnations of global development challenges can be made to work together for the good of all citizens in local communities This book will be of interest to government policymakers school administrators industry executives and non profit executives The book will be useful as a reference to teachers professors industry professional volunteers non profit staff and program leaders who are developing running or teaching in STEM programs or working to improve quality of life in their communities **Higher Education 4.0** Kevin Anthony Jones,Sharma Ravishankar,2021-04-15 This book chronicles a 10 year introduction of blended learning into the delivery at a leading technological university with a longstanding tradition of technology enabled teaching and learning and state of the art infrastructure Hence both teachers and students were familiar with the idea of online courses Despite this the longitudinal experiment did not proceed as expected Though few technical problems it required behavioural changes from teachers and learners thus unearthing a host of socio technical issues challenges and conundrums With the undercurrent of design ideals such as tech for good any industrial sector must examine whether digital platforms are credible

substitutes or at best complementary In this era of Industry 4.0 higher education like any other industry should not be about the creative destruction of what we value in universities but their digital transformation The book concludes with an agenda for large repeatable Randomised Controlled Trials (RCTs) to validate digital platforms that could fulfil the aspirations of the key stakeholder groups: students, faculty and regulators as well as delving into the role of Massive Open Online Courses (MOOCs) as surrogates for fees-free higher education and whether the design of such a HiEd 4.0 platform is even a credible proposition Specifically the book examines the data-driven evidence within a design-based research methodology to present outcomes of two alternative instructional designs: evaluated traditional lecturing and blended learning Based on the research findings and statistical analysis it concludes that the inexorable shift to online delivery of education must be guided by informed educational management and innovation

The Digital Divide Jan van Dijk, 2020-01-14 Contrary to optimistic visions of a free internet for all the problem of the digital divide—the disparity between those with access to internet technology and those without—has persisted for close to twenty-five years In this textbook Jan van Dijk considers the state of digital inequality and what we can do to tackle it Through an accessible framework based on empirical research he explores the motivations and challenges of seeking access and the development of requisite digital skills He addresses key questions such as: Does digital inequality reduce or reinforce existing traditional inequalities? Does it create new previously unknown social inequalities? While digital inequality affects all aspects of society and the problem is here to stay Van Dijk outlines policies we can put in place to mitigate it *The Digital Divide* is required reading for students and scholars of media communication, sociology and related disciplines as well as for policymakers
