Gendered Violence at International Festivals is a groundbreaking collection that focusses on this highly important social issue for the first time Including a diverse range of interdisciplinary studies on the issue the book contests the widely held notion that festivals are temporal spaces free from structural sexism inequalities or gender power dynamics Rather they are spaces where these concerns are enhanced and enacted more freely and where the experiential environment is used as an excuse or as an opportunity to victim blame and shame In this emerging and under researched area the chapters not only present original work in terms of topics but also in theoretical and methodological approaches All of the chapters are cross or interdisciplinary drawing on gender sexualities cultural and ethnicity studies Studies from a range of highly regarded academics based around the world examine the subject by looking at examples from a wide range of destinations including Spain Argentina Nigeria Zimbabwe Australia Canada and the UK This significant book progresses understanding and debates

about gendered festival experiences and emphasises the symbolic and physical violence often associated with them This will be of great interest to undergraduate and postgraduate students and academics in the field of Events Studies It will also be of use to practitioners or non profit workers in the festival industries including festival management organisations and planning committees

Politics of Rightful Killing Sima Shakhsari,2020-01-17 In the early 2000s mainstream international news outlets celebrated the growth of Weblogistan the online and real-life transnational network of Iranian bloggers and depicted

it as a liberatory site that gave voice to Iranians As Sima Shakhsari argues in Politics of Rightful Killing the common assumptions of Weblogistan as a site of civil society consensus and resistance to state oppression belie its deep internal conflicts While Weblogistan was an effective venue for some Iranians to practice democracy it served as a valuable site for the United States to surveil bloggers and express anti Iranian sentiment and policies At the same time bloggers used the network to self police and enforce gender and sexuality norms based on Western liberal values in ways that unwittingly undermined Weblogistan s claims of democratic participation In this way Weblogistan became a site of cybergovernmentality where biopolitical security regimes disciplined and regulated populations Analyzing online and off line ethnography Shakhsari provides an account of digital citizenship that raises questions about the internet s relationship to political engagement militarism and democracy
