The Turning Point Science Society And The Rising Culture:

The Turning Point Fritjof Capra,1983 We are trying to apply the concepts of an outdated world view the mechanistic world view of Cartesian Newtonian science to a reality that can no longer be understood in terms of these concepts To describe this world appropriately we need an ecological perspective that the Cartesian world view does not offer Preface 15

16 **The Turning Point** Fritjof Capra,1982 **Indigenous Knowledge and the Integration of Knowledge Systems**

Catherine Alum Odora Hoppers,2002 This book explores the role of the social and natural sciences in supporting the development of indigenous knowledge systems It looks at how indigenous knowledge systems can impact on the transformation of knowledge generating institutions such as scientific and higher education institutions on the one hand and the policy domain on the other

The Top 50 Sustainability Books Wayne Visser,2017-09-08 This unique title draws together in one volume some of the best thinking to date on the pressing social and environmental challenges we face as a society These are the Top 50 Sustainability Books as voted for by the University of Cambridge Programme for Sustainability Leadership s alumni network of over 3 000 senior leaders from around the world In addition to profiles of all 50 titles many of the authors share their most recent reflections on the state of the world and the ongoing attempts by business government and civil society to create a more sustainable future Many of these authors have become household names in the environmental social and economic justice movements from Rachel Carson Ralph Nader and E F Schumacher to Vandana Shiva Muhammad Yunus and Al Gore Others such as Aldo Leopold Thomas Berry and Manfred Max Neef are relatively undiscovered gems whose work should be much more widely known By featuring these and other seminal thinkers The Top 50 Sustainability Books distils a remarkable collective intelligence one that provides devastating evidence of the problems we face as a global society yet also inspiring examples of innovative solutions it explores our deepest fears and our highest hopes for the future It is a must read for anyone who wants to tap into the wisdom of our age

The Turning Point Fritjof Capra,1982-01-01 The Turning Point is a powerful book It is informative provocative and radical it will be controversial With devastating clarity Capra shows how in every field of science and in the health field as well our methods and theories are leading to our own destruction But Capra sees the science of physics which led us into our present fragmented world via Newtonian mechanics as leading us out of this obsolete view of the universe with its new and liberating findings from back cover

The Phenomenon of Teilhard David H. Lane,1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear

well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard s New Age enterprise In a highly documented and insightful scrutiny of Teilhard s cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print Quantum City Ayssar Arida,2002 Can a world view based on quantum theory produce a better approach to the problems of the city Arida links the concepts of quantum theory to the field of urban design encouraging the urban designer and architect to look at the design of cities from a new perspective **Integral Economics** Ronnie Lessem,Alexander Schieffer,2016-05-23 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In *Integral Economics* Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events *Integral Economics* is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework **Integral Economics** Dr Alexander Schieffer,Professor Ronnie Lessem,2012-08-28 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In *Integral Economics* Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in

their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events Integral Economics is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework

Post-Modernism and the Social Sciences Pauline Marie Rosenau, 1991-11-05 Post modernism offers a revolutionary approach to the study of society in questioning the validity of modern science and the notion of objective knowledge this movement discards history rejects humanism and resists any truth claims In this comprehensive assessment of post modernism Pauline Rosenau traces its origins in the humanities and describes how its key concepts are today being applied to and are restructuring the social sciences Serving as neither an opponent nor an apologist for the movement she cuts through post modernism's often incomprehensible jargon in order to offer all readers a lucid exposition of its propositions Rosenau shows how the post modern challenge to reason and rational organization radiates across academic fields For example in psychology it questions the conscious logical coherent subject in public administration it encourages a retreat from central planning and from reliance on specialists in political science it calls into question the authority of hierarchical bureaucratic decision making structures that function in carefully defined spheres in anthropology it inspires the protection of local primitive cultures from First World attempts to reorganize them In all of the social sciences she argues post modernism repudiates representative democracy and plays havoc with the very meaning of left wing and right wing Rosenau also highlights how post modernism has inspired a new generation of social movements ranging from New Age sensitivities to Third World fundamentalism In weighing its strengths and weaknesses the author examines two major tendencies within post modernism the largely European skeptical form and the predominantly Anglo North American form which suggests alternative political social and cultural projects She draws examples from anthropology economics geography history international relations law planning political science psychology sociology urban studies and women's studies and provides a glossary of post modern terms to assist the uninitiated reader with special meanings not found in standard dictionaries

The Practice of Constructivism in Science Education Kenneth G. Tobin, 2012-11-12 This volume provides a needed elaboration of theories and potential applications of constructivism in science education Although the term constructivism is used widely there has been a dearth of materials to guide science

educators concerning the potential of constructivism to influence what is done in the field In fact there has been a tendency for constructivism to be viewed as a method that can be used in a classroom This view tends to diminish the power of constructivism as a way of thinking about education and in particular about science education The chapters in this book address the need to document the theoretical roots of constructivism and to describe how practitioners have applied constructivist oriented beliefs in the practice of K 12 teaching of science and mathematics as well as teacher education Not only does this book contain different theoretical perspectives on constructivism but it also features a chapter that critiques constructivism as an epistemology Specific topics covered include cooperative learning the negotiation of meaning problem centered learning social construction of knowledge science in culturally diverse settings curriculum planning and implementation and instructional technology Issues associated with the preparation and enhancement of science teachers and the reform of science education are also explored

