The Transformation Of Europe's Armed Forces From The Rhine To Afghanistan:

The Transformation of Europe's Armed Forces Anthony King, 2011-01-13 As a result of new strategic threats Europe's land forces are currently undergoing a historic transformation which may reflect wider processes of European integration Europe's mass mainly conscript armies are being replaced by smaller more capable professionalised militaries concentrated into new operational headquarters and rapid reaction brigades able to plan command and execute global military interventions At the same time these headquarters and brigades are co operating with each other across national borders at a level which would have been inconceivable in the twentieth century As a result a transnational military network is appearing in Europe the forces in which are converging on common forms of military expertise This book is a groundbreaking study of the military dimensions of European integration which have been largely ignored until now It will appeal to scholars across the social sciences interested in the progress of the European project and the nature of the military today

The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018-06-20 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe's major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

Transforming Military Power since the Cold War Theo Farrell, Sten Rynning, Terry Terriff, 2013-10-17 An empirically rich account of how the West's main war fighting armies have transformed since the end of the Cold War

Organizational Cultures and the Management of Nuclear Technology Russell Kirk, 2017-07-05 Nuclear technology has been an organizing premise of the international system since 1945 Eight countries have officially acknowledged the possession of nuclear weapons Many countries have harnessed the atom for electricity generation and other civilian uses Roughly 440 commercial nuclear reactors operate in thirty countries providing 14 percent of the world's electricity Volatile oil prices and concerns about climate change have led newly emerging economies in Asia to express keen interest in using nuclear energy to meet growing energy demands Since the basic technological apparatus for both civilian and military nuclear programs is the same there are concerns about the potential spread of dual use technology The future stability of the international order depends on the responsible management of their nuclear assets by nuclear powers The relationship

between civilian authorities and the military takes on special significance in states with nuclear weapons or near weapon capability The constitutional balance of powers the delegation of authority during wartime and peace influences from public opinion and bureaucratic structures on the formulation of doctrine crisis management and communications with the international media and the general public are influenced by civil military relations and organizational culture This volume will be of broad interest to scholars of civil military relations political science and political sociology **NATO's European Allies** J. Matlary, M. Petersson, 2013-01-30 The question of burden sharing has always been important in NATO with an acute relevance today as the US will cut its defence budget over a ten year period and is no longer automatically willing to lead military operations This volume considers Europe's role in political force for the future exploring eight European case studies *Gender, Military Effectiveness, and Organizational Change* R. Egnell, P. Hojem, H. Berts, 2014-05-15 Through extensive analysis of the Swedish Armed Forces this study explores the possibilities and pitfalls of implementing of a gender perspective in military organizations and operations It established a number of important lessons for similar attempts in other countries and discusses the continued process of implementation in the Swedish military *The Military's Business* Mikkel Vedby Rasmussen, 2015-03-05 Over recent years Western armed forces have been costing more yet achieving less Mikkel Vedby Rasmussen draws on the ideas of business strategy to argue that Western militaries need to reform in order to become viable businesses which address relevant security issues within a realistic budget **The Routledge Research Companion to Security Outsourcing** Joakim Berndtsson, Christopher Kinsey, 2016-06-10 Conveniently structured into five sections The Routledge Research Companion to Outsourcing Security offers an overview of the different ways in which states have come to rely on private contractors to support interventions Part One puts into context the evolution of outsourcing in Western states that are actively involved in expeditionary operations as well as the rise of the commercial security sector in Afghanistan To explain the various theoretical frameworks that students can use to study security military outsourcing Part Two outlines the theories behind security outsourcing Part Three examines the law and ethics surrounding the outsourcing of security by focusing on how states might monitor contractor behaviour hold them to account and prosecute them where their behaviour warrants such action The drivers politics and consequences of outsourcing foreign policy are covered in Part Four which is divided into two sections section one is concerned with armed contractors providing the provision of private security with the main driver being a capability gap on the part of the military law enforcement agencies and section two looks at military contractors supporting military operations right back to antiquity less controversial politically and often technologically driven The final Part takes into consideration emerging perspectives exploring areas such as gender feminist methodology maritime security and the impact of private security on the military profession This book will be of much interest to students of military and security studies foreign policy and International Relations **UK Communication Strategies for Afghanistan, 2001-2014** Thomas W. Cawkwell, 2016-03-09 The war in Afghanistan came to an end in 2014

after nearly thirteen years of conflict Throughout that period British officials have described UK operations there in various conflicting and often contradictory ways as a counter terrorism mission a stabilisation mission and a counter narcotics mission respectively This book investigates how the war was sold to the British public and how Britain's transnational foreign and defence policy impacted on the unfolding of UK strategy in Afghanistan and the way it was communicated It argues that because the UK's foreign and defence policy is transnationally oriented meaning that it is foundationally aimed at maintaining alliance with the United States and the institutional coherence of NATO UK strategy is contingent upon collective security and crucially is fundamentally concerned with the means of policy maintaining alliances over the ends using alliances to effect change Explaining the inalienability of collective security systems to national security is no easy task however and when faced with the adversities of Afghanistan the UK state has since 2008 instead opted to describe the significance of Afghanistan in narrow nation centric counter terrorist concerns in order to maintain public support for collective security operations there whilst paradoxically framing the conflict in a manner that avoids talking about the transnational structure and purpose of the mission This kind of strategic communication is increasingly becoming a focus of the UK state as it faces a transnational dilemma of maintaining its collective security bonds whilst facing a public increasingly sceptical of liberal interventionism

