MacIntyre, 2004-02-13 The Unconscious A. C. MacIntyre, 1973 **The Unconscious** Robert Conquest, 1958 **The Unconscious** Alasdair Chalmers MacIntyre, 2004-02-24 This edition includes a substantial new preface by the author in which he discusses repression determinism transference and practical rationality and offers a comparison of Aristotle and Lacan on the concept of desire MacIntyre takes the opportunity to reflect both on the reviews and criticisms of the first edition and also on his own philosophical stance **The Analysis of Ideology** Raymond Boudon, 1989 This work by one of

Europe's foremost social theorists presents a critical history of the concept of ideology The author's discussion ranges from the early conceptions of ideology to its current usage in the works of Barthes Foucault Habermas and others **A**

Conceptual and Therapeutic Analysis of Fear Sergio Starkstein, 2018-04-17 There is an important gap in the philosophical literature concerning the concept of fear and its remedies and this book has been designed to examine different concepts of fear that inform its therapy Structured as a historical philosophical investigation of the concept of fear this book is not a purely historical analysis of fear but also provides a broad brushwork rendition of the main concepts of fear as presented by selected philosophers and thinkers and how they have approached its therapy *Phenomenology, Language and the Social Sciences* Maurice Roche, 2013-10-23 This book looks at two revolutions in philosophy phenomenology and conceptual analysis which have been influential in sociology and psychology It discusses humanistic psychiatry and sociological approaches to the specific area of mental illness which counter the ultimately reductionist implications of Freudian psychoanalytic theory The book originally published in 1973 concludes by stating the broad underlying themes of the two forms of humanistic philosophy and indicating how they relate to the problems of theory and method in sociology

Buddhist and Freudian Psychology Padmasiri De Silva, 1992 The work presents in clear focus comparative perspectives on the nature of Man Mind Motivation Conflict Anxiety and Suffering as well as the therapeutic management of these problems in both the writings of Sigmund Freud and the discourses of the Buddha The nature of the instinct of sexuality ego instinct and the death instinct in Freud are compared to parallel concepts in Buddhism An interesting addition to the study is the discussion of the question whether Schopenhauer is a link between Freud and Buddhism This third edition of the book also throws new light on some of the dilemmas of Freudian psychology from a Buddhist perspective It is a valuable contribution to the study of philosophy in cross cultural perspective and should be of interest to both scholars and general readers *A Wittgensteinian Perspective on the Use of Conceptual Analysis in Psychology* T. Racine, K.

Slaney,2013-10-15 This edited volume includes contributions from internationally renowned experts in the philosophy of Ludwig Wittgenstein It applies his later philosophy to concrete issues pertaining to the integrity of scientific claims in a broad spectrum of research domains within contemporary psychology **Virginia Woolf and the Migrations of**

Language Emily Dalgarno,2011-10-06 Virginia Woolf s rich and imaginative use of language was partly a result of her keen interest in foreign literatures and languages mainly Greek and French but also Russian German and Italian As a translator she naturally addressed herself both to contemporary standards of translation within the university but also to readers like herself In Three Guineas she ranged herself among German scholars who used Antigone to critique European politics of the 1930s Orlando outwits the censors with a strategy that focuses on Proust s untranslatable word The Waves and The Years show her looking ahead to the problems of postcolonial society where translation crosses borders In this in depth study of Woolf and European languages and literatures Emily Dalgarno opens up a rewarding new way of reading her prose The

Fractured Self in Freud and German Philosophy M. Altman,C. Coe,2013-02-27 The Fractured Self in Freud and German Philosophy examines Freud s transformation of German philosophical approaches to freedom history and self knowledge defends a theory of situated knowledge and agency and considers the relevance of Freudian thought for contemporary cultural issues **Sinologism** Ming Dong Gu,2013 Why for centuries have the West and the world continuously produced China knowledge that deviates from Chinese realities Why since the mid nineteenth century have Chinese intellectuals oscillated between commendation and condemnation of their own culture and between fetishization and demonization of all things Western And why have some of the world s wisest thinkers expressed opinions on Chinese culture which are simply wrong In order to answer these questions this book explores the process of knowledge production about China and the Chinese civilization and in turn provides a critique of the ways in which this knowledge is formed Ming Dong Gu argues that the misperceptions and misinterpretations surrounding China and the Chinese civilisation do not simply come from misinformation biases prejudices or political interference but follow certain taken for granted principles that have evolved into a cultural unconscious Indeed Gu argues that the conflicting accounts in China West studies are the inevitable outcome of this cultural unconscious which constitutes the inner logic of a comprehensive knowledge system which he terms Sinologism This book explores Sinologism s origin development characteristics and inner logic and critiques its manifestations in the writings of Chinese Western and non Western thinkers and scholars including Montesquieu Herder Hegel Marx Weber Russell Pound Wang Guowei Guo Moruo Gu Jiegang Wen Yiduo and many others in diverse disciplines from arts and humanities to social sciences In doing so Gu demonstrates why the existing critical models are inadequate for Chinese materials and makes an attempt to construct an alternative theory to Orientalism and postcolonialism for China West studies and cross cultural studies Sinologismcrosses over the subjects of history thought literature language art archaeology religion aesthetics and cultural theory and will appeal to students and scholars of East West studies with a particular focus

