silents to talkies Avatar pushes 3 D live action and photo realistic CGI to a new level It rips through the emotional barrier of the screen to transport the audience to a fabulous new virtual world With cooperation from the often reclusive Cameron author Rebecca Keegan has crafted a singularly revealing portrait of the director s life and work We meet the young truck driver who sees Star Wars and sets out to learn how to make even better movies himself starting by taking apart the first 35mm camera he rented to see how it works We observe the neophyte director deciding over lunch with Arnold Schwarzenegger that the ex body builder turned actor is wrong in every way for the Terminator role as written but perfect regardless After the success of The Terminator Cameron refines his special effects wizardry with a big time Hollywood budget in the creation of the relentlessly exciting Aliens He builds an immense underwater set for The Abyss in the massive containment vessel of an abandoned nuclear power plant where he pushes his scuba breathing cast to and sometimes past their physical and emotional breaking points including a white rat that Cameron saved from drowning by performing CPR And on the set of Titanic the director struggles to stay in charge when someone maliciously spikes craft services mussel chowder with a massive dose of PCP rendering most of the cast and crew temporarily psychotic Now after his movies have earned over 5 billion at the box office James Cameron is astounding the world with the most expensive innovative and ambitious movie of his career For decades the moviemaker has been ready to tell the Avatar story but was forced to hold off his ambitions until technology caught up with his vision Going beyond the technical ingenuity and narrative power that Cameron has long demonstrated Avatar shatters old cinematic paradigms and ushers in a new era of storytelling The Futurist is the story of the man who finally brought movies into the twenty first century **Shipwrecks** Nick Hunter,2014-11-01 Shipwrecks examines the hunt for shipwrecks and the valuable treasures they hold whether that be gold and jewels or important artifacts that offer us a window on to the past Part of the Treasure Hunters series Shipwrecks offers a crosscurricular mix of science technology and history with a fun dramatic approach Shipwrecks covered in the book include the Tudor Warship the Mary Rose the Spanish Galleon La Nuestra Senora de Atocha American Civil War ship SS Republic and the Titanic the most famous shipwreck of all The book also looks at the motives for these searches and the importance of responsible archaeology were the treasure hunters driven by personal greed or glory or did they embark on their quest with a historical interest and a desire to preserve the lost treasures **The Visual Imperative** Lindy Ryan,2016-03-14 Data is powerful It separates leaders from laggards and it drives business disruption transformation and reinvention Today s most progressive companies are using the power of data to propel their industries into new areas of innovation specialization and optimization The horsepower of new tools and technologies have provided more opportunities than ever to harness integrate and interact with massive amounts of disparate data for business insights and value something that will only continue in the era of the Internet of Things And as a new breed of tech savvy and digitally native knowledge workers rise to the ranks of data scientist and visual analyst the needs and demands of the people working with data are changing too The world of data

is changing fast And it s becoming more visual Visual insights are becoming increasingly dominant in information management and with the reinvigorated role of data visualization this imperative is a driving force to creating a visual culture of data discovery The traditional standards of data visualizations are making way for richer more robust and more advanced visualizations and new ways of seeing and interacting with data However while data visualization is a critical tool to exploring and understanding bigger and more diverse and dynamic data by understanding and embracing our human hardwiring for visual communication and storytelling and properly incorporating key design principles and evolving best practices we take the next step forward to transform data visualizations from tools into unique visual information assets Discusses several years of in depth industry research and presents vendor tools approaches and methodologies in discovery visualization and visual analytics Provides practicable and use case based experience from advisory work with Fortune 100 and 500 companies across multiple verticals Presents the next generation of visual discovery data storytelling and the Five Steps to Data Storytelling with Visualization Explains the Convergence of Visual Analytics and Visual discovery including how to use tools such as R in statistical and analytic modeling Covers emerging technologies such as streaming visualization in the IOT Internet of Things and streaming animation
