Economic Development: Tenth Edition Michael P. Todaro, Stephen C. Smith, *Economics for a Developing World* Michael P. Todaro, 1977 An introductory text oriented towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations *Development Economics*

Gérard Roland, 2016-05-23 Gerard Roland's new text *Development Economics* is the first undergraduate text to recognize the role of institutions in understanding development and growth Through a series of chapters devoted to specific sets of institutions Roland examines the effects of institutions on growth property rights market development and the delivery of public goods and services and focuses With the most comprehensive and up to date treatment of institutions on development Roland explores the important questions of why some countries develop faster than others and why some fail while others are successful

International Handbook of Development Economics Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good

reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address. The extensive bibliography at the end of each essay adds further value to this collection. Ashwini Deshpande, *Economic and Political Weekly*. These new volumes impress along two dimensions. First, they highlight important connections between economic development and variables such as culture, warfare, and ethnicity, which are sometimes ignored by mainstream economists. Second, they analyze the economic development experience of different regions such as Africa, Latin America, and East Asia, a valuable reference for scholars and practitioners in the field. Highly recommended. H. A. Faruq, *Choice*. This two-volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field. Authors are drawn from around the world and write on a wide range of topics. After providing an introduction to the subject by examining issues like the meaning and measurement of development, historical and interdisciplinary approaches, empirical regularities, and data problems, the contributors provide a wealth of perspectives on and analyses of development economics. They discuss alternative approaches to development, the macroeconomics of growth, factors and sources of economic development such as capital, labor, entrepreneurship, resources, and technology, major sectors of concern such as agriculture, industry, services, and the informal sector, and international issues such as trade, capital and labor flows, and technology transfers. Income distribution and poverty, the state, and other institutions and actual development experiences are explored. The contributors provide analytical contributions as well as the relation between these contributions and real-world and policy issues from a variety of alternative perspectives. Scholars, students, policymakers, and other development practitioners will all find this comprehensive reference invaluable. An Integral Approach to Development Economics, Basheer A. Oshodi, 2016-04-15. Developing economies such as those in sub-Saharan Africa are searching for realistic economic policy prescriptions. Despite economic growth in countries like Nigeria, poverty and unemployment blight the lives of many in the midst of plenty. Simultaneously, much neo-classical economic thought is being questioned against the backdrop of global economic meltdown, giving rise to inquiry about more integral approaches to sustainable development. In An Integral Approach to Development Economics, Basheer Oshodi examines modernization theories, dependency theories, world system theories, and emerging 21st-century economic theories and links a neo-modern mix of economic thought with the practicalities of finance in parts of the world where poverty is rife. In a specifically African setting, over half of the population are Muslims. Oshodi considers Islamic finance in the context of the triple heritage of indigenous culture, Westernized Christianity, and Islam. He argues that the principles of Islamic banking and finance can be integrated with other elements of that heritage, focusing on meeting the challenges of poverty and unemployment. Islamic finance is not just a religiously oriented, Sharia-compliant alternative financial model. It can contribute to overall socio-economic transformation and a wider, people-centred approach to economic development. International organizations, financial institutions, reserve banks, policy makers, donor agencies, and students will find resonance in this

valuable addition to Gower's Transformation and Innovation Series

The Palgrave Handbook of Development

Economics Machiko Nissanke, José Antonio Ocampo, 2019-08-12 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions. Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology, knowledge and information, its current practice in many parts of the world has led to processes that are socially, economically and politically and ecologically unsustainable. It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development. Applying a critical and pluralistic approach, the chapters in this Handbook examine economics of development paths under globalisation, focusing on sustainable development in social, environmental, institutional and political economy dimensions. It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives. It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives, with a view to laying a foundation for sustainable development.

DEVELOPMENT ECONOMICS MUKHERJEE, APARAJITA, CHAKRABARTI, SAUMYA, 2016-05-16 Development economics is a branch of study that focuses on improving the economies of developing countries, examining both macroeconomic and microeconomic factors relating to the structure of a developing economy. The main objective of the book is to present major issues of development economics. It takes up an analysis of the limitations of accumulation-centric growth process and introduces the readers to alternative development paradigms along with their critics. Organised into fourteen chapters, the initial chapters discuss historical background of less developed economies, post-colonial development patterns in the context of establishment of the World Bank, the IMF and the GATT economic models like classical development ideas, Marxian model, the Marginalist economies, Alfred Marshall and the neoclassical school and ideas of Keynes. The book skillfully explains some of the development macro models based on industry, agriculture, interactions, structure of agriculture, population and role of market and state in economic development. The later chapters delve on capability approaches to development and thematic deficiency of traditional development economics and relation between inequality, poverty and development. In this context, the book takes up the analysis of the concept of Development Management and its application to less developed economies.
