personal mobility can become more sustainable The book is structured in three parts Part I explores how personal mobility has evolved since the mid nineteenth century plotting the intricate relationship between new forms of mobile technology urban planning and design and social practices Part II examines how researchers study transport and mobility and outlines the different intellectual trajectories of transport geography and geographies of mobilities Part III then outlines and discusses the discourse of sustainable mobility that has emerged in recent years the ways in which social economic and environmental sustainability can be promoted through different strategies focusing on behavioural change and urban design Geographies of Transport and Mobility provides a unique perspective on personal mobility by demonstrating how the way we travel has developed through complex economic and social processes It argues that this historical context is critical for considering how mobility in the twenty first century can be more sustainable not just environmentally but also economically and socially As such it argues for a renewed focus on sustainable place making as a way to radically shift mobility practices Geographies of Transport and Mobility is designed to appeal to advanced level undergraduate students and researchers in the fields of geography anthropology psychology sociology and transport studies *Communication, Translation, and Community in the Middle Ages and Early Modern Period* Albrecht Classen, 2022-08-22 Literature serves many purposes and one of them certainly proves to be to convey messages wisdom and instruction and this across languages religions and cultures Beyond that as the contributors to this volume underscore people have always endeavored to reach out to their community members that is to build community to learn from each other and to teach Hence this volume explores the meaning of communication translation and community building based on the medium of language While all these aspects have already been discussed in many different venues the contributors endeavor to explore a host of heretofore less considered historical religious literary political and linguistic sources While the dominant focus tends to rest on conflicts hostility and animosity in the pre modern age here the emphasis rests on communication with its myriad of challenges and potentials for establishing a community As the various studies illustrate a close reading of communicative issues opens profound perspectives regarding human relationships and hence the social context This understanding invites intensive collaboration between medical historians literary scholars translation experts and specialists on religious conflicts and discourses We also learn how much language carries tremendous cultural and social meaning and determines in a most sensitive manner the interactions among people in a communicative and community based fashion Routledge Studies in Contemporary Geographies of Leisure, Tourism, and Mobility [Anonymus AC08939270], 2003 Tourism and Leisure Mobilities Jillian Rickly, Kevin Hannam, Mary Mostafanezhad, 2016-07-15 This book reframes tourism as well as leisure within mobilities studies to challenge the limitations that dichotomous understandings of home away work leisure and host guest bring A mobilities approach to tourism and leisure encourages us to think beyond the mobilities of tourists to ways in which tourism and leisure experiences bring other mobilities into sync or disorder and as a result re conceptualizes social theory

The proposed anthology stretches across academic disciplines and fields of study to illustrate the advantages of multi disciplinary conversation and in so doing it challenges how we approach studies of movement based phenomena and the concept of scale Part One examines the ways in which mobility informs and is informed by leisure from everyday practices to leisure inspired mobile lifestyles Part Two investigates individuals and communities that become entrepreneurial in the face of changing tourism contexts and reflects on the performance of work through multiple mobilities Part Three turns to issues of development with attention to the cultural politics that frame development encounters in the context of tourism The varied ways that people move into and out of development projects is mediated by geopolitical discourses that can both challenge and perpetuate geographic imaginations of tourism destinations

various recent academic turns have led to fresh examination of existing debates and have advanced new theoretical ideas in geography that are more salient than ever for tourism studies. The Routledge Handbook of Tourism Geographies seeks to examine such recent developments by providing a state of the art review of the field, documenting advances in research and evaluating different perspectives, approaches, techniques and contexts. The Routledge Handbook of Tourism Geographies considers recent disciplinary developments, including post-disciplinarily in geography, in relation to the study of tourism. It also analyzes the fledgling relationships of the new mobilities paradigm, critical tourism studies and cultural political economy to tourism spaces and places, as well as acknowledging a spatial turn in poststructuralist social sciences more generally. In addition, it evaluates how postcolonial, feminist, sensory, performative and queer perspectives have diversified research in the tourism geographies field. Spatial analysis, time geography, placemaking and landscape concerns are addressed, and issues such as transport, environmental discourses and development are also analyzed. The Host Gaze in Global Tourism Omar Moufakkir, Yvette Reisinger, 2013

Most tourism theories have been developed from the tourists' perspective, including the seminal work by John Urry, *The Tourist Gaze*, which is now a classic text. *The Host Gaze in Global Tourism* is a unique book for researchers and students as it is the first to look at the host gaze from within the host community. It discusses how the gaze is constructed, how it has developed, how it varies between countries and how the tourism industry can affect it. By looking at the gazes of both Western and non-Western hosts, this book analyses the dynamics of a host destination and consequences thereof.
