There is great interest in recent scholarship in the study of metropolitan cultures in India as evident from the number of books that have appeared on cities such as Delhi Mumbai Chennai and Kolkata Though Hyderabad has a rich archive of history scattered in many languages very few attempts have been made to bring this scholarship together The papers in this volume bring together this scholarship at one place They trace the contribution of different languages and literary cultures to the multicultural mosaic that is the city of Hyderabad How it has acquired this uniqueness and how it has been sustained is the subject matter of literary cultures in Hyderabad This work attempts to trace some aspects of the history of major languages practiced in the city It also reviews the contribution of the various linguistic groups that have added to the development not just of varied literary cultures but also to the evolution of an inclusive Hyderabad culture The present volume it is hoped will enthuse both younger and senior scholars and students to take a fresh look at the study of languages and literary cultures as they have evolved in India s cities and add to the growing scholarship of metropolitan cultures in

Outlook Traveller, 2008-08 Drivers of Climate Change in Urban India Lutz Meyer-Ohlendorf, 2018-11-20 This study transcends the homogenizing inter national level of argumentation rich versus poor countries and instead looks at a sub national level in two respects 1 geographically it focuses on the rapidly growing megacity of Hyderabad 2 in socio economic terms the urban population is disaggregated by taking a lifestyle typology approach For the first time the lifestyle concept traditionally being used in affluent consumer societies is applied to a dynamically transforming and socially heterogeneous urban society Methodically the author includes India specific value orientations as well as social practices as markers of social structural differentiation The study identifies differentials of lifestyle induced GHG emissions carbon footprints and underlines the ambiguity of a purely income based differentiation with regard to the levels of contribution to the climate problem
