The Territories Of Science And Religion

Yves Gingras

The Territories Of Science And Religion:

The Territories of Science and Religion Peter Harrison, 2015-04-06 Peter Harrison takes what we think we know about science and religion dismantles it and puts it back together again in a provocative new way It is a mistake to assume as most do that the activities and achievements that are usually labeled religious and scientific have been more or less enduring features of the cultural landscape of the West Harrison by setting out the history of science and religion to see when and where they come into being and to trace their mutations over time reveals how distinctively Western and modern they are Only in the past few hundred years have religious beliefs and practices been bounded by a common notion and set apart from the secular And the idea of the natural sciences as discrete activities conducted in isolation from religious and moral concerns is even more recent dating from the nineteenth century Putting the so called opposition between religion and science into historical perspective as Harrison does here for the first time has profound implications for our understanding of the present and future relations between them

The Landscapes of Science and Religion Nick Spencer, Hannah Waite, 2025-01-24 The relationship between science and religion has long been a heated debate and is becoming an ever more popular topic The scientific capacity to manipulate and change humans and their environment through genetic engineering life extension and AI is going to take a huge leap forward in the twenty first century provoking endless debates around humans playing God But what do we mean by this Asking this question is surprisingly hard work Attempts to essentialise science let alone religion quickly run into trouble Where are the boundaries Whose definition of science is definitive Which concept of religious is the authoritative one Ultimately neither science nor religion can be pinned down to one single meaning or definition Rather they encompass a family of definitions that relate to one another in a complex web of shifting ways Drawing on extensive research with over a hundred leading thinkers in the UK including Martin Rees Brian Cox Susan Greenfield A C Grayling Ray Tallis Linda Woodhead Steve Bruce Adam Rutherford Robin Dunbar Francesca Stavrakopoulou and Iain McGilchrist *The Landscapes of Science and Religion* takes the much needed step of asking what science and religion actually are before turning to the familiar question of how they relate to one another Building on this by paying particular attention to those who sense some form of conflict here Spencer and Waite explore where the perceived conflict really lies What exactly are people disagreeing about when they disagree about science and religion and what if anything can we do to improve that disagreement and bring about a fruitful dialogue between these two important human endeavours

The Territories of Human Reason Alister E. McGrath, 2019 *The Territories of Human Reason* is the first major study to explore the emergence of multiple situated rationalities It focuses on the relation of the natural sciences and Christian theology but its approach can easily be extended to other disciplines

After Science and Religion Peter Harrison, John Milbank, 2022-05-19 The popular field of science and religion is a lively and well established area It is however a domain which has long been characterised by certain traits In the first place it tends towards an adversarial dialectic in

which the separate disciplines now conjoined are forever locked in a kind of mortal combat Secondly science and religion has a tendency towards disentanglement where science does one sort of thing and religion another And thirdly the duo are frequently pushed towards some sort of attempted synthesis wherein their aims either coincide or else are brought more closely together In attempting something fresh and different this volume tries to move beyond tried and tested tropes Bringing philosophy and theology to the fore in a way rarely attempted before the book shows how fruitful new conversations between science and religion can at last move beyond the increasingly tired options of either conflict or dialogue Science and Religion Gary B. Ferngren,2017-03 Weissenbacher Stephen P Weldon and Tomoko Yoshida *Science and Religion* Yves Gingras,2017-06-16 Today we hear renewed calls for a dialogue between science and religion why has the old question of the relations between science and religion now returned to the public domain and what is at stake in this debate To answer these questions historian and sociologist of science Yves Gingras retraces the long history of the troubled relationship between science and religion from the condemnation of Galileo for heresy in 1633 until his rehabilitation by John Paul II in 1992 He reconstructs the process of the gradual separation of science from theology and religion showing how God and natural theology became marginalized in the scientific field in the eighteenth and nineteenth centuries In contrast to the dominant trend among historians of science Gingras argues that science and religion are social institutions that give rise to incompatible ways of knowing rooted in different methodologies and forms of knowledge and that there never was and cannot be a genuine dialogue between them Wide ranging and authoritative this new book on one of the fundamental questions of Western thought will be of great interest to students and scholars of the history of science and of religion as well as to general readers who are intrigued by the new and much publicized conversations about the alleged links between science and religion **Science and Religion in Education** Berry Billingsley,Keith Chappell,Michael J. Reiss,2019-11-06 This book brings together the latest research in education in relation to science and religion Leading international scholars and practitioners provide vital insights into the underlying debates and present a range of practical approaches for teaching Key themes include the origin of the universe the theory of evolution the nature of the human person the nature of science and Artificial Intelligence These are explored in a range of international contexts The book provides a valuable resource for teachers students and researchers in the fields of education science religious education and the growing specialist field of science and religion Science and Religion in Education is a compelling read for current and future generations of academic researchers and teachers who wish to explore the fascinating intersect between science education and religious studies The research findings and insights presented by these international scholars offer new dimensions on contemporary practice Vaille Dawson Professor of Science Education University of Western Australia Science and Religion in Education offers a fascinating and diverse collection of chapters surveying the current state of thinking about how science and religion can be understood in education The book offers a wealth of thought provoking material for anyone interested in the natures of

