The Uns Lone Ranger Combating International Wildlife Crime:

The UN's Lone Ranger John M. Sellar, 2014 Illegal trade in wildlife is now recognized as one of the most significant criminal activities in the world bringing billions of dollars in illicit profits to organized crime groups and networks which are acknowledged to control much of this trafficking Until 2011 John M Sellar was the most senior law enforcement official operating transnationally to combat these activities drawing upon his previous 24 years of experience in the Scottish Police Force investigating serious crime Following his secondment as Chief of Enforcement to the Convention on International Trade in Endangered Species CITES he was labelled by the media as The UN s Lone Ranger His duties took him to more than 60 countries involving 2 million kilometres of travel over the course of 14 years His book describes why organized crime has turned to robbing nations especially in the developing world of their animals and plants and how this is bringing several species to the brink of extinction It illustrates in words and images how criminal networks recruit equip and direct poachers and wildlife contraband couriers arrange the smuggling of species and products often involving transportation across many borders and several continents use bribery and violence against law enforcement personnel and the nature of the markets in which illegal origin wildlife is being consumed Separate chapters examine particular wildlife crime types such as the poaching of elephants and rhinos the hugely profitable illicit trade in caviar and the demand for the skins and bones of tigers which has almost eradicated them But Sellar once described as the world s leading authority on wildlife crime also reflects frankly and sometimes critically on his service as a UN official the way in which national law enforcement bodies are reacting to these crimes and the support provided by international agencies He identifies what he believes are significant gaps in the current responses and suggests ways in which they might be plugged He recounts several of his incredible experiences visiting anti poaching officers on the roof of the world the Tibetan Plateau and bizarre late night hospitality from KGB officers The UN s Lone Ranger tells of law enforcement and diplomacy It is also the first book written from an international perspective about a subject that warrants much greater attention if the world s most threatened species are to be safeguarded for future generations *Transnational Crime and Global Security* Philip L. Reichel, Ryan Randa, 2018-01-12 This two volume work offers a comprehensive examination of the distressing topics of transnational crime and the implications for global security National security is a key concern for individual nations regions and the global community yet globalism has led to the perfusion of transnational crime such that it now poses a serious threat to the national security of governments around the world Whether attention is concentrated on a particular type of transnational crime or on broader concerns of transnational crime generally the security issues related to preventing and combatting transnational crime remain of top priority concern for many governments *Transnational Crime and Global Security* has been carefully curated to provide students scholars professionals and consultants of criminal justice and security studies with comprehensive information about and in depth analysis of contemporary issues in transnational crime and global security The first volume

covers such core topics as cybercrime human trafficking and money laundering and also contains infrequently covered but nevertheless important topics including environmental crime the weaponization of infectious diseases and outlaw motorcycle gangs The second volume is unique in its coverage of security issues related to such topics as the return of foreign terrorist fighters using big data to reinforce security and how to focus efforts that encourage security cooperation

Green Crimes and Dirty Money Toine Spapens, Rob White, Daan van Uhm, Wim Huisman, 2018-05-30 Environmental crimes are primarily driven by financial motives The combined financial value of illicit trade in protected wildlife illegal logging and waste trafficking is estimated to come directly after counterfeiting the narcotic drugs trade and illegal gambling Logically the proceeds of these crimes must also be laundered Goods however are not the only money maker for environmental criminals Corporations may also try to save costs by not complying with environmental regulations and thus commit crimes of omission rather than commission From an enforcement and compliance perspective focusing on the proceeds of crime may therefore be an effective strategy This book brings together different perspectives on the financial aspects of environmental crime and harm from a green criminological viewpoint It addresses the role of economic systems the value of environmental performance for corporations money laundering in the context of environmental crime financial investigation and questions of regulation and penalties Discussing these topics from the view of green criminology sociology and governance this book will be of great interest to all those concerned about the financial dimensions of crime and the environment

Militarised Responses to Transnational Organised Crime Tuesday Reitano, Sasha Jespersen, Lucia Bird Ruiz-Benitez de Lugo, 2017-10-06 This edited volume examines the use of militarised responses to different forms of criminal activity discussing the outcomes and unintended consequences Politicians and

policymakers frequently use militarised responses to look tough on crime The deployment of armies navies military assets and militarised approaches can send a powerful message but have produced mixed results While they generate the perception that governments are actively engaged on issues of concern to the public and in some cases have resulted in notable successes on the downside they have frequently also increased the loss of life exacerbated the humanitarian consequences of a particular crime and entrenched divides between security and state institutions and the criminal proponents narrowing the possibilities for future negotiated solutions By focusing on four different areas of criminality wildlife crime piracy migration and drug trafficking the book allows context and evidence based conclusions to be drawn on the strategic value and commonality of responses and their outcomes
