Tourists Signs And The City New Directions In Tourism Analysis:

Tourists, Signs and the City Michelle M. Metro-Roland, 2016-02-24 Drawing upon the literature of landscape geography tourism studies cultural studies visual studies and philosophy this book offers a multi disciplinary approach to understanding the interaction between urban environments and tourists This is a necessary prerequisite for cities as they make themselves into enticing destinations and compete for tourists attention It argues that tourists make sense of and draw meaningful conclusions about the places in which they tour based upon the interpretation of the signs or elements encountered within the built environment elements such as graffiti and lamp posts The writings of the American pragmatist Charles S Peirce on interpretation provide the theoretical model for explaining the way in which mind and world or thoughts and objects result in tourists interacting with place This theoretical framework elucidates three applied studies undertaken with foreign visitors to the Hungarian capital of Budapest Based upon extensive ethnographic field work these studies focus on tourists interpretation of the urban landscape with particular attention paid to the encounters with national culture the role of architecture and the importance of the prosaic in urban tourism

Emotion in Motion Mike Robinson, David Picard, 2016-05-06 What happens when tourists scream with fear shout with anger and frustration weep with joy and delight or even faint in the face of revealed beauty How can certain sites affect some tourists so deeply that they require hospitalisation and psychiatric treatment What are the inner contours of tourist experience and how does it relate to specific emotional cultures What are the consequences of the emotional cultures of tourists upon destinations How are differences in emotional culture mobilized and played out in the transnational contact zones of international tourism While many books have engaged with the structural frames of tourist practice and experience this is the first to deal with the emotional dimensions of tourism travel and contact and the ways in which they can transform tourists destinations and travel cultures through emotional engagements The book brings together an international array of scholars from anthropology psychiatry history cultural geography and critical tourism studies to explore how the movement to and through the realms of exotic people wild natures subliminal art spirit worlds metropolitan cities and sexualised others variably provoke emotions peak experiences travel syndromes and inner dialogues The authors show how tourism challenges us to engage with concepts of self other time nature sex the body and death Through a set of ethnographic and historic cases they demonstrate that such engagements usually have little to do with the actual destination but rather are deeply anchored in personal memories repressed fears and desires and the collective imaginaries of our societies

Public Space and Body offers a timely and interdisciplinary examination of how bodies experience shape and are shaped by
urban life particularly in the wake of the COVID 19 pandemic Bringing together contributions from scholars artists and
practitioners across diverse geographies the book explores the entangled relationships between urban space embodiment
and publicness through a variety of methodological lenses including ethnography visual and performative arts and critical
urban theory The book highlights underexplored themes such as gendered vulnerability spatial justice post pandemic public
space and marginalized urban bodies in both Global North and Global South contexts By focusing on lived experience and
embodied methodologies the book challenges dominant urban narratives and contributes fresh perspectives on space care
power and resistance It will benefit readers seeking to rethink cities not merely as physical or functional entities but as
affective and contested terrains of social life Designed for researchers students and professionals in urban studies sociology
planning architecture gender studies and cultural geography this collection foregrounds the bodily and sensory dimensions
of urban encounters spatial politics and everyday life The Dracula Dilemma Duncan Light,2016-03-23 For many in the
West Romania is synonymous with Count Dracula Since the publication of Bram Stoker s famous novel in 1897 Transylvania

and by extension Romania has become inseparable in the Western imagination with Dracula vampires and the supernatural. Moreover, since the late 1960s Western tourists have travelled to Transylvania on their own searches for the literary and supernatural roots of the Dracula myth. Such Dracula tourism presents Romania with a dilemma. On one hand, Dracula is Romania's unique selling point and has considerable potential to be exploited for economic gain. On the other hand, the whole notion of vampires and the supernatural is starkly at odds with Romania's self-image as a modern developed European state. This book examines the way that Romania has negotiated Dracula tourism over the past four decades. During the communist period up to 1989, the Romanian state did almost nothing to encourage such tourism but reluctantly tolerated it. However, some discrete local initiatives were developed to cater for Dracula enthusiasts that operated at the margins of legality in a communist state. In the post-communist period after 1989, any attempt to censor Dracula has disappeared and the private sector in Romania has been swift to exploit the commercial possibilities of the Count. However, the Romanian state remains ambivalent about Dracula and continues to be reluctant to encourage or promote Dracula tourism. As such, Romania's dilemma with Dracula remains unresolved.