on China as well as those interested in cultural theory more broadly

Metapsychology and the Foundations of Psychoanalysis Simon Boag, 2016-11-10 Metapsychology and the Foundations of Psychoanalysis redresses faults in Freud's original conception to develop a coherent theoretical basis for psychodynamic theory Simon Boag demonstrates that Freud's much maligned metapsychology once revised can provide a foundation for evaluating and integrating the plethora of psychodynamic perspectives by developing a philosophically informed position that addresses the embodied interconnected relationship between motivation cognition and affects The book centres upon the major concepts in psychoanalysis including the notion of unconscious mental processes wish fulfilment fantasy and repression Both philosophical considerations and empirical evidence are brought to bear upon these topics and used to extract the valuable insights from major approaches As a result Boag's revised general psychology which stays true to Freud's intention addresses psychoanalytic pluralism and shows it is possible to develop a unified account integrating the insights from attachment theory and object relational approaches and acknowledging the rightful role for neuropsychoanalysis Metapsychology and the Foundations of Psychoanalysis will be of interest to psychoanalysts psychiatrists philosophers of mind and psychologists as well as anyone concerned with neuropsychoanalysis or psychoanalysis and attachment theory

Psychoanalysis and the Concept of a Rule Anton Mooij, 2012-12-06 Increasingly people are becoming aware of the importance of rules with regard to the establishment of human behaviour The present day philosophy of action following Wittgenstein talks of rule following behaviour This book takes up the discussion and indicates the importance of rules in Freudian psychoanalysis In so doing the book establishes a link between Freud and Wittgenstein

The Analysis of Virtue in Alasdair MacIntyre and His View of "The Enlightenment Project" Benjamin Okon MSP, 2016-04-15 MacIntyre is greatly discontented with the nature of contemporary morality which according to him has a form i.e. what appears like morality but lacks essential content He argues that the most common feature of contemporary ethical discourse is that much of it is used to express individual preferences which leads to disagreements among philosophers and eventually results in debates that are interminable in character MacIntyre attributes the cause of this situation to the activities of the enlightenment philosophers of the 17th and 18th centuries who in an attempt to find rational justification for morality repudiated those essential elements that define the essence of morality and give it its contents Such elements include historical narrative tradition teleology and divine law In MacIntyre's opinion morality so constructed was destined for failure since it was not founded on the true nature of the human person The obvious consequences of this failure were the birth of diverse post enlightenment ethical theories and a substantial change in the conception of virtue In order to remedy this deplorable condition of contemporary ethics MacIntyre along with other virtue ethicists advocates a certain renaissance of ethical principles that are founded on the true nature of the human person characterized by historical narrative tradition and teleology all grounded on divine legislation Morality thus reconstructed finds its fullest expression in the theory of human character traits i.e. virtues This is what has motivated

MacIntyre's construction of virtue theory which has brought him into confrontation with the enlightenment philosophers. Our study and analysis of MacIntyre's theory of virtue reveals that his account of virtue is inadequate. This inadequacy is what has motivated our own project of reconstructing MacIntyre's theory of virtue in view of offering an account of virtue that is adequate. In this way, our own project complements that of MacIntyre.

Wittgenstein and Artificial Intelligence, Volume I Alice C. Helliwell, Alessandro Rossi, Brian Ball, 2024-09-10. This collection brings together work on the relevance of Wittgenstein's philosophy to the field of Artificial Intelligence (AI). Over two volumes, our contributors cover a wide range of topics from different disciplinary approaches. In this Volume I, contributions are centred on two major themes in the philosophy of AI: questions of mind and language. Contributions include chapters on AI, thought, intentionality, logic, and language, as well as the relationship between Wittgenstein's thought and Turing's.

On Folkways and Mores Philip D. Manning, 2017-07-05. William Graham Sumner is remembered primarily as an opponent of government intervention in social and economic issues. Focusing on *Folkways* (1906), this book examines Sumner's fundamental work as a comparative ethnographer with an appreciation for the rules and rituals that regulate everyday behavior. In *Folkways*, Sumner developed classifications and an array of sociological concepts that continue to influence the discipline today. This new book presents key excerpts from *Folkways* as well as three of Sumner's other classic essays. It also includes five original essays by contemporary authorities that explain and explore Sumner's importance and influence. By linking Sumner's work to contemporary research about social control, the sociology of law, and sociological theory, these new essays confirm his status as a foundational thinker in the field. Sumner offers an elegant conceptual schema with which to analyze the moral codes of in and out groups. His extensive use of comparative anthropological data demonstrates a qualitative methodology that can easily be applied to the analysis of contemporary American society. This volume includes contributions by Jonathan B. Imber, Howard G. Schneiderman, and A. Javier Trevino.

Freud Evaluated - The Completed Arc M. Macmillan, 1990-12-14. This volume is an historically based critical evaluation of Freud's personality theory. In it, the observations Freud made are described, and the theoretical ideas he put forward for explaining them are set out. The adequacy of Freud's explanations are judged against the logical and scientific standards of Freud's own time. The historical perspective will give the reader a sound basis on which to make a judgement about psychoanalysis as a method of investigation and a theory of personality, as well as a sense of what Freud was about from Freud's own standpoint. Freud's endeavour is sited in the psychological and psychiatric context of the time, a period not previously given the critical attention it warrants. All of Freud's important assumptions and characteristic modes of thought are to be found in this formative period. The placement also brings out more clearly the basis of a number of the unresolved problems of contemporary psychoanalytic theory, such as the place of affect and the instinctual drives, the role of the ego, and the basis of treatment. The core of the evaluation centres on Freud's basic method for gathering data: free association, a method which is not much written about and hardly ever criticised. What is said about it

is new and more substantial than the few criticisms that have been made Although a very critical work there is probably no other appraisal which allows Freud and his colleagues and followers to speak so directly for themselves
