

4.1 Tissue samples are fixed, sliced, and stained for microscopy**Learning Outcome**

- List the steps involved in preparing animal tissue for microscopic viewing.
- A. Tissue specimens must be fixed and sectioned thinly enough to allow light transmission.
- B. Tissue sections must be stained with dyes that bind to different parts of the cell in slightly different ways so that anatomical structures are distinguished from one another.

4.2 Epithelial tissue covers body surfaces, lines cavities, and forms glands**Learning Outcomes**

- List several structural and functional characteristics of epithelial tissue.
- Name, classify, and describe the various types of epithelia, and indicate their chief function(s) and location(s).
- Define gland.
- Differentiate between exocrine and endocrine glands, and between multicellular and unicellular glands.
- Describe how multicellular exocrine glands are classified structurally and functionally.
- A. Epithelium occurs in the body as covering or lining epithelium, or as glandular epithelium.
- B. Epithelial tissues perform several functions in the body: protection, absorption, filtration, excretion, secretion, and sensory reception.
- C. Special Characteristics of Epithelium
 1. Polarity: Tissue has an apical surface not attached to surrounding tissues facing either the external environment or the cavity of an internal organ, and a basal surface attached to the underlying connective tissue.
 2. Specialized contacts: Adjacent epithelial cells are bound together by specialized contacts such as desmosomes and tight junctions.
 3. Supported by connective tissue: A basement membrane, consisting of a basal lamina, and a reticular lamina derived from the collagen of underlying connective tissue.
 4. Epithelial tissues are innervated, but avascular receiving nutrients by diffusion from underlying connective tissues.
 5. Epithelial tissue has a high regeneration capacity.
- D. Classification of Epithelia
 1. Each epithelial tissue has a two-part name: the first part indicates the number of layers present, and the second part describes the shape of the cells.
 - a. Simple epithelia consist of a single layer of cells, while stratified epithelia consist of several layers.
 - b. Cell shapes may be squamous (flat), cuboidal (box-like), or columnar (column shaped).
 2. A simple epithelium consists of a single layer of cells that functions in absorption, secretion, and filtration.
 - a. Simple Squamous epithelium has laterally flattened cells with little cytoplasm, located where filtration or exchange of substances occurs.

Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Tissue The Living Fabric Study Guide books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Tissue The Living Fabric Study Guide books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Tissue The Living Fabric
