The Theory Of Revolution In The Young Marx Historical Materialism Book Series:

The Theory of Revolution in the Young Marx Michael Löwy, 2003 The central theoretical argument of this book is that Marx's philosophy of praxis first formulated in the Thesis on Feuerbach is at the same time the founding stone of a new world view and the methodological basis for his theory of proletarian revolutionary self emancipation **The Theory of**

Revolution in the Young Marx Michael Löwy, 2005 This book is brilliant incisive honest and deserves to be read with attention It is an important event in the Marxist theoretical production *Politique Hebdo* A remarkable essay whose merit is not only theoretical but also historical because it examines unknown aspects of the evolution of young Marx's thinking *Politics* In the 1840s the young German journalist Karl Marx developed ideas about modern society that remain as relevant today as when they were first developed Here Löwy shows the lasting force of Marx's early writings on alienation and emancipation Michael Löwy is research director in sociology at the Centre National de la Recherche Scientifique Paris He is the author of many books including *Romanticism Against the Tide of Modernity* *The Dialectical Self* Jamie Aroosi, 2018-11-09 Although Karl Marx and Søren Kierkegaard are both major figures in nineteenth century Western thought they are rarely considered in the same conversation Marx is the great radical economic theorist the prophet of communist revolution who famously claimed religion was the opiate of the masses Kierkegaard is the renowned defender of Christian piety a forerunner of existentialism and a critic of mass politics who challenged us to become the single individual But by drawing out important themes bequeathed them by their shared predecessor G W F Hegel Jamie Aroosi shows how they were engaged in parallel projects of making sense of the modern dialectical self as it realizes itself through a process of social economic political and religious emancipation In *The Dialectical Self* Aroosi illustrates that what is traditionally viewed as opposition is actually a complementary one sidedness born of the fact that Marx and Kierkegaard differently imagined the impediments to the self's appropriation of freedom Specifically Kierkegaard's concern with the psychological and spiritual nature of the self reflected his belief that the primary impediments to freedom reside in subjectivity such as in our willing conformity to social norms Conversely Marx's concern with the sociopolitical nature of the self reflected his belief that the primary impediments to freedom reside in the objective world such as in the exploitation of the economic system However according to Aroosi each thinker represents one half of a larger picture of freedom and selfhood because the subjective and objective impediments to freedom serve to reinforce one another By synthesizing the writing of these two diametrically opposed figures Aroosi demonstrates the importance of envisioning emancipation as a subjective psychological and spiritual process as well as an objective sociopolitical and economic one *The Dialectical Self* attests to the importance and continued relevance of Marx and Kierkegaard for the modern imagination **The German Revolution, 1917-1923** Pierre Broué, 2006 Broué enables us to feel that we are actually living through these epoch making events Do not miss this magnificent work Robert Brenner UCLA A magisterial definitive account of the upheavals in Germany in the wake of the Russian revolution Broué meticulously

reconstitutes six decisive years 1917-23 of social struggles in Germany The consequences of the defeat of the German revolution had profound consequences for the world Pierre Brou 1926-2005 was for many years Professor of Contemporary History at the Institut d'études politiques in Grenoble and was a world renowned specialist on the communist and international workers movements **Marx's Inferno** William Clare Roberts, 2018-03-13 Marx's Inferno reconstructs the major arguments of Karl Marx's Capital and inaugurates a completely new reading of a seminal classic Rather than simply a critique of classical political economy William Roberts argues that Capital was primarily a careful engagement with the motives and aims of the workers movement Understood in this light Capital emerges as a profound work of political theory Placing Marx against the background of nineteenth century socialism Roberts shows how Capital was ingeniously modeled on Dante's Inferno and how Marx playing the role of Virgil for the proletariat introduced partisans of workers emancipation to the secret depths of the modern social Hell In this manner Marx revised republican ideas of freedom in response to the rise of capitalism Combining research on Marx's interlocutors textual scholarship and forays into recent debates Roberts traces the continuities linking Marx's theory of capitalism to the tradition of republican political thought He immerses the reader in socialist debates about the nature of commerce the experience of labor the power of bosses and managers and the possibilities of political organization Roberts rescues those debates from the past and shows how they speak to ever renewed concerns about political life in today's world *Between Equal Rights* China Miéville, 2006 China Mieville's brilliantly original book is an indispensable guide for anyone concerned with international law It is the most comprehensive scholarly account available of the central theoretical debates about the foundations of international law It offers a guide for the lay reader into the central texts in the field Peter Gowan Professor International Relations London Metropolitan University Mieville critically examines existing theories of international law and offers a compelling alternative Marxist view China Mieville PhD International Relations London School of Economics is an independent researcher and an award winning novelist His novel Perdido Street Station won the Arthur C Clarke Award **The New Dialectic and Marx's Capital** Chris Arthur, 2003-12-05 This book both argues for and demonstrates a new turn to dialectic Marx's Capital was clearly influenced by Hegel's dialectical figures here case by case the significance of these is clarified More it is argued that instead of the dialectic of the rise and fall of social systems what is needed is a method of articulating the dialectical relations characterising a given social whole Marx learnt from Hegel the necessity for a systematic development and integration of categories for example the category of value can be fully comprehended only in the context of the totality of capitalist relations These studies thus shed new light on Marx's great work while going beyond it in many respects **Making History** Alex Callinicos, 2004-07-01 Making History is about the question central to social theory of how human agents draw their powers from the social structures they are involved in Drawing on classical Marxism analytical philosophy and a wide range of historical writing Alex Callinicos seeks to avoid two unacceptable extremes dissolving the subject into an impersonal

