Tourism And Climate Change Tourism And Climate Change:

Tourism and Climate Change Daniel Scott, C. Michael Hall, Gossling Stefan, 2012-06-14 Climate change is the single most important global environmental and development issue facing the world today and has emerged as a major topic in tourism studies. Climate change is already affecting the tourism industry and is anticipated to have profound implications for tourism in the twenty-first century, including consumer holiday choices, the geographic patterns of tourism demand, the competitiveness and sustainability of destinations, and the contribution of tourism to international development. **Tourism and Climate Change: Impacts, Adaptation and Mitigation** is the first book to provide a comprehensive overview of the theory and practice of climate change and tourism at the tourist enterprise, destination, and global scales. Major themes include the implications of climate change and climate policy for tourism sectors and destinations around the world; tourist perceptions of climate change impacts; tourism's global contribution to climate change; adaptation and mitigation responses by all major tourism stakeholders; and the integral links between climate change and sustainable tourism. It combines a thorough scientific assessment of the climate-tourism interrelationships with discussion of emerging mitigation and adaptation practice, showcasing international examples throughout the tourism sector as well as actions by other sectors that will have important implications for tourism. Written by three leading academics in this field, this critical contribution highlights the challenges of climate change within the tourism community and provides a foundation for decision making for both reducing the risks and taking advantage of the opportunities associated with climate change. This comprehensive discussion of the complexities of climate change and tourism is essential reading for students, academics, business leaders, and government policy makers.

Tourism, Recreation, and Climate Change Colin Michael Hall, James E. S. Higham, 2005-01-01 This book represents the first comprehensive examination of the relationship between tourism and climate change and is of interest not only to students of tourism but also to policy makers and the tourism industry who will have to respond to the challenges posed by climate change. **BOOK JACKET** **Climate Change and Tourism** Susanne Becken, John E. Hay, 2012 The contribution of tourism to climate change and the likely effects of climate change on tourist destinations have been well reported and discussed; however, there is a lack of evidence-based systematic advice as to how the industry should respond. This book addresses the gap between our increasing understanding of the drivers and consequences of climate change and practical advice for mitigation and adaptation. This text acknowledges the importance of a sound conceptual understanding of climate change and considers how the industry might best respond. This approach relies upon the roles of supportive policies and institutions and is presented through critically assessed case studies from across the world. These examples support an overall framework which provides a methodology for translating adaptation and mitigation policies into practice. **Tourism and Climate Change** Susanne Becken, John E. Hay, 2007-01-01 The book provides a comprehensive discussion of the latest knowledge in the field of tourism and climate change. It is aimed at tourism practitioners and those with an academic interest.
