The Tycoons Charles R. Morris, 2006-10-03 Makes a reader feel like a time traveler plopped down among men who were by turns vicious and visionary The Christian Science Monitor The modern American economy was the creation of four men Andrew Carnegie John D Rockefeller Jay Gould and J P Morgan They were the giants of the Gilded Age a moment of riotous growth that established America as the richest most inventive and most productive country on the planet Acclaimed author Charles R Morris vividly brings the men and their times to life The ruthlessly competitive Carnegie the imperial Rockefeller and the provocateur Gould were obsessed with progress experiment and speed They were balanced by Morgan the gentleman businessman who fought instead for a global trust in American business Through their antagonism and their verve they built an industrial behemoth and a country of middle class consumers The Tycoons tells the incredible story of how these four determined men wrenched the economy into the modern age inventing a nation of full economic participation that could not have been imagined only a few decades earlier

Poverty in American Popular Culture Wylie Lenz,2020-08-05 In 1964 President Lyndon Johnson declared an unconditional war on poverty in the form of sweeping federal programs to assist millions of Americans Two decades later President Reagan drastically cut such programs claiming that welfare encouraged dependency and famously quipping Some years ago the federal government declared war on poverty and poverty won These opposing policy positions and the ideologies informing them have been well studied Here the focus turns to the influence of popular art and entertainment on beliefs about poverty s causes and potential cures These new essays interrogate the representation of poverty in film television music photography painting illustration and other art forms from the late 19th century to the present They map when how and why producers of popular culture represent or ignore poverty and what assumptions their works make and encourage Theodore Roosevelt and the Art of American Power William R. Any history that touts itself as unconventional is bound to raise some hackles when it challenges traditional interpretations of our nation s past Yet history is continually under revision This 2 volume work covering America s first 300 years differs from others in seeking to debunk numerous flattering and conventionally accepted myths aReading between the lines of what we ve all been taught as US history the author probes a little deeper into what perhaps was never denied but was never spelled out either Some inconvenient questions emerge Was lust for land the driving force behind every war in US history In a lively narrative Kaplan demonstrates that in many ways Lincoln was our worst wartime president save Madison and that Reconstruction was doomed from the start The author describes how an agricultural hinterland evolved into an industrial colossus and a society of small towns grew into a nation of large cities When it did what had once been the world s leading republican government gradually edged towards becoming a democracy a form of government abjured by the Founding Fathers The War Between the States and the rapid industrialization of the North was made possible by tapping the vast resources which lay underneath the land Oil coal iron ore copper zinc and other minerals made the US the richest and most powerful nation in the world by the end of the nineteenth century when this book concludes The book also chronicles the fledgling Labor movement in the 19th century handily discredited through equation with anarchists and explores the cynicism with which McKinley embarked on the Spanish American War The basic thrust of this 2 volume work is neither to expose America s blemishes nor to eulogize its virtues a Rather the author focuses on US history from a different perspective than is usually accepted Readers may disagree with his interpretations but will find his arguments intriguing [The Dawn of Innovation](#) Charles R.