flux as poststructuralists tend to and treating social structures as the mere effects of individual action for example rational choice theory Among those discussed are Althusser Anderson Benjamin Brenner Cohen Elster Foucault Giddens Habermas and Mann Callinicos has written an extended introduction to this new edition that reviews developments since Making History was first published in 1987 This republication gives a new generation of readers access to an important intervention in Marxism and social theory *Marxism and Ecological Economics* Paul Burkett,2006-03-01 This book undertakes the first general assessment of ecological economics from a Marxist point of view and shows how Marxist political economy can make a substantial contribution to ecological economics The analysis is developed in terms of four basic issues 1 nature and economic value 2 the treatment of nature as capital 3 the significance of the entropy law for economic systems 4 the concept of sustainable development In each case it is shown that Marxism can help ecological economics fulfill its commitments to multi disciplinarity methodological pluralism and historical openness In this way a foundation is constructed for a substantive dialogue between Marxists and ecological economists *A Marxist Philosophy of Language* Jean-Jacques Lecercle,2006-08-01 The purpose of this book is to give a precise meaning to the formula English is the language of imperialism Understanding that statement involves a critique of the dominant views of language both in the field of linguistics the book has a chapter criticising Chomsky s research programme and of the philosophy of language the book has a chapter assessing Habermas s philosophy of communicative action The book aims at constructing a Marxist philosophy of language embodying a view of language as a social historical material and political phenomenon Since there has never been a strong tradition of thinking about language in Marxism the book provides an overview of the question of Marxism in language from Stalin s pamphlet to Voloshinov s book taking in an essay by Pasolini and it seeks to construct a number of concepts for a Marxist philosophy of language The book belongs to the tradition of Marxist critique of dominant ideologies It should be particularly useful to those who in the fields of language study literature and communication studies have decided that language is not merely an instrument of communication *Pavel V. Maksakovsky: The Capitalist Cycle* Richard Day,Pavel Maksakovsky,2004-04-01 The Capitalist Cycle is a translation of a previously unknown work in Marxist economic theory Originally published in 1928 this rediscovered work is one of the most creative essays written by a Soviet economist during the first two decades after the Russian Revolution Following the dialectic of Hegel and Marx Maksakovsky aims to provide a concluding chapter for Marx s Capital The book examines economic methodology and logically reconstructs Marx s analysis into a comprehensive and dynamic theory of cyclical economic crises The introductory essay by Richard B Day situates Maksakovsky s work within the Hegelian and Marxist philosophical traditions by emphasizing the book s dialectical logic as well as its contribution to economic science *The Clash of Globalisations* Ray Kiely,2005-03-01 This book provides a powerful critique of the case made for globalisation with particular emphasis placed on neo liberalism the third way and the hegemonic role of the US state It then examines the rise of anti globalisation politics and the debate over progressive

