Theandric and Triune Ty Kieser, 2024-01-25 Describing Jesus as an agent of divine actions or as one who possesses human agency is commonplace in christological discussions Yet these discussions often wade in a shallow understanding of the terms meanings and the theological implications of such claims For example while many theologians who are committed to the definition of Chalcedon consider Jesus one agent we might ask if this implies that the triune God comprises three agents Or if Christ possesses singular agency how are his divinity and humanity operative in his actions In response this work draws from the theology of John Owen and advancements in philosophy of action in order to offer an account of divine and human agency in christological action from within the Reformed tradition It provides clarity to the christological and trinitarian uses of the language of agent agency in Christ and attends to the theological esp trinitarian entailments therein While at first glance there may appear to be internal inconsistencies with accounts that subscribe to classical trinitarianism and Reformed Christological agency this book argues that Owen helps us recover an understanding of christological agency that is internally coherent and theologically prudent As such the Reformed tradition can articulate Christological agency in a way that is coherent with the testimony of Scripture the ecumenical councils and classical trinitarianism while contributing to contemporary theological discussions The case not only provides terminological clarity and theological coherence but also inclines Christians to appreciate the trinitarian love of God in Christ's action and the human sympathy of Christ for his people

Philosophical Theology and East-West Dialogue Hisakazu Inagaki, J. Nelson Jennings, 2021-10-25 Philosophical Theology and East West Dialogue is a unique philosophical and theological analysis of certain key interactions between Eastern and Western thinkers The book on the one hand contrasts general traits of Eastern

Buddhist thought and Western Greek thought However in doing so it focuses on influential philosophers and theologians who manifest particular instances of wider issues The result is a careful examination of basic questions that offers both broad implications and concrete specificity in its approach The book itself is an instance of East West dialogue Independently of each other both authors had previously engaged in serious cross cultural studies The Japanese Inagaki had researched Western science and philosophy then written in Japanese comparative studies of Japanese thought The North American Jennings had researched Japanese theology They brought these backgrounds together dialoguing with each other until the present study emerged Several creative Japanese thinkers as well as important Westerners are taken up The study follows the lead of many Eastern impulses but it also critically utilizes Western methods Contemporary thinking on religious plurality is carefully examined This new study is a must for those interested in philosophy and theology in general and East West interaction in particular

Developmental Theism Peter Forrest,2007-01-18 This is a work of speculative theology based on three themes that a version of materialism is a help not a hindrance in philosophical theology that God develops and that this development is on the whole kenotic in other words an abandonment of power Peter Forrest argues that the resulting kenotic theism might well be correct He claims that his hypothesis concerning God is better than known rival hypotheses including atheism and that if there is no unknown better hypothesis it is good enough to be believed In the Introduction he offers a defense of the type of metaphysical speculation on which his thesis rests Elsewhere in the book he defends his moderate materialism expounds the notion of the Primordial God and discusses how God changes In the resulting account Forrest reconciles the unloving and unlovable God of the philosophers with the God of the Abrahamic tradition In a quasi Gnostic fashion he puts the blame for evils on the Primordial God and argues that after God has become loving the divine powers of intervention are limited by the natural order In the final two chapters he applies this kenotic theism to specifically Christian teachings notably the Trinity
