Lung Fourth Edition examines the subject from a target organ perspective Completely revised and updated the book includes contributions from an entirely new set of authors each of them a leading international authority in their respective specialties As with the previous editions it presents the latest advances in our knowledge of how the lung responds to airborne contaminants It discusses the assessment of nanomaterials pulmonary administration of new therapeutics health effects of inhaled particulate matter from diesel exhaust and respiratory genomics The new edition provides insight into current thinking about the critical need for understanding the kinetics and dynamic interactions associated with toxic effects It explores the appropriateness of recent advances made across disciplines and addresses human clinical testing and emerging technology for using animal and in vitro models to detect adverse effects The book examines how airborne substances can alter the physiological biochemical and morphological functioning of biological systems and covers the latest modeling approaches for predicting deposition and fate of inhaled particles Illustrating on going research efforts for delineating the association between airborne substances and systemic effects the book provides authoritative reviews of selected areas The editor makes the information accessible to readers who do not have a background in pulmonary physiology without sacrificing the scientific rigor required by those who do These features make this the ultimate resource on how pollutants affect allergies infection and other lung diseases

Toxicology of the Skin Nancy A. Monteiro-Riviere, 2010-02-17 This key volume of the Target Organ Toxicology Series provides a fresh and modern approach to the subject of skin toxicology from the perspective of how the skin forms a barrier that protects the body from the external environment and how chemicals and drugs interact with the barrier properties of the skin Any defects or perturbations to this barrier may result in damage to the skin or may alter absorption With contributions from over 40 international experts in the field of skin biology the book presents the central role of the skin barrier to health and disease reviewing The skin s anatomy and physiology with focus on the stratum corneum as a barrier to foreign substances Dermal absorption cutaneous metabolism and epidermal transporters Altered barriers racial skin types aged skin photoaged skin cosmetics and skin sensitization Modern approaches to drug delivery across the skin barrier including liposomes microneedle technology active and passive transdermal delivery Examples and case studies of chemical toxicity after topical exposures ranging from arsenic metal working fluids bromine jet fuel sulfur mustard and including the emerging area of nanomaterial penetration Toxicology of the Skin is essential reading for drug delivery pharmacologist formulation scientists dermatologists toxicologists molecular biologists engineers surgeons students and anyone interested in skin irritation and skin absorption

[Information Resources in Toxicology, Volume 1: Background, Resources, and Tools](#) , 2020-05-16 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study research and practice of toxicology Both volumes represents a unique wide ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment The editors and authors are among the leaders of

the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject, such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations, constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena, offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, omics, risk assessment, societal implications, such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format, such as government reports, general interest publications, blogs, and audiovisuals. Explores recent internet trends, web-based databases, and software tools in a section on the online environment. Concludes with a miscellany of special topics, such as laws and regulations, chemical hazard, communication, resources, careers, and professional education. K-12 resources, funding, poison control centers, and patents. Paired with Volume Two, which focuses on global resources, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences, with over 120 chapters, contributions by experts and leaders in the field.

Toxicology of the Nose and Upper Airways John B. Morris, Dennis J. Shusterman, 2016-04-19. The application of molecular biologic methods, recognition of neurogenic inflammatory processes, and utilization of genetic knockout animals are just some of the advances in toxicology of the upper airways in recent years. *Toxicology of the Nose and Upper Airways* presents a culmination of knowledge gained as a result of both human and experimental.

Cardiovascular Toxicology Daniel Acosta, 2008-09-04. Focused extensively on the toxic effect of chemicals on the cardiovascular system. *Cardiovascular Toxicology* Fourth Edition is comprised of several key sections beyond cardio and vascular toxicity, such as principles of myocardial cell injury and key methods of assessing cardiovascular function. New developments include expanded chapter on passive