science and religion their relationships or their representation within the curriculum Professor Keith Taber University of Cambridge Science education and religious education are uncomfortable bedfellows This book written in part as a response to the perhaps too clear accounts of Ian Barbour provides suitably nuanced pictures of how science and religion are dealt with in schools Whatever the views of specialists young people receive an education in both science and religion hearing their voices is refreshing in such a serious academic account Julian Stern Professor of Education and Religion York St John University Humans have long endeavored to make sense of the world often using science and religion Yet these two great traditions are frequently seen as incompatible This useful volume features thoughtful contributions from experts whose work straddles the divide and provides educators with arguments engaging strategies and historical perspectives to help build a bridge and allow a fruitful discussion in schools William F McComas Distinguished Professor of Science Education University of Arkansas Equal parts critical examination of existing models for the relationship between science and religion scholarly exposition of newer models and insights toward practical application in classrooms this book is an invaluable resource for science and religion educators If you have been thinking it is time we looked beyond Barbour's taxonomy you will want to read this book If you have not I implore you to read this book Jason Wiles Associate Professor of Biology and Science Education Syracuse University

Science and Religion in Western Literature Michael Fuller, 2022-08-16 This book explores ways in which Western literature has engaged with themes found within the field of science and religion both historically and in the present day It focuses on works of the imagination as important locations at which human arguments hopes and fears may be played out The chapters examine a variety of instances where scientific and religious ideas are engaged by novelists poets and dramatists casting new light upon those ideas and suggesting constructive ways in which science and religion may interact The contributors cover a rich variety of authors including Mary Shelley Aldous Huxley R S Thomas Philip Pullman and Margaret Atwood Together they form a fascinating set of reflections on some of the significant issues encountered within the discourse of science and religion indicating ways in which the insights of creative artists can make a valuable and important contribution to that discourse

The Warfare between Science & Religion Jeff Hardin, Ronald L Numbers, Ronald A. Binzley, 2018-10-15 A very welcome volume of essays questioning the presumption of irreconcilable conflict between science and religion British Journal for the History of Science The conflict thesis the idea that an inevitable irreconcilable conflict exists between science and religion has long been part of the popular imagination The Warfare between Science and Religion assembles a group of distinguished historians who explore the origin of the thesis its reception the responses it drew from various faith traditions and its continued prominence in public discourse Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals including John William Draper and Andrew Dickson White who through their polemical writings championed the conflict thesis relentlessly Others consider what the thesis meant to different religious communities including evangelicals liberal Protestants Roman Catholics Eastern

Orthodox Christians Jews and Muslims Finally essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual discourse today Based on original research and written in an accessible style the essays in The Warfare between Science and Religion take an interdisciplinary approach to question the historical relationship between science and religion and bring much needed perspective to an often bitter controversy Contributors include Thomas H Aechtner Ronald A Binzley John Hedley Brooke Elaine Howard Ecklund Noah Efron John H Evans Maurice A Finocchiaro Frederick Gregory Bradley J Gundlach Monte Harrell Hampton Jeff Hardin Peter Harrison Bernard Lightman David N Livingstone David Mislin Efthymios Nicolaidis Mark A Noll Ronald L Numbers Lawrence M Principe Jon H Roberts Christopher P Scheitle M Alper Yal inkaya

The Science of Religion: A Defence Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe s contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion

