The Routledge Handbook of Remix Studies and Digital Humanities Eduardo Navas, Owen Gallagher, xtine burrough, 2021-02-14 In this comprehensive and highly interdisciplinary companion contributors reflect on remix across the broad spectrum of media and culture with each chapter offering in depth reflections on the relationship between remix studies and the digital humanities The anthology is organized into sections that explore remix studies and digital humanities in relation to topics such as archives artificial intelligence cinema epistemology gaming generative art hacking pedagogy sound and VR among other subjects of study Selected chapters focus on practice based projects produced by artists designers remix studies scholars and digital humanists With this mix of practical and theoretical chapters editors Navas Gallagher and burrough offer a tapestry of critical reflection on the contemporary cultural and political implications of remix studies and the digital humanities functioning as an ideal reference manual to these evolving areas of study across the arts humanities and social sciences This book will be of particular interest to students and scholars of digital humanities remix studies media arts information studies interactive arts and technology and digital media studies Steampunk and

Nineteenth-Century Digital Humanities Roger Whitson, 2016-12-01 Steampunk is more than a fandom a literary genre or an aesthetic It is a research methodology turning history inside out to search for alternatives to the progressive technological boosterism sold to us by Silicon Valley This book turns to steampunk's quirky temporalities to embrace diverse genealogies of the digital humanities and to unite their methodologies with nineteenth century literature and media archaeology The result is nineteenth century digital humanities a retrofuturist approach in which readings of steampunk novels like William Gibson and Bruce Sterling's *The Difference Engine* and Ken Liu's *The Grace of Kings* collide with nineteenth century technological histories like Charles Babbage's use of the difference engine to enhance worker productivity and Isabella Bird's spirit photography of alternate history China Along the way Steampunk and Nineteenth Century Digital Humanities considers steampunk as a public form of digital humanities scholarship and activism examining projects like Kinetic Steam Works's reconstruction of Henri Giffard's 1852 steam powered airship Jake von Slatt's use of James Wimshurst's 1880 designs to create an electric influence machine and the queer steampunk activism of fans appearing at conventions around the globe Steampunk as a digital humanities practice of repurposing reacts to the growing sense of multiple non human temporalities

mediating our human histories microtemporal electricities flowing through our computer circuits mechanical oscillations marking our work days geological stratifications and cosmic drifts extending time into the millions and billions of years Excavating the entangled anachronistic layers of steampunk practice from video games like Bioshock Infinite to marine trash floating off the shore of Los Angeles and repurposed by media artist Claudio Garza into steampunk submarines Steampunk and Nineteenth Century Digital Humanities uncovers the various technological temporalities and multicultural retrofutures illuminating many alternate histories of the digital humanities

The Fabric of Interface Stephen Monteiro, 2017-11-10 Tracing the genealogy of our physical interaction with mobile devices back to textile and needlecraft culture For many of our interactions with digital media we do not sit at a keyboard but hold a mobile device in our hands We turn and tilt and stroke and tap and through these physical interactions with an object we make things images links sites networks In The Fabric of Interface Stephen Monteiro argues that our everyday digital practice has taken on traits common to textile and needlecraft culture Our smart phones and tablets use some of the same skills manual dexterity pattern making and linking required by the handloom the needlepoint hoop and the lap sized quilting frame Monteiro goes on to argue that the capacity of textile metaphors to describe computing weaving code threaded discussions zipped files software patches switch fabrics represents deeper connections between digital communication and what has been called homecraft or women's work Connecting networked media to practices that seem alien to media technologies Monteiro identifies handicraft and textile techniques in the production of software and hardware and cites the punched cards that were read by a loom's rods as a primitive form of computer memory examines textual and visual discourses that position the digital image as a malleable fabric across its production access and use compares the digital labor of liking linking and tagging to such earlier forms of collective production as quilting bees and piecework and describes how the convergence of intimacy and handiwork at the screen interface combined with needlecraft aesthetics genders networked culture and activities in unexpected ways

Information Politics Tim Jordan, 2015-02-20 Conflict over information has become a central part of modern politics and culture The sites of struggle are numerous the actors beyond count Currents of liberation and exploitation course through the debates about Edward Snowden and surveillance Anonymous search engines and social media In Information Politics Tim Jordan identifies all these issues in relation to a general understanding of the nature of an information politics that emerged with the rise of mass digital cultures and the internet He locates it within a field of power and rebellion that is populated by many interwoven social and political conflicts including gender class and ecology The exploitations both facilitated by and contested through increases in information flows the embedding of information technologies in daily life and the intersection of network and control protocols are all examined Anyone hoping to get to grips with the rapidly changing terrain of digital culture and conflict should start here

