**Language Contact and Change in the Americas** Andrea L. Berez-Kroeker, Diane M. Hintz, Carmen Jany, 2016-04-19

This unique collection of articles in honor of Marianne Mithun represents the very latest in research on language contact and language change in the Indigenous languages of the Americas. The book aims to provide new theoretical and empirical insights into how and why languages change especially with regard to contact phenomena in languages of North America, Meso America and South America. The individual chapters cover a broad range of topics including sound change, morphosyntactic change, lexical semantics, grammaticalization, language endangerment and discourse pragmatic change. With chapters from distinguished scholars and talented newcomers alike, this book will be welcomed by anyone with an interest in internally and externally motivated language change.

*Highly complex syllable structure: A typological and diachronic study* Shelece Easterday, 2019-11-13. The syllable is a natural unit of organization in spoken language whose strongest cross-linguistic patterns are often explained in terms of a universal preference for the CV structure. Syllable patterns involving long sequences of consonants are both typologically rare and theoretically marginalized, with few approaches treating these as natural or unproblematic structures. This book is an investigation of the properties of languages with highly complex syllable patterns. The two aims are i) to establish whether these languages share other linguistic features in common such that they constitute a distinct linguistic type and ii) to identify possible diachronic paths and natural mechanisms by which these patterns come about in the history of a language. These issues are investigated in a diversified sample of 100 languages, 25 of which have highly complex syllable patterns. Languages with highly complex syllable structure are characterized by a number of phonetic, phonological and morphological features which serve to set them apart from languages with simpler syllable patterns. These include specific segmental and suprasegmental properties, a higher prevalence of vowel reduction processes with extreme outcomes and higher average morpheme word ratios. The results suggest that highly complex syllable structure is a linguistic type distinct from but sharing some characteristics with other proposed holistic phonological types including stress-timed and consonantal languages. The results point to word stress and specific patterns of gestural organization as playing important roles in the diachronic development of these patterns out of simpler syllable structures.

**Interfaces in Functional Discourse Grammar** Lucía Contreras-García, Daniel García Velasco, 2021-08-23. In grammar design, a basic distinction is made between derivational and modular architectures. This raises the question of which organization of grammar can deal with linguistic phenomena more appropriately. The studies contained in the present volume explore the interface relations between different levels of linguistic representation in Functional Discourse Grammar as presented in Hengeveld and Mackenzie 2008 and Keizer 2015. This theory analyses linguistic expressions at four linguistic levels: interpersonal, representational, morphosyntactic and phonological. The articles address issues such as the possible correspondences and mismatches between those levels as well as the conditions which constrain the combinations of levels.

in well formed expressions Additionally the theory is tested by examining various grammatical phenomena with a focus both on the English language and on typological adequacy anaphora raising phonological reduction noun incorporation reflexives and reciprocals serial verbs the passive voice time measurement constructions coordination nominal modification and connectives Overall the volume provides both theoretical and descriptive insights which are of relevance to linguistics in general

*The Persistence of Language* Shannon T. Bischoff, Deborah Cole, Amy V. Fountain, Mizuki Miyashita, 2013-05-28 This edited collection presents two sets of interdisciplinary conversations connecting theoretical methodological and ideological issues in the study of language In the first section Approaches to the study of the indigenous languages of the Americas the authors connect historical theoretical and documentary linguistics to examine the crucial role of endangered language data for the development of biopsychological theory and to highlight how methodological decisions impact language revitalization efforts Section two Approaches to the study of voices and ideologies connects anthropological and documentary linguistics to examine how discourses of language contact endangerment linguistic purism and racism shape scholarly practice and language policy and to underscore the need for linguists and laypersons alike to acquire the analytical tools to deconstruct discourses of inequality Together these chapters pay homage to the scholarship of Jane H Hill demonstrating how a critical interdisciplinary linguistics narrows the gap between disparate fields of analysis to treat the ecology of language in its entirety

examines the diversity of English in American Indian speech communities. It presents a convincing case for the fundamental influence of ancestral American Indian languages and cultures on spoken and written expression in different Indian English codes. A distillation of over twenty years' research, this pioneering work explores the linguistic and sociolinguistic characteristics of English language use among members of Navajo, Hopi, Mojave, Ute, Tsimshian, Ktzevuk, Ponca, Pima, Lakota, Cheyenne, Laguna, Santa Ana, Isleta, Chilocot, Seminole, Cherokee, and other American Indian tribes. *American Indian English* fills numerous gaps in existing studies of language histories, Indian student school experience, Indian-white contact and acculturation. Unlike contemporary studies on schooling, ethnicity, empowerment, and educational failure, *American Indian English* avoids postmodernist jargon and discourse strategies in favor of direct description and commentary. Data are derived from conditions of real life experience faced by speakers of Indian English in various English-speaking settings. This practical focus enhances the book's accessibility to Indian educators and community-based teachers as well as non-Indian academics.