Identity in a Secular Age Fern Elsdon-Baker, Bernard Lightman, 2020-09-15 Although historians have suggested for some time that we move away from the assumption of a necessary clash between science and religion the conflict narrative persists in contemporary discourse But why And how do we really know what people actually think about evolutionary science let alone the many and varied ways in which it might relate to individual belief In this multidisciplinary volume experts in history and philosophy of science oral history sociology of religion social psychology and science communication and public engagement look beyond two warring systems of thought They consider a far more complex multifaceted and distinctly more interesting picture of how differing groups along a spectrum of worldviews including atheistic agnostic and faith groups relate to and form the ongoing narrative of a necessary clash between evolution and faith By ascribing agency to the public from the nineteenth century to the present and across Canada and the United Kingdom this volume offers a much more nuanced analysis of people s perceptions about the relationship between evolutionary science religion and personal belief one that better elucidates the complexities not only of that

relationship but of actual lived experience *The Bloomsbury Handbook of Schools and Religion* Jo Fraser-Pearce, James W. Fraser, 2023-09-21 The Bloomsbury Handbook of Schools and Religion provides the first truly global scan of contemporary issues and debates around the world regarding the relationships between the state schools and religion Organized around specific contested issues from whether or not mindfulness should be practised in schools to appropriate and inappropriate religious attire in schools to long term battles about evolution sexuality and race to public funding Fraser Pearce and Fraser carefully curate chapters by leading experts exploring these matters and others in a diverse range of national settings The Bloomsbury Handbook of Schools and Religion offers a refreshingly new international perspective **International**

Perspectives on Science, Culture, and Belief Fern Elsdon-Baker, Stephen H. Jones, James Riley, 2025-08-26 Public understanding of the relationship between science and religion is dominated by US and UK perspectives and research that has been carried out in Western Protestant Anglophone contexts This has enabled a culturally specific narrative of conflict to dominate public discussions of evolution science and religion obscuring the varied cultural contexts and complexities within which engagement with science takes place and the growing influence of non religious identities and diverse forms of spirituality Representing one of the most wide ranging and original contributions to the emerging body of research on the relationship between religion non religion and science in society this innovative and timely collection revisits challenges and rethinks longstanding assumptions by decentring positions and perspectives that have until recently dominated discussions of science and belief Drawing on almost a decade of multidisciplinary research *International Perspectives on Science Culture and Belief From Complexity to Globality* brings together incisive global perspectives exploring the social and cultural drivers of the relationships between evolutionary science and belief Highlighting the natures and varieties of the interrelation between science and belief globally this volume addresses the relationships between science culture and belief from multiple disciplines methodologies and geographical contexts including South Asia Latin America Africa and Australia as well as Europe and North America This work has particular relevance in the increasingly polarised post pandemic world shining a light for the first time on the multifaceted interplay between social identities and cultural narratives in debates that are often about far more than the science The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Science and Catholicism in Argentina (1750-1960)** Miguel de Asúa, 2022-05-09 *Science and Catholicism in Argentina 1750-1960* is the first comprehensive study on the relationship between science and religion in a Spanish speaking country with a Catholic majority and a Latin pattern of secularisation The text takes the reader from Jesuit missionary science in colonial times through the conflict ridden 19th century to the Catholic revival of the 1930s in Argentina The diverse interactions between science and religion revealed in this analysis can be organised in terms of their dynamic of secularisation The indissoluble identification of science and the secular which operated at rhetorical and institutional levels among the liberal elite and the

socialists in the 19th century lost part of its force with the emergence of Catholic scientists in the course of the 20th century In agreement with current views that deny science the role as the driving force of secularisation this historical study concludes that it was the process of secularisation that shaped the interplay between religion and science not the other way around

The Unidentified Colin Dickey, 2021-07-20 America's favorite cultural historian and author of *Ghostland* takes a thought provoking and deliciously unsettling Publisher's Weekly tour of the country's most persistent unexplained phenomena In a world where rational scientific explanations are more available than ever belief in the unprovable and irrational in fringe is on the rise from Atlantis to aliens from Flat Earth to the Loch Ness monster the list goes on It seems the more our maps of the known world get filled in the more we crave mysterious locations full of strange creatures Enter Colin Dickey Cultural Historian and Tour Guide of the Weird With the same curiosity and insight that made *Ghostland* a hit with readers and critics Colin looks at what all fringe beliefs have in common explaining that today's Illuminati is yesterday's Flat Earth the attempt to find meaning in a world stripped of wonder Dickey visits the wacky sites of America's wildest fringe beliefs from the famed Mount Shasta where the ancient race or extra terrestrials or possibly both depending on who you ask called Lemurians are said to roam to the museum containing the last remaining evidence of the great Kentucky Meat Shower investigating how these theories come about why they take hold and why as Americans we keep inventing and re-inventing them decade after decade *The Unidentified* is Colin Dickey at his best curious wry brilliant in his analysis yet eminently readable

