Stavenga, 1995-02-06 The first and only comprehensive introduction to the economics of tourism A knowledge of economic trends and conditions is fundamental to strategic planning and project development in any business Yet despite the fact that

tourism has become the world's largest industry until now there were no textbooks devoted to the economics of tourism. A book whose time has finally come, *Tourism Economics* arms students and industry professionals with a solid working knowledge of economic concepts and analytical techniques as they apply to tourism. Written by three experts from the U.S. International University's prestigious Department of Hotel, Restaurant and Tourism Management, *Tourism Economics* explains all important economic principles and concepts, defines key terminology and clearly describes a number of analytical models and forecasting techniques. It illustrates all points covered with numerous case studies from around the world and selected reading excerpts. Requires no prior familiarity with economics and features a clear, easy-to-read, nonmathematical style. Tourism can be viewed as an institution with millions of interactions taking place, an institution with a history, body of knowledge and a constituency of millions of people who feel themselves a part of the institution. For purposes of this book, tourism is an economic activity involving billions of dollars exchanged each month, a social science to be analyzed, trends to be identified and costs/benefits to be computed from. *Tourism Economics*: The past two decades have been a time of fast and furious growth for world tourism, accounting for more than 6% of the world's gross national product, \$3.2 trillion in 1993 and employing 127 million people worldwide. Tourism is now beyond a doubt the world's largest industry. And with an average of 20,000 new jobs created per each additional 1 million spent on travel, tourism is also the most prolific generator of new jobs. As a consequence of tourism's growing preeminence, a new field has emerged over the past few years to help the tourism industry and public policymakers better understand the impact of tourism on other segments of the economy and to recognize and facilitate current and future economic trends in tourism. *Tourism Economics*: This groundbreaking book was written by three experts from the U.S. International University's prestigious Department of Hotel, Restaurant and Tourism Management. With the assistance of numerous case studies from around the world and selected reading excerpts, they explain all relevant economic principles and concepts, define key terminology and clearly describe a number of useful analytical models and forecasting techniques. Requiring no prior knowledge of economics, *Tourism Economics* features a clear, easy-to-read, nonmathematical style. A book whose time has finally come, *Tourism Economics* is indispensable reading for students of tourism and hospitality as well as industry professionals and researchers. *The Economics of Travel and Tourism*, Adrian Bull, 1991. An analysis of the multidisciplinary nature of tourism with chapters on travel and accommodation and the broader issues of multinational involvement. The author, a lecturer in business and hotel management at Griffith University, draws on examples from all over the world. Includes bibliography and name and subject indexes. **CTH - Introduction to Tourism Economics** BPP Learning Media, 2011-07-01. BPP Learning Media is proud to be the official publisher for CTH. Tourism Economics Álvaro Matias, Peter Nijkamp, Manuela Sarmento, 2011-07-28. The assessment of local, regional or

national impacts of an influx of tourists of different kind and origin has in recent years become a new challenge for economics research in the tourism sector There is a clear need to develop solid methodologies through which the socio economic impacts of tourism can be assessed Tourism impact assessment as a systematic approach to the estimation of socio economic effects of tourism on relevant parts of the economy has become a timely response to the need for appropriate information for stakeholders both public and private The present volume brings together a set of recent impact studies of both a theoretical methodological and an applied policy oriented nature which have been selected on the basis of their originality or novel contribution to the research in this field
