The Cold War David Miller, 2024-06-04 A preeminent Cold War scholar writes insightfully of the historic effects of the military build up brought on by the Cold War and its effect on strategy Bringing together for the first time newly declassified information David Miller takes readers inside the arsenals of the superpowers describing how intercontinental ballistic missiles submarine based missiles strategic bombers and conventional weapons were employed by both sides as well as the ways in which they were at many points almost brought to bear His in depth analysis of how military strategy shaped history and his accounts of crises which could have turned the Cold War hot the suppression of the Budapest uprising in 1956 and the imposition of martial law in Poland in 1981 are particularly compelling Many books have been written about the politics in this turbulent period but none have so comprehensively examined the military strategy and tactics of this dangerous era Awesome in every sense The Evening Standard London

British Nuclear Mobilisation Since 1945 Jonathan Hogg, Kate Brown, 2021-05-18 This book explores aspects of the social and cultural history of nuclear Britain in the Cold War era 1945 1991 and contributes to a more multivalent exploration of the consequences of nuclear choices which are too often left unacknowledged by historians of post war Britain In the years after 1945 the British government mobilised money scientific knowledge people and military industrial capacity to create both an independent nuclear deterrent and the generation of electricity through nuclear reactors This expensive and vast technopolitical project mostly top secret and run by small sub committees within government was central to broader Cold War strategy and policy Recent attempts to map the resulting social and cultural history of these military industrial policy decisions suggest that nuclear mobilisation had far reaching consequences for British life The chapters in this book were originally published as a special issue of Contemporary British History

[A Short History of the Future](#) W. Warren Wagar, 1999-08 Narrated by a far future historian Peter Jensen leaves an account of the world from the 1990s to the opening of the 23rd century as a gift to his granddaughter A combination of fiction and scholarship this third edition of Wagar's speculative history of the future alternates between descriptions of world events and intimate glimpses of this historian's family into the first centuries of the new millennium

Between the Blocs Joseph Kruzel, Michael H. Haltzel, 1989 The major European neutrals Austria Finland Ireland Sweden and Switzerland are heirs to a venerable and adaptable tradition In the turmoil of the past two centuries many neutral states

have disappeared others have joined alliance systems and those that have remained or become neutral have often seen themselves as misunderstood even as their international positions have solidified. Neutrality is no longer an easily defined static legal concept but an evolving political practice. Between the Blocs published in 1990 features many of the pre eminent scholars and political figures who have crafted the shape and meaning of the modern policy of neutrality and nonalignment in contemporary Europe. With its wide ranging and non ideological analysis of the phenomenon of Europe's neutral analysis of the phenomenon of Europe's natural and non aligned states Between the Blocs promises to become a modern classic in the field.

Nuclear Fictions Michael Gardiner, 2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress. The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation. The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out. If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s. Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism. Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress.

bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick

Atomic Obsession John Mueller, 2012-04-26 John Mueller argues how our obsession with nuclear weapons is unsupported by history scientific fact or logic. Examining the entire atomic era Mueller boldly contends that nuclear weapons have had little impact on history

Rules of Chivalry for Nuclear War Albert W. Johnson, 2010-05 This book is meant to be a guide book for warriors of they are willing to think out of the box. It has some history some fiction some philosophy some discussion of theology some advice to young men about sex and a little bit of physics. The center of the book is a proposal for The Rules of Chivalry for Nuclear War. The ROCNWAR. See Chapter 9 if you want to go directly to the proposal. The thrust of the book is that the characteristics of Chivalry are urgently needed when we engage in war. A major premise is that fighting is one of the four F functions of life i.e. feeding fleeing fighting and reproduction and how we fight is more important than what we fight about. The proposed rules are designed to Be effective on promoting change. Lead to decreasing spirals of retaliation. Make the aggressor's sacrifice certain and limited and not dependent on the dice of war. Display the determination of the opponents. Permit the weak to attack the strong and the strong to attack the weak without recrimination. Promote the clarification and definition of issues. Promote reconciliation. Recognize that the defender has an inherent advantage. And make war a spectator sport. This book has its genesis in a supper

conversation many years ago at Vandenberg Air Force Base when Colonel Lee Battle Captain Bruce Pince and Captain Albert Johnson were preparing the launch of one of the early Discoverer Satellites Colonel Battle presented his ideas about the future of warfare which included the thought that future wars must incorporate decreasing spirals of retaliation Pince and Johnson were intrigued by this idea and talked about it later *Late Cold War Literature and Culture* Daniel

Cordle,2017-03-03 This book analyses the 1980s as a nuclear decade focusing on British and United States fiction Ranging across genres including literary fiction science fiction post apocalyptic fiction graphic novels children s and young adult literature thrillers and horror it shows how pressing nuclear issues were particularly the possibility of nuclear war and how deeply they penetrated the culture It is innovative for its discussion of a nuclear transatlantic placing British and American texts in dialogue with one another for its identification of a vibrant young adult fiction that resonates with more conventionally studied literatures of the period and for its analysis of a politics of vulnerability animating nuclear debates Placing nuclear literature in social and historical contexts it shows how novels and short stories responded not only to nuclear fears but also crystallised contemporary debates about issues of gender the environment society and the economy
