Alice Loxton,2023-03-02 A brilliant new history of Georgian Britain through the eyes of the artists who immortalised it by one of the UK s most exciting young historians Alice Loxton is the star of her generation the next big thing in history Dan Snow London 1772 a young artist called Thomas Rowlandson is making his way through the grimy backstreets of the capital on his way to begin his studies at the Royal Academy Schools Within a few years James Gillray and Isaac Cruikshank would join him in Piccadilly turning satire into an artform taking on the British establishment and forever changing the way we view power Set against a backdrop of royal madness political intrigue the birth of modern celebrity French revolution American independence and the Napoleonic Wars

UPROAR follows the satirists as they lampoon those in power from the Prince Regent to Georgiana Duchess of Devonshire Their prints and illustrations deconstruct the political and social landscape with surreal and razor sharp wit as the three men vie with each other to create the most iconic images of the day UPROAR fizzles with energy on every page Alice Loxton writes with verve and energy never failing to convince in her thesis that Gillray and his gang profoundly altered British humour setting the stage for everything from Gilbert and Sullivan to Private Eye and Spitting Image today This is a book that will cause readers to reappraise everything they think they know about genteel Georgian London and see it for what it was a time of UPROAR

Forging Modernity Martin Hutchinson,2023-03-30 The Industrial Revolution provided the greatest increase in living standards the world has ever known while propelling Britain to dominance on the global stage In *Forging Modernity* Martin Hutchinson looks at how and why Britain gained this prize ahead of its European competitors After comparing their endowments and political structures as far back as 1600 he then traces how Britain through better policies primarily from the political Tory party diverged from other European countries Hutchinson s Harvard MBA allows a unique perspective on the early industrial enterprises many successes resulted from marketing control systems and logistics rather than from production technology alone while on a national scale the scientific method and commercial competition were as important as physical infrastructure By 1830 through ever improving policies Britain had built a staggering industrial lead half a century ahead of its rivals Then the Tories lost power and policy changed forever In his conclusion Hutchinson shows how changes welcomed by conventional historians caused the decline of Industrial Britain Nevertheless the policies that drove growth ingenuity and rising living

standards are still available for those bold enough to adopt them
