

2 Transmission mounting

2.1 Draining oil from transmission

CAUTION

Do not let any oil enter the soil, ground water or sewage system. Catch any overflowing oil in a suitable container and dispose of in accordance with environmental regulations.

- 1 Unscrew oil drain screw on transmission and catch used oil in suitable vessel.

NOTE

- Not all the oil in the converter can be drained. An additional approx. 7 dm³ can however be drained by unscrewing the pressure measuring stop (1) on the WSK control unit and the amount of oil left in the converter is therefore reduced to approx. 6 dm³.
- Depending on version and arrangement, a certain amount of oil also remains in the heat exchange and connection lines. This can also not be drained.

2.2 Assembly device IX56 139 137

- 1 Screw assembly device (2) onto output flange (3) of transmission.

CAUTION

Do not attach lifting tackle directly onto converter (see arrow). Attach rope and chain (4) as shown in diagram.

DANGER

The weight of the complete transmission is approx. 600 kg. It is essential that appropriate lifting tackle is used. Do not stand in the hazardous area.

- 2 Place complete transmission in vertical position.

- 3 The WSK can only be removed from above when in this position (refer to chapter 6).
