Kurz,Neri Salvadori,2022-03-09 Drawing in particular on the work of Sraffa Smith Ricardo and Marx the essays in this volume explore the characteristic features of the Classical economists approach to economic problems and the renewal of interest in that approach in modern times In recent years new material has been made available on both Sraffa and Marx which have made new insights and interpretations possible The release of Sraffa s hitherto unpublished papers and correspondence has led to reconsideration of doctrinal questions such as to what extent Sraffa built upon or deviated from the analyses of Adam Smith David Ricardo and other representatives of the classical British school and Karl Marx A major theme is also to what extent we can today equipped with Sraffa s insights and analytical tools re interpret and develop ideas of classical authors which they could present only in primitive forms on technological progress exhaustible resources and other contemporary issues On Marx the publication of the MEGA2 edition of the works papers and correspondence of Marx and Engels also gives rise to a reconsideration of this relationship given Marx s

disenchantment with some of his own work and return to ideas advocated by Ricardo especially as regards the long term tendency of the rate of profits Finally the classical notion of competition and monopoly deserve to be scrutinized carefully again and frequent misinterpretations in the literature refuted This volume is vital reading for scholars of classical economics Marx and Sraffa and the history of economic thought more broadly It also deals with issues in the areas of machinery and technical progress joint production and economic development and growth
