one that is free and egalitarian Enlightenment and Ecology is an international collection of commemorative essays by scholars and activists who have each incorporated the ideas of social ecology into their own work This book also examines how the Kurdish freedom movement is using the Bookchin s utopian ideas In a time of urgent need for radical change these essays provide both precious historical lessons and a transformative road map **Democratic by Design** Gabriel Metcalf,2015-11-17 Americans have since our founding participated in a variety of alternative institutions self organized projects that work outside the traditional structures of government and business to change society From the town meetings that still serve as our ideal of self governance to the sustainable food movement that is changing the way we think about farming the land and feeding our families these secondary structures have given rise to many of our most exciting and important innovations Yet most people still know little about them even as their numbers and their influence increase In today s climate of widespread economic inequity political gridlock and daunting environmental challenges we sorely need a fresh approach to social and political change In Democratic by Design Gabriel Metcalf sketches out a strategy that starts with small scale living examples of a better society that can ultimately scale up to widespread social transformation Using examples like car sharing organizations community land trusts credit unions workers co ops citizen juries community supported agriculture farms mission driven corporations and others Democratic by Design shows how alternative institutions can be the crucial spark for a broad new progressive movement **The War on Terrorism and the Terror of God** Lee Griffith,2004 Uniquely relevant in a world shaken by recent acts of terror this title calls people of faith to the way of peace the Christian response to evil and violence **A Materialist Theory of Justice** George Sotiropoulos,2019-03-13 A Materialist Theory of Justice offers an innovative re reading of justice that draws from diverse theoretical currents tracing in the process an age old tradition of critical thought Raising the banner of materialism against idealist conceptions justice is conceived as a multiple process which emerges in the dynamic reproduction and interaction of material bodies Mapping out its presence on non human fields justice is then shown to attain in human beings the status of a contentious problem and a productive desire which is related to the pursuit of a good life and is also determinative of human history The theorization enlarges the scope of the notion by incorporating a wide spectrum of phenomena from animal forms of sociality and activity to revolution empire civil war up to and including the riots that spread out in the world today In this way the book also manages to extend beyond the disciplinary boundaries of normative political theory within which theories of justice are usually logged and enter a productive discussion with various currents of critical thought **Black flags and social movements** Dana M. Williams,2017-11-17 Anarchism may be the most misunderstood political ideology of the modern era and one of the least studied social movements by English speaking scholars Black flags and social movements addresses this deficit with an in depth analysis of contemporary anarchist movements as interpreted by social movement theories and political sociology Using unique data gathered by anarchists themselves Williams presents longitudinal and international

analyses that focus upon who anarchists are and where they may be found Social movement ideas including political opportunity new social movements and social capital theory are relevant and adaptable to understanding anarchist movements Due to their sometimes limited numbers and identities as radical anti authoritarians anarchists often find themselves collaborating with numerous other social movements bringing along their values ideas and tactics *Sharing Power* Grazia Borrini-Feyerabend, Michel Pimbert, M. Taghi Farvar, Ashish Kothari, Yves Renard with Hanna Jaireth, Marshall Murphree, Vicki Pattemore, Ricardo Ramírez, Patrizio Warren, 2013-09-13 The collaborative orco management of natural resources whether between states and local communities or amongst and within communities themselves is a process of collective understanding and actions to bring about negotiated agreements on roles rights and responsibilities for decentralized governance of natural resources At heart co management is about sharing power one of the most difficult but rewarding experiences in personal and social life The book is designed for professionals and people involved in practical co management processes and distils a wealth of experience and innovative approaches learned by doing It begins by offering a variety of vistas from historical analyses to a clear grasp of key concepts Illustrated in detail is the understanding accumulated in recent decades on starting points for co management conditions and methods for successful negotiations ideas to manage conflicts and types of agreements and co management institutions emerging from the negotiation tables Simple tools such as checklists distilled from different situations and contexts are offered throughout Examples and insights from experience highlight the importance of participatory democracy the enabling contexts where sharing power is ultimately possible and successful Published with IIED and IUCN *Writing the Revolution* Raphael Hörmann, 2011 This study investigates German and English revolutionary literary discourse between 1819 and 1848 49 Marked by dramatic socioeconomic transformations this period witnessed a pronounced transnational shift from the concept of political revolution to one of social revolution Writing the Revolution engages with literary authors radical journalists early proletarian pamphleteers and political theorists tracing their demands for social liberation as well as their struggles with the specter of proletarian revolution The book argues that these ideological battles translated into competing poetics of revolution Series Kulturgeschichtliche Perspektiven Vol 10 **End of the Megamachine** Fabian Scheidler, 2020-09-25 A must read for everyone rising against the system that is destroying life on earth and our future Vandana Shiva World Future Council The End of the Megamachine provides a uniquely comprehensive picture of the roots of the destructive forces that are threatening the future of humankind today Spanning 5000 years of history the book shows how the three tyrannies of militarized states capital accumulation and ideological power have been steering both ecosystems and societies to the brink of collapse With the growing instability of the Megamachine in the 21st century new dangers open up as well as new possibilities for systemic change to which everyone can contribute *Climate Justice and the Economy* Stefan Gaarsmand Jacobsen, 2018-05-15 As climate change has increasingly become the main focus of environmentalist activism since the late

1990s the global economic drivers of CO2 emissions are now a major concern for radical greens In turn the emphasis on connected crises in both natural and social systems has attracted more activists to the Climate Justice movement and created a common cause between activists from the Global South and North In the absence of a pervasive narrative of transnational or socialist economic planning to prevent catastrophic climate change these activists have been eager to engage with advanced knowledge and ideas on political and economic structures that diminish risks and allow for new climate agency This book breaks new ground by investigating what kind of economy the Climate Justice movement is calling for us to build and how the struggle for economic change has unfolded so far Examining ecological debt just transition indigenous ecologies social ecology community economies and divestment among other topics the authors provide a critical assessment and a common ground for future debate on economic innovation via social mobilization Taking a transdisciplinary approach that synthesizes political economy history theory and ethnography this volume will be of great interest to students and scholars of climate justice environmental politics and policy environmental economics and sustainable development **Red Threads**
