The Ugly Laws Disability In Public The History Of Disability:

The Ugly Laws Susan M. Schweik, 2009 In the culture of the modern West we see ourselves as thinking subjects defined by our conscious thought autonomous and separate from each other and the world we survey Current research in neurology and cognitive science shows that this picture is false We think with our bodies and in interaction with others and our thought is never completed The Fiction of a Thinkable World is a wide ranging exploration of the meaning of this insight for our understanding of history ethics and politics Ambitious but never overwhelming carrying its immense learning lightly The Fiction of a Thinkable World shows how the Western conception of the human subject came to be formed historically how it contrasts with that of Eastern thought and how it provides the basic justification for the institutions of liberal capitalism The fiction of a world separated from each of us as we are separated from each other from which we make our choices in solitary thought is enacted by the voter in the voting booth and the consumer at the supermarket shelf The structure of daily experience in capitalist society reinforces the fictions of the Western intellectual tradition stunt human creativity and create the illusion that the capitalist order is natural and unsurpassable Steinberg's critique of the intellectual world of Western capitalism at the same time illuminates the paths that have been closed off in that world It draws on Chinese ethics to show how our actions can be brought in accord with the world as it is in its ever changing interaction and mutual transformation and sketches a radical political perspective that sheds the illusions of the Western model Beautifully conceived and written The Fiction of a Thinkable World provides new ways of thinking and opens new horizons

The Idea of Disability in the Eighteenth Century Chris Mounsey, 2014-03-21 The Idea of Disability in the Eighteenth Century explores disabled people who lived in the eighteenth century The first four essays consider philosophical writing dating between 1663 and 1788 when the understanding of disability altered dramatically We begin with Margaret Cavendish whose natural philosophy rejected ideas of superiority or inferiority between individuals based upon physical or mental difference We then move to John Locke the founder of empiricism in 1680 who believed that the basis of knowledge was observability but who faced with the lack of anything to observe broke his own epistemological rules in his explanation of mental illness

Understanding the problems that empiricism set up Anthony Ashley Cooper Lord Shaftesbury turned in 1711 to moral philosophy but also founded his philosophy on a flaw He believed in the harmony of the aesthetic trinity of beauty truth and virtue but he could not believe that a disabled friend whom he knew to have been moral before his physical alteration could change inside Lastly we explore Thomas Reid who in 1788 returned to the body as the ground of philosophical enquiry and saw the body as a whole complete in itself and wanting nothing be it missing a sense Reid was deaf or a physical or mental capacity At the heart of the study of any historical artifact is the question of where to look for evidence and when looking for evidence of disability we have largely to rely upon texts However texts come in many forms and the next two essays explore three types the novel the periodical and the pamphlet which pour out their ideas of disability in different ways Evidence of disabled people in the eighteenth century is sparse and the lives the more evanescent The last four essays bring to light little known disabled people or people who are little known for their disability giving various forms of biographical accounts of Susanna Harrison Sarah Scott Priscilla Poynton and Thomas Gills who are all but forgotten in the academic world as well as to public consciousness

Pennhurst and the Struggle for Disability Rights Dennis B. Downey, James W. Conroy, 2020-04-13 Conceived in the era of eugenics as a solution to what was termed the problem of the feeble minded state operated institutions subjected people with intellectual and developmental disabilities to a life of compulsory incarceration One of nearly 300 such facilities in the United States Pennhurst State School and Hospital was initially hailed as a model institution but was later revealed to be a nightmare where medical experimentation and physical and psychological abuse were rampant At its peak more than 3 500 residents were confined at Pennhurst supervised by a staff of fewer than 600 Using a blended narrative of essays and first person accounts this history of Pennhurst examines the institution from its founding during an age of Progressive reform to its present day exploitation as a controversial Halloween attraction In doing so it traces a decades long battle to reform the abhorrent school and hospital and reveals its role as a catalyst for the disability rights movement Beginning in the 1950s parent advocates social workers and attorneys joined forces to challenge the dehumanizing conditions at Pennhurst Their groundbreaking advocacy accelerated in 1968 by the explosive televised expos Suffer the Little Children laid the foundation for lawsuits that transformed American jurisprudence and ended mass institutionalization in the United States As a result Pennhurst became a symbolic force in the disability civil rights movement in America and around the world Extensively researched and featuring the stories of survivors parents and advocates this compelling history will appeal both to those with connections to Pennhurst and to anyone interested in the history of institutionalization and the disability rights movement

