Phone Therapy Sarah Hart, 2022-12-30 Phone therapy is as relevant as it was 50 years ago. The increased use of this medium during the COVID 19 pandemic and the revision of professional therapy body guidance has endorsed the validity and effectiveness of phone therapy. The book updates, revises and reinvigorates the medium for individual therapists, counselling services and training organisations in a post lockdown world where blended therapy is the norm. It includes practical considerations, phone related theory, personal experience and self reflection exercises. Contributing counsellor vignettes cover topics such as adapting theoretical modalities and EDI considerations without visual cues. From assessments, contracting and core skills to assumptions, disinhibition and privacy issues, it supports therapists and counselling organisations to embrace the accessibility, flexibility and creativity that therapy by phone provides. Relevant for experienced and trainee therapists alike, this book provides practitioners with the support and knowledge to confidently use phone therapy in their practice.

Balance Carol Svec, 2017-09-01 Some low frequency sounds such as noise from storms or truck engines can make you feel dizzy and nauseated. An index finger's light touch can stop people from losing balance. You are more prone to trip when you think someone is watching you. A breakthrough in improving balance as we age might just come through the study of the Achilles tendon. A person gets falling drunk due to a tiny structure in the inner ear that floats when it becomes soaked in alcohol. These and other surprising and useful nuggets of information can be found in this lively 360 degree exploration of our body's most intricate overlooked sense: balance. Readers follow award winning science and health writer Carol Svec through various facilities as she talks with leading scientists doing state of the art balance research. Svec translates their most fascinating findings for the layperson in a way that is highly entertaining and broadly accessible. She showcases the coolest gadgets used by researchers as she grills an egg in a virtual kitchen, has her senses fooled by a mannequin named Hans in a Tumbling Room, survives the Vominator without losing her lunch and experiences drunken dizziness inside a police muster room. Along the way she cites case studies of people whose lives are affected by balance dysfunction, explains how balance research is being applied today to help those who are ill, elderly, disabled or simply prone to motion sickness and provides a glimpse at what ingenious, potentially life changing advances may be coming down the road. Whether you have a balance disorder or care about someone who does, are an athlete or performer whose livelihood depends on balance or just love accessible, page turning popular science, you'll be enlightened and entertained by this appreciation of our complex super sense.

Identified Flying Objects Dr. Michael P. Masters, 2019-03-22 Could UFOs and Aliens simply be us but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology and biomedicine, explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our future progeny

to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future
