Mathematical Knowledge and the Interplay of Practices José Ferreirós, 2015-12-22 This book presents a new approach to the epistemology of mathematics by viewing mathematics as a human activity whose knowledge is intimately linked with practice Charting an exciting new direction in the philosophy of mathematics Jos Ferreir s uses the crucial idea of a continuum to provide an account of the development of mathematical knowledge that reflects the actual experience of doing math and makes sense of the perceived objectivity of mathematical results Describing a historically oriented agent based philosophy of mathematics Ferreir s shows how the mathematical tradition evolved from Euclidean geometry to the real numbers and set theoretic structures He argues for the need to take into account a whole web of mathematical and other practices that are learned and linked by agents and whose interplay acts as a constraint Ferreir s demonstrates how advanced mathematics far from being a priori is based on hypotheses in contrast to elementary math which has strong cognitive and practical roots and therefore enjoys certainty Offering a wealth of philosophical and historical insights *Mathematical Knowledge and the Interplay of Practices* challenges us to rethink some of our most basic assumptions about mathematics its objectivity and its relationship to culture and science

The nth-Order Comprehensive Adjoint Sensitivity Analysis Methodology, Volume II Dan Gabriel Cacuci, Ruixian Fang, 2023-04-26 This text describes a comprehensive adjoint sensitivity analysis methodology nth CASAM developed by the author which enable the efficient and exact computation of arbitrarily high order functional derivatives of model responses to model parameters in large scale systems The nth CASAM framework is set in linearly increasing Hilbert spaces each of state function dimensionality as opposed to exponentially increasing parameter dimensional spaces thereby overcoming the so called curse of dimensionality in sensitivity and

uncertainty analysis The nth CASAM is applicable to any model the larger the number of model parameters the more efficient the nth CASAM becomes for computing arbitrarily high order response sensitivities The book will be helpful to those working in the fields of sensitivity analysis uncertainty quantification model validation optimization data assimilation model calibration sensor fusion reduced order modelling inverse problems and predictive modelling This Volume Two the second of three presents the large scale application of the nth CASAM to perform a representative fourth order sensitivity analysis of the Polyethylene Reflected Plutonium benchmark described in the Nuclear Energy Agency NEA International Criticality Safety Benchmark Evaluation Project ICSBEP Handbook This benchmark is modeled mathematically by the Boltzmann particle transport equation involving 21 976 imprecisely known parameters the numerical solution of which requires representative large scale computations The sensitivity analysis presented in this volume is the most comprehensive ever performed in the field of reactor physics and the results presented in this book prove perhaps counter intuitively that many of the 4th order sensitivities are much larger than the corresponding 3rd order ones which are in turn much larger than the 2nd order ones all of which are much larger than the 1st order sensitivities Currently the nth CASAM is the only known methodology which enables such large scale computations of exactly obtained expressions of arbitrarily high order response sensitivities

Advances and Applications of DSMT for Information Fusion. Collected Works, Volume 4 Florentin Smarandache, Jean Dezert, 2015-07-01 The fourth volume on Advances and Applications of Dezert Smarandache Theory DSMT for information fusion collects theoretical and applied contributions of researchers working in different fields of applications and in mathematics The contributions have been published or presented after disseminating the third volume 2009 <http://fs.gallup.unm.edu/DSMT/book3.pdf> in international conferences seminars workshops and journals