A Hybrid Imagination Andrew Jamison, Steen Hyldgaard Christensen, Lars Botin, 2011 They show how social and cultural movements from the Renaissance of the late 15th century to the environmental and global justice movements of our time have provided contexts or sites for mixing scientific knowledge and technical skills from different fields and social domains into new combinations thus fostering what the authors term a hybrid imagination Such a hybrid imagination is especially important today as a way to counter the competitive and commercial hubris that is so much taken for granted in contemporary science and engineering discourses and practices with a sense of cooperation and social responsibility The book portrays the history of science and technology as an underlying tension between hubris literally the ambition to play god on the part of many a scientist and engineer and neglect the consequences and a hybrid imagination connecting scientific facts and technological artifacts with cultural understanding

The Cartesian Split Brandon D. Short, 2020-06-03 The Cartesian Split examines the phenomenon of Cartesian influence as a psychological complex in the Jungian tradition It explores the full legacy of Cartesian rationality in its emphasis on abstract thinking and masculinisation of thought often perceived in a negative light despite the developments of modernity The book argues that the Cartesian creation of the Modern Age as accompanied by a radical dualism is better understood as a myth while acknowledging the

psychological reality of the myth The Cartesian myth is a collective dream and the urgency of its rhetoric suggests that an important message is being left unheeded This message may lead us to answers in the most unexpected place of all The book brings forth the Cartesian myth in a new context and shows it to have potential meaning for us today The book will be of great interest for academics researchers and post graduate students in the fields of analytical psychology mental health comparative mythology and Jungian studies Debating Biology Gillian Bendelow, Lynda Birke, Simon Williams, 2005-07-28 Debating Biology takes a fresh look at the relationship between biology and society as it is played out in the arena of health and medicine *Comparative Philosophy Today and Tomorrow* Geoff Ashton, Joshua P. Kimber, Sarah A. Mattice, 2009-03-26 Whether it be the China of Confucius or the Germany of Jurgen Moltmann premodern India or the World Trade Organization philosophy has brought us face to face with the pressing issues of our times More often than not these inquiries have stimulated creative responses to the opportunities and problems that shape our experiences But the responsiveness of inquiry to its respective concerns can only grow according to the dimensions of the conversation underwriting the inquiry itself With its comparative and interdisciplinary approach *Comparative Philosophy Today and Tomorrow* Proceedings from the 2007 Uehiro CrossCurrents Philosophy Conference creates a space for juxtaposing philosophical views on shared themes thereby stimulating fresh insight into issues of contemporary significance From self cultivation to global justice from environmental ethics to the interrelation of religion and science this collection of essays highlights the central role of philosophy and comparative philosophy in particular for understanding and appreciating the connections and discontinuities of East and West if you will of past present and future Science, Literature, and Film in the Hispanic World J. Hoeg, K. Larsen, 2006-10-17 Driven by such diverse advances as the Human Genome Project and the explosion of the World Wide Web and also by the threat of human inspired disasters such as global warming the field of science and literature studies is currently undergoing an unprecedented expansion The relations between science and literature have been and continue to be central to understanding Hispanic civilization and culture In spite of this *Science Literature and Film in the Spanish Speaking World* is the first and only book to treat this new and dynamic field from an Hispanic perspective This unique volume opens the door to an entirely new focus in the study of Hispanic literature and culture *Primitives in the Wilderness* Peter C. van Wyck, 1997-07-31 Brings the radical environmentalism known as deep ecology into an encounter with contemporary social and cultural theory showing that deep ecology still has much to learn from such theory *Biomimicry for Materials, Design and Habitats* Marjan Eggermont, Vikram Shyam, Aloysius F. Hepp, 2022-02-21 Biomimicry for Materials Design and Habitats Innovations and Applications and is a survey of the recent work of recognized experts in a variety of fields who employ biomimicry and related paradigms to solve key problems of interest within design science technology and society Topics covered include innovations from biomimicry in materials product design architecture and biological sciences The book is a useful resource for educators designers researchers engineers and materials scientists

taking them from the theory behind biomimicry to real world applications Living systems have evolved innovative solutions to challenges that humans face on a daily basis Nonlinear multifunctional systems that have a symbiotic relationship with their environment are the domain of nature Morphological solutions for buildings inspired by nature can be used for skins surfaces and structures to facilitate environmental adaptation of buildings to increase occupant comfort and reduce energy demands Birds can teach us to produce novel structures 3D printing can be informed by oysters and mussels and mycelium may show us the way to fabricate new biocomposites in architecture Therefore it is in nature that we seek inspiration for the solutions to tomorrow s challenges Presents new directions in education and the various applications of biomimicry within industry including bio inspired entrepreneurship Discusses the role of biomimicry in education innovation and product design Covers applications in systems engineering and design novel materials with applications in 3D printing and bio inspired architecture Includes perspectives on sustainability detailing the role that bio inspiration or biomimicry plays in sustainability
