Sabrina Fuchs Abrams, 2023-12-05 Seen as too smart too sassy too sexy and too strident female humorists have been resisted and overlooked New York Women of Wit in the Twentieth Century corrects this tendency focusing on the foremothers of women's humor in modern America who used satire irony and wit as indirect forms of social protest This book focuses on the women who stood on the periphery of predominantly male New York intellectual circles in the twentieth century Sabrina Fuchs Abrams argues that the advent of modernism the women's suffrage movement the emergence of the New Woman and the New Negro Woman and the growth of urban centers in the 1920s and 30s gave rise to a new voice of women's humor one that was at once defiant and conflicted in defining female identity and the underlying assumptions about gender roles in American society Her study gives special attention to the contributions of the satirists Edna St Vincent Millay pseudonym Nancy Boyd Tess Slesinger Dorothy Parker Jessie Redmon Fauset Dawn Powell and Mary McCarthy Grounded in theories of humor feminist and critical race theory and urban studies this book will find an audience among scholars and students interested in women writers feminist humor modern American literature and African American studies Confronting Urban Legacy Xiangming Chen, Nick Bacon, 2013-10-18 Confronting Urban Legacy fills a critical lacuna in urban scholarship As almost all of the literature focuses on global cities and megacities smaller secondary cities which actually hold the majority of the world's population are either critically misunderstood or unexamined in their entirety This neglect not only biases scholars' understanding of social and spatial dynamics toward very large global cities but also maintains a void in students' learning This book specifically explores the transformative relationship between globalization and urban transition in Hartford Connecticut while including crucial comparative chapters on other forgotten New England cities Portland Maine along with Lawrence and Springfield Massachusetts Hartford's transformation carries a striking imprint of globalization that has been largely missed from its 17th century roots as New England's first inland colonial settlement to its emergence as one of the world's most prosperous manufacturing and insurance metropolises to its present configuration as one of America's poorest post-industrial cities which by still retaining a globally lucrative FIRE Sector is nevertheless surrounded by one of the nation's most prosperous metropolitan regions The myriad of dilemmas confronting Hartford calls for this book to take an interdisciplinary approach The editors' introduction places Hartford in a global comparative perspective Part I provides rich

historical delineations of the many rises and not quite falls of Hartford Part II offers a broad contemporary treatment of Hartford by dissecting recent immigration and examining the demographic and educational dimensions of the city suburban divide and Part III unpacks Hartford s current social economic and political situation and discusses what the city could become Using the lessons from this book on Hartford and other underappreciated secondary cities in New England urban scholars leaders and residents alike can gain a number of essential insights both theoretical and practical
