Strategic Customer Management Nigel F Piercy, Nikala Lane, 2009-03-12

A revolution is taking place in the way companies organize and manage the front end of their organization where it meets its customers. Traditional concepts of sales management, account management and customer service are being overtaken by initiatives like customer business development, the strategic sales organization and strategic customer management. This book aims to provide insights into how this revolution is unfolding and to provide a framework for executives and management students to address the issues involved. The book focuses on the transformation of the traditional sales organization into a strategic force leading the strategic customer management process in companies. Traditionally the area of sales management has mainly been treated as a tactical, operational topic in the conventional marketing literature, simply part of the communications mix within the planned marketing programme. However, the emergence of major customers as dominant buyers in many sectors, as a result of pressures towards consolidation and enhanced scale of operations, is changing the way in which sales issues are addressed in supplier organizations. The growth of new forms of buyer-seller relationship based on collaboration and partnering has encouraged organizations to reconsider the sales and account management operation as an important source of competitive differentiation in commoditized markets. Increasingly, sales is being perceived as a central part of business strategy and attention given to the challenges in better aligning sales processes with strategy. This has many implications for the design of the sales organization and its management strategy which go far beyond the confines of conventional marketing views.

Marketing Strategy and Competitive Positioning, 7th Edition Prof Graham Hooley, Brigitte Nicoulaud, John Rudd, Nick Lee, 2020-01-09

Marketing Strategy and Competitive Positioning 6e deals with the process of developing and implementing a marketing strategy. The book focuses on competitive positioning at the heart of marketing strategy and includes in-depth discussion of the processes used in marketing to achieve competitive advantage. The book is primarily about creating and sustaining superior performance in the marketplace. It focuses on the two central issues in marketing strategy formulation: the identification of target markets and the creation of a differential advantage. In doing that, it recognises the emergence of new potential target markets born of the recession and increased concern for climate change and examines ways in which firms can differentiate their offerings through the recognition of environmental and social concerns. The book is ideal for undergraduate and postgraduate students taking modules in Marketing Strategy, Marketing Management and Strategic Marketing Management.