All Our Families Jennifer Natalya Fink, 2022-03-22 A provocation to reclaim our disability lineage in order to profoundly reimagine the possibilities for our relationship to disability kinship and carework Disability is often described as a tragedy a

crisis or an aberration though 1 in 5 people worldwide have a disability Why is this common human experience rendered exceptional In *All Our Families* disability studies scholar Jennifer Natalya Fink argues that this originates in our families When we cut a disabled member out of the family story disability remains a trauma as opposed to a shared and ordinary experience This makes disability and its diagnosis traumatic and exceptional Weaving together stories of members of her own family with sociohistorical research Fink illustrates how the eradication of disabled people from family narratives is rooted in racist misogynistic and antisemitic sorting systems inherited from Nazis By examining the rhetoric of genetic testing she shows that a fear of disability begins before a child is even born and that a fear of disability is fundamentally a fear of care Fink analyzes our racist and sexist care systems exposing their inequities as a source of stigmatizing ableism Inspired by queer and critical race theory Fink calls for a lineage of disability a reclamation of disability as a history a culture and an identity Such a lineage offers a means of seeing disability in the context of a collective sense of belonging as cause for celebration and is a call for a radical reimagining of carework and kinship *All Our Families* challenges us to re lineate disability within the family as a means of repair toward a more inclusive and flexible structure of care and community

Psychosocial Aspects of Disability Irmo Marini, Noreen M. Graf, Michael Millington, 2011-07-27 What a marvelous and amazing textbook Drs Marini Glover Graf and Millington have done a remarkable job in the design of this highly unique book that comprehensively and very thoughtfully addresses the psychosocial aspects of the disability experience These highly respected scholars have produced a major work that will be a central text in rehabilitation education for years to come From the Foreword by Michael J Leahy Ph D LPC CRC Office of Rehabilitation and Disability Studies Michigan State University This is an excellent book but the best parts are the stories of the disabled which give readers insights into their struggles and triumphs Score 94 4 Stars Doody's Medical Reviews What are the differences between individuals with disabilities who flourish as opposed to those who never really adjust after a trauma How are those born with a disability different from individuals who acquire one later in life This is the first textbook about the psychosocial aspects of disability to provide students and practitioners of rehabilitation counseling with vivid insight into the experience of living with a disability It features the first person narratives of 16 people living with a variety of disabling conditions which are integrated with sociological and societal perspectives toward disability and strategies for counseling persons with disabilities Using a minority model perspective to address disability the book focuses on historical perspectives cultural variants regarding disability myths and misconceptions the attitudes of special interest and occupational groups the psychology of disability with a focus on positive psychology and adjustments to disability by the individual and family A wealth of counseling guidelines and useful strategies are geared specifically to individual disabilities Key Features Contains narratives of people living with blindness hearing impairments spinal cord injuries muscular dystrophy polio mental illness and other disabilities Provides counseling guidelines and strategies specifically geared toward specific disabilities including dos and don'ts Includes

The Feminist Political Campaign for Eugenic Legislation in New Jersey, 1910-1942 Alan R. Rushton, 2023-01-12 As this book shows between 1910 and 1942 social feminists in New Jersey waged an unsuccessful campaign for legislation that would permit eugenic sterilization of feebleminded and other undesirable citizens

Church archives and religious periodicals described the conflict between Catholic and Protestant citizens regarding this issue. Reform minded women persisted in their quest for such progressive state legislation despite repeated failures. Their number of potential voters was very small compared to the organized bloc of Catholic citizens who viewed such legislation as immoral and based on bad science and threatened to unseat any legislator who supported such a notion. This insightful text highlights that public officials would only enact such laws when they were convinced that many citizens supported a particular eugenic goal and then would vote for legislators who satisfied this moral challenge. Public opinion was unprepared for such radical legislation in New Jersey and legislators learned that to even consider a eugenic sterilization notion would be political suicide.

Literature and Disability Alice Hall, 2015-08-11. *Literature and Disability* introduces readers to the field of disability studies and the ways in which a focus on issues of impairment and the representation of disability can provide new approaches to reading and writing about literary texts. Disability plays a central role in much of the most celebrated literature yet it is only in recent years that literary criticism has begun to consider the aesthetic, ethical, and literary challenges that this poses. The author explores key debates and issues in disability studies today, different forms of impairment with the aim of showing the diversity and ambiguity of the term disability, the intersection between literary critical approaches to disability and feminist, post colonial, and autobiographical writing, genre, and representations of disability in relation to literary forms including novels, short stories, poems, plays, and life writing. This volume provides students and academics with an accessible overview of literary critical approaches to disability representation.