Decoding the Cosmos Emily Qureshi-Hurst, 2025-10-31 In *Decoding the Cosmos* Dr Emily Qureshi Hurst University of Cambridge takes five of Christianity's most important ideas creation design providence incarnation and salvation and examines them in light of cutting edge physics Expertly compiling a decade of research into an accessible and engaging format Qureshi Hurst takes readers on a journey through Big Bang cosmology quantum mechanics special and general relativity chaos theory astrobiology and more As a result *Decoding the Cosmos* offers a deep dive into one of theology's most lively and fascinating areas science and religion Exploring some of the most important philosophical and theological questions facing us today the book asks Can Christian theology thrive in the modern scientific world

[Science and Religions in America](#) Greg Cootsona, 2022-12-30 What is religion What is science How do they interact with each other *Science and Religions in America* A New Look offers a cutting edge overview of the diverse range of religious traditions and their complex and fascinating interaction with science Pluralistic in scope the book is different from traditional Christian and or monotheistic approaches to studying the rich interplay of religion and science in multi religious American culture Featuring interviews with specialists in the field Greg Cootsona draws on their insights to provide a comprehensive accessible and engaging introduction to the challenging interrelationship of religion and science Each chapter focuses on a different religion within the United States covering Buddhism Christianity Nature Religions Islam Judaism Hinduism and the Spiritual but Not Religious SBNR Global religious traditions and their inextricable relationship with science and technology

are examined in an accessible and interactive format With lightning round Q As contributions from leading thinkers and suggestions for further reading this book primes undergraduate students for studying the interchange of science and religions in the plural and is an exciting new resource for those interested in these topics in contemporary America

Handbook for the Historiography of Science Mauro L. Condé, Marlon Salomon, 2023-09-30 This book aims to perform a critical and broad assessment of the historiography of science produced from the late nineteenth century to the early twenty first century It presents its main authors concepts ideas conceptions and schools It also analyzes the historical circumstances of the rise of the discipline history of science and the relations of the historiography of science with related areas These chapters do not understand the historiography of science as a mere description or record of the history of science Instead they understand the historiography of science from the epistemological criteria and choices that guided the writing of the history of science in its different contexts In other words more than describing the record of the various possibilities of historiographical approaches to science the chapters carry out an epistemological reflection to assess the bases possibilities scope and limits of different historiographical conceptions authors and traditions that have established the writing of the history of science This book can be conceived as a reference work not only for professional historians and philosophers but also for academics from different backgrounds who are initiating themselves in the universe of history and philosophy of science be they scientists from different fields or young researchers from different backgrounds who want to start studying the history and philosophy of science

Science & Religion John Ross Jr., 2016-12-19 Science and Religion Interpersonal Dialogue Discussion and Debate is a unique handbook for college students and adults interested in exploring the persuasive and rhetorical strategies surrounding today's fashionable topics in science and religion Offered in three accommodating sections John Ross presents valuable chapters on Humans Communication and Language the Importance and Meaning of Interpersonal Dialogue and a very timely chapter entitled Avenues of Dialogue Dissimilarity Discord and Alliance Part II explores captivating issues surrounding Faith the After Life Apologetics and Atheistic Scientism There is also an innovative section on the human brain higher intelligence and even on the questionable phenomena of neuroethology UFO cults and the disputable God Helmet The final chapters explore contemporary miracles creation accounts astrobiology and the current challenges surrounding SETI in its quest for extraterrestrial life Ross eloquently addresses the possibilities of alien life and the resulting consequences and challenges it brings for Biblicists in the world of Christian fundamentalism The book also includes a synopsis of the major world religions and a final section entitled Group Presentation Models in Science and Religion This handbook is unique in that it smartly combines principles of communication rhetoric and public speaking with contemporary issues in science theology and religion
