Toward An Anthropology Of The Will:

Toward an Anthropology of the Will Keith M. Murphy, C. Jason Throop, 2010-02-10 *Toward an Anthropology of the Will* is the first book that systematically explores volition from an ethnographically informed anthropological point of view. While philosophers have for centuries puzzled over the degree to which individuals are free to choose how to act in the world, anthropologists have either assumed that the will is a stable constant fact of the human condition or simply ignored it. Although they are usually quite comfortable discussing the relationship between culture and cognition or culture and emotion, anthropologists have not yet focused on how culture and volition are interconnected. The contributors to this book draw upon their unique insights and research experience to address fundamental questions including: What forms does the will take in culture? How is willing experienced? How does it relate to emotion and cognition? What does imagination have to do with willing? What is the connection between morality, virtue, and willing? Exploring such questions, the book moves beyond old debates about freedom and determinacy to demonstrate how a richly nuanced anthropological approach to the cultural experience of willing can help shape theories of social action in the human sciences. Report of the Director to the Board of Trustees Chicago Natural History Museum, 1914 *The Resounding Soul* Samuel Kimbriel, Eric Austin Lee, 2016-09-29 It is surely not coincidental that the term soul should mean not only the centre of a creature's life and consciousness but also a thing or action characterised by intense vivacity that beings got soul. It also seems far from coincidental that the same contemporary academic discussions that have largely cast aside the language of soul in their quest to define the character of human mental life should themselves be so bloodless or so lacking in soul. *The Resounding Soul* arises from the opposite premise that the task of understanding human nature is bound up with the more

critical task of learning to be fully human The papers collected here are derived from a conference in Oxford sponsored by the Centre of Theology and Philosophy and explore the often surprising landscape that emerges when human consciousness is approached from this angle Drawing upon literary philosophical theological historical and musical modes of analysis these essays remind the reader of the power of the ancient language of soul over against contemporary impulses to reduce fragment and overly determine human selfhood *Annual Report of the Regents of the University, to the Legislature of the State of New-York* University of the State of New York.