Defence Industrial Cooperation in the European Union Daniel Fiott, 2019-03-28 This book provides an empirical understanding of how EU level defence industrial cooperation functions in practice Using the Liberal Intergovernmental theoretical model the book argues that while national economic preferences are an essential factor of government interests they only explain part of the dynamic that leads to the development of defence industrial policy at EU level Moving beyond a simple adumbration of economic preferences it shows how the EU's institutional framework and corpus of law are used by governments to reaffirm their position as the ultimate arbiter and promoter of national economic preferences in the defence industrial sector To this end the work asks why and how EU member state governments European defence firms and EU institutions developed EU level defence industrial policy between 2003 and 2009 The book also analyses significant policy developments including the establishment of a European Defence Agency and two EU Directives on equipment transfers and defence procurement This book will be of much interest to students of EU policy defence studies security studies and International Relations in general

Military Mission Formations and Hybrid Wars Thomas Vladimir Brønd, Uzi Ben-Shalom, Eyal Ben-Ari, 2020-10-25 This volume explores and develops new social scientific tools for the analysis and understanding of contemporary military missions in theatre Despite the advent of new types of armed conflict the social scientific study of militaries in action continues to focus on tools developed in the hey day of conventional wars These tools focus on such classic issues as cohesion and leadership communication and unit dynamics or discipline and motivation While these issues continue to be important most studies focus on organic units up to and including brigades By contrast this volume suggests the utility of concepts related to mission

formations as opposed to units or components to better capture the ongoing processual nature of the amalgamations and combinations that military involvement in conflicts necessitates. The study of these formations by the social sciences—sociology, social psychology, anthropology, political science, and organization science—requires the introduction of new analytical tools to the study of militaries in theatre. As such, this volume utilizes new approaches to social life, organizational dynamics, and to armed violence to understand the place of the armed forces in contemporary conflicts and the new tasks they are assigned. This book will be of much interest to students of military studies, sociology, security studies, and International Relations in general.

Heroism and the Changing Character of War S. Scheipers, 2014-04-01. Post heroism is often perceived as one of the main aspects of change in the character of war, a phenomenon prevalent in western societies. According to this view, demographic and cultural changes in the west have severely decreased the tolerance for casualties in war. This edited volume provides a critical examination of this idea.

Total Defence Forces in the Twenty-First Century Joakim Berndtsson, Irina Goldenberg, Stéfanie von Hlatky, 2023-12-15. Total defence as a concept combines and extends military and civil defence in a state of war or emergency: all social institutions mobilize to defend the state. Total defence forces, led by a diverse workforce of defence and security professionals, are critical to both national defence and international security goals. *Total Defence Forces in the Twenty-First Century* looks at the various groups that make up this workforce: members of the military's regular force, reservists, defence civil servants, and contractors working for private military and security companies. When civilian staff and military personnel work towards a common goal, their distinct professional cultures and identities can make integration challenging. Despite the often high levels of partnership underlying differences, they affect the quality of the collaboration and ultimately organizational and operational effectiveness. Defence ministries around the world are increasingly recognizing the importance of optimizing the ways in which they employ and integrate civilian and military personnel. This volume focuses on a critical question: what are the main challenges to workforce integration and collaboration, and how can such challenges be overcome to deliver the full potential of the total defence force? Together, scholars and practitioners provide some answers.

Using the general theories of political science to understand how the EU works, this text covers each of the main processes in the EU political system: executive, legislative, and judicial politics; public opinion; interest groups; and democracy and regulatory, monetary, and foreign policies. It introduces the key political science tools, reviews the relevant theories, and applies the

knowledge in detailed descriptive analysis As well as incorporating new data and the latest research this new edition examines the consequences of the dramatic political and policy developments in the EU over the past decade The methodology used in the text makes the political system of the EU accessible to political science students as a whole as well as those specifically studying and researching the EU

The EU, Strategy and Security Policy Laura Chappell, Jocelyn Mawdsley, Petar Petrov, 2016-05-26 This edited collection is a timely and in depth analysis of the EU's efforts to bring coherency and strategy to its security policy actions Despite a special European Council summit in December 2013 on defence it is generally acknowledged that fifteen years since its inception the EU's Common Security and Defence Policy CSDP has yet to acquire a clear sense of purpose This book investigates those areas where the EU has established actorness in the security and defence field and asks whether they might constitute the elements of an emergent more coherent EU strategy on security Taking a critical view the contributors map the EU's strategic vision's across particular key regions where the EU has been active as a security actor the strategic challenges that it has pinpointed alongside the opportunities and barriers posed by a multiplicity of actors interests and priorities identified by both member states and EU actors By doing this we demonstrate where gaps in strategic thinking lie where the EU has been unable to achieve its aims and offer recommendations concerning the EU's future strategic direction This book will be of much interest to students of European security EU policy strategic studies and IR in general

The SAGE Handbook of Political Sociology, 2v William Outhwaite, Stephen Turner, 2017-10-30 The SAGE Handbook of Political Sociology offers a comprehensive and contemporary look at this evolving field of study The focus is on political life itself and the chapters written by a highly respected and international team of authors cover the core themes which need to be understood in order to study political life from a sociological perspective or simply to understand the political world The two volumes are structured around five key areas PART 1 TRADITIONS AND PERSPECTIVES PART 2 CORE CONCEPTS PART 03 POLITICAL IDEOLOGIES AND MOVEMENTS PART 04 TOPICS PART 05 WORLD REGIONS This future oriented and cross disciplinary handbook is a landmark text for students and scholars interested in the social investigation of politics

to encourage the exchange of knowledge between the academic field and the military arena This book will be of much interest to students of military studies research methods sociology social anthropology and security studies in general