Theorising Cyber (In)Security Noran Shafik Fouad, 2024-12-02 This book argues that cybersecurity's informational ontology offers empirical challenges and introduces a new interdisciplinary theoretical and

conceptual framework of entropic security Cyber attacks have been growing exponentially in number and sophistication ranging from those conducted by non state actors to state backed cyber attacks Accordingly cybersecurity now constitutes an integral part of public private and academic discourses on contemporary in security Yet because its emergence as a novel security field occurred after many long established frameworks had already been developed cybersecurity has been repeatedly scrutinised for its compatibility with conventional security theories concepts and understandings particularly with that of military security This book however argues that cybersecurity differs profoundly from many other security sectors because of the ontological nature of information that sits at the heart of this field Through this new framework the book investigates three key empirical challenges in cybersecurity that are co produced by its informational ontology 1 the disordered nature of cybersecurity and its tendency towards increasing insecurity as a manifestation of the intrinsic uncertainties in information systems 2 the unpredictable and unintended consequences resulting from autonomous cyber attacks that challenge human control of cybersecurity environments and 3 the persistent harms engendered by mundane cyber threats that do not fit within conventional understandings of existentiality in security theories Through a detailed analysis of cybersecurity discourses and practices in the USA 2003 present the book goes on to show how these complex cybersecurity challenges are better analysed and theorised through the new information theoretic notion of entropic security This book will be of much interest to students of cyber security critical security studies science and technology studies and International Relations in general

Crombez,2021-03-08 Anxiety Modern Society and the Critical Method interrogates the historical intersections of political economy technology and anxiety By analyzing and building upon the tools developed by critical theorists to diagnose the symptoms of modern life such as alienation anomie the Protestant ethic and repression Joel Michael Crombez convincingly argues for a revitalization of critical social science to better confront the anxiety of life in modern societies With anxiety typically falling under the purview of psychology and its biomedical approach to treatment here anxiety is demonstrated to have origins in the totalizing logics of modern society As such Crombez provides an interdisciplinary roadmap to diagnose and treat anxiety which he calls critical socioanalysis that accounts for the psychosocial complexity of its production

Rhetorical Machines John Jones,Lavinia Hirsu,2019-07-02 A landmark volume that explores the interconnected nature of technologies and rhetorical practice Rhetorical Machines addresses new approaches to studying computational processes within the growing field of digital rhetoric While computational code is often seen as value neutral and mechanical this volume explores the underlying and often unexamined modes of persuasion this code engages In so doing it argues that computation is in fact rife with the values of those who create it and thus has powerful ethical and moral implications From Socrates's critique of writing in Plato's Phaedrus to emerging new media and internet culture the scholars assembled here

provide insight into how computation and rhetoric work together to produce social and cultural effects This multidisciplinary volume features contributions from scholar practitioners across the fields of rhetoric computer science and writing studies It is divided into four main sections Emergent Machines examines how technologies and algorithms are framed and entangled in rhetorical processes Operational Codes explores how computational processes are used to achieve rhetorical ends Ethical Decisions and Moral Protocols considers the ethical implications involved in designing software and that software s impact on computational culture and the final section includes two scholars responses to the preceding chapters Three of the sections are prefaced by brief conversations with chatbots autonomous computational agents addressing some of the primary questions raised in each section At the heart of these essays is a call for emerging and established scholars in a vast array of fields to reach interdisciplinary understandings of human machine interactions This innovative work will be valuable to scholars and students in a variety of disciplines including but not limited to rhetoric computer science writing studies and the digital humanities

Designing Smart and Resilient Cities for a Post-Pandemic World Anthony Larsson, Andreas Hatzigeorgiou, 2022-08-31 Are pandemics the end of cities Or do they present an opportunity for us to reshape cities in ways making us even more innovative successful and sustainable Pandemics such as COVID 19 and comparable disruptions have caused intense debates over the future of cities Through a series of investigative studies Designing Smart and Resilient Cities for a Post Pandemic World Metropandemic Revolution seeks to critically discuss and compare different cases innovations and approaches as to how cities can utilise nascent and future digital technology and or new strategies in order to build stronger resilience to better tackle comparable large scale pandemics and or disruptions in the future The authors identify ten separate societal areas where future digital technology can impact resilience These are discussed in individual chapters Each chapter concludes with a set of proposed action points based on the conclusions of each respective study These serve as solid policy recommendations of what courses of action to take to help increase the resilience in smart cities for each designated area Securing resilience and cohesion between each area will bring about the metropandemic revolution This book features a foreword by Nobel laureate Peter C Doherty and an afterword by Professor of Urban Technologies Carlo Ratti It provides fresh and unique insights on smart cities and futures studies in a pandemic context offers profound reflections on contemporary societal functions and the needs to build resilience and combines lessons learned from historical pandemics with possibilities offered by future technology