alternatives to actually existing globalisation **Althusser** Gregory Elliott, 2006-08-01 First published in 1987 Althusser *The Detour of Theory* was widely received as the fullest account of its subject to date Drawing on a wide range of hitherto untranslated material it examined the political and intellectual contexts of Althusser's return to Marx in the mid 1960s analysed the novel character of the Marxism developed in his major works charted their author's subsequent evolution from his self criticism to the proclamation of a crisis of Marxism and concluded with a balance sheet of Althusser's contribution to historical materialism For this second edition Gregory Elliott has added a substantial postscript in which he surveys the posthumous edition of the French philosopher's work published in the 1990s from the early writings of the 1940s through to the late texts of the 1980s relating the unknown Althusser revealed by them to the familiar figure of For Marx and Reading Capital together with a comprehensive bibliography of Althusser's oeuvre *Utopia Ltd.* Matthew Beaumont, 2005-03-01 This book uncovers the historical preconditions for the explosive revival of utopian literature at the nineteenth century fin de siècle and excavates its ideological content It marks a contribution not only to the literary and cultural history of the late Victorian period and to the expanding field of utopian studies but to the development of a Marxist critique of utopianism The book is particularly concerned with three kinds of political utopia or anti utopia those of state socialism feminism and anti communism the characteristic expression of this last example being the cacotopia After an extensive contextual account of the politics of utopia in late nineteenth century England it devotes a chapter to each of these topics before developing an original reinterpretation of William Morris's seminal Marxist utopia *News from Nowhere* **Globalisation** Tony Smith, 2005-12-01 Part One of this book examines the social state neoliberal catalytic state and democratic cosmopolitan models of globalisation Each necessarily tends to function in a manner contradicting essential claims made by its leading advocates This immanent contradiction provides a theoretical warrant for moving to a new position addressing the shortcomings of the previous framework The first three chapters of Part Two are devoted to a Marxian model of capitalist globalisation in which the irresolvable contradictions and social antagonisms of the capitalist global order are explicitly recognised The final chapter is devoted to a Marxian model of socialist globalisation in which those contradictions and antagonisms are overcome bringing the systematic dialectic of globalisation to a close **Following Marx** Michael Lebowitz, 2009-01-15 What does it mean to follow Marx In this examination of Marx's methodology combined with specific applications on topics in political economy such as neo Ricardian theory analytical Marxism the falling rate of profit crisis theory monopoly capital Paul Sweezy advertising and the capitalist state this volume argues that the failure to understand or explicit rejection of Marx's method has led astray many who consider themselves Marxists By focusing particularly upon the concept of a totality and the necessary form of appearance of capital as many capitals in competition Following Marx both demonstrates why Marx insisted that in competition everything is reversed and provides a guide for following Marx

Criticism of Religion Roland Boer, 2009 *Criticism of Religion* offers a spirited critical commentary on the engagements

with religion and theology by a range of leading Marxist philosophers and critics Lucien Goldman Fredric Jameson Rosa Luxemburg Karl Kautsky Julia Kristeva Alain Badiou Giorgio Agamben Georg Lukacs and Raymond Williams Apart from offering sustained critique the aim is to gather key insights from these critics in order to develop a comprehensive theory of religion The book follows on the heels of the acclaimed *Criticism of Heaven* being the second volume of a five volume series called *Criticism of Heaven and Earth* Marxist-Feminist Theories and Struggles Today Khayaat Fakier, Diana Mulinari, Nora Räthzel, 2020-02-15 This vital new collection presents new Marxist Feminist analyses of Capitalism as a gendered racialized social formation that shapes and is shaped by specific nature labour relationships Leaving behind former overtly structuralist thinking Marxist Feminist Theories and Struggles Today interweaves strands of ecofeminism and intersectional analyses to develop an understanding of the relations of production and the production of nature through the interdependencies of gender class race and colonial relations With contributions and analyses from scholars and theorists in both the global North and South this volume offers a truly international lens that reveals the vitality of contemporary global Marxist Feminist thinking as well as its continued relevance to feminist struggles across the globe **The Gramscian Moment** Peter Thomas, 2009-07-31 Winner of the Premio internazionale Giuseppe Sormani 2011 awarded by the Fondazione Istituto Piemontese Antonio Gramsci in Turin for the best book article on Gramsci in the period between 2007 2011 internationally Antonio Gramsci's Prison Notebooks are today acknowledged as a classic of the human and social sciences in the twentieth century The influence of his thought in numerous fields of scholarship is only exceeded by the diverse interpretations and readings to which it has been subjected resulting in often contradictory images of Gramsci This book draws on the rich recent season of Gramscian philological studies in order to argue that the true significance of Gramsci's thought consists in its distinctive position in the development of the Marxist tradition Providing a detailed reconsideration of Gramsci's theory of the state and concept of philosophy The Gramscian moment argues for the urgent necessity of taking up the challenge of developing a philosophy of praxis as a vital element in the contemporary revitalisation of Marxism *Asian Journal of Social Science*, 2004
