Attack of the New B Movies Justin Wigard, Mitch Ploskonka, 2023-04-14 Since its inception in 1992 the Sci Fi Channel later rebranded as SYFY has aired more than 500 network produced or commissioned films Campy and prolific the network churned out one low budget film after another finally finding its zenith in the 2013 release of *Sharknado* With unpretentious charm and a hearty helping of commodified nostalgia the *Sharknado* franchise briefly ruled the cultural consciousness and temporarily transformed SYFY's original films from cult fringe to appointment television Naturally the network followed up with a steady stream of sequels and spin offs including *Lavalantula* and its sequel *2 Lava 2 Lantula* This collection of essays is the first to devote critical attention to SYFY's original film canon both pre and post *Sharknado* In addition to unpacking the cultural historical and critical underpinnings of the monsters at the heart of SYFY's classic creature features the contributors offer a variety of approaches to understanding and interrogating these films within the broader contexts of ecocriticism monster theory post 9 11 criticism and neocolonialism Providing a further entry point for future scholarship an appendix details a thorough filmography of SYFY's original films from 1992 to 2022

From Workshop to Waste Magnet Diane Sicotte, 2016-09-21 Like many industrialized regions the Philadelphia metro area contains pockets of environmental degradation neighborhoods littered with abandoned waste sites polluting factories and smoke belching incinerators However other neighborhoods within and around the city are relatively pristine This eye opening book reveals that such environmental inequalities did not occur by chance but were instead the result of specific policy decisions that served to exacerbate endemic classism and racism *From Workshop to Waste Magnet* presents Philadelphia's environmental history as a bracing case study in mismanagement and injustice Sociologist Diane Sicotte digs deep into the

city's past as a titan of American manufacturing to trace how only a few communities came to host nearly all of the area's polluting and waste disposal land uses. By examining the complex interactions among economic decline, federal regulations, local politics, and shifting ethnic demographics, she not only dissects what went wrong in Philadelphia but also identifies lessons for environmental justice activism today. Sicotte's research tallies both the environmental and social costs of industrial pollution, exposing the devastation that occurs when mass quantities of society's wastes mix with toxic levels of systemic racism and economic inequality. *From Workshop to Waste Magnet* is a compelling read for anyone concerned with the health of America's cities and the people who live in them.

Information Resources in Toxicology, Volume 1:

Background, Resources, and Tools, 2020-05-16 This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represent a unique, wide-ranging, curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession, sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1, *Background, Resources, and Tools*, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject, such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations, constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2, *The Global Arena*, offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, omics, risk assessment, societal implications such as ethics, and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format, such as government reports, general interest publications, blogs, and audiovisuals. Explores recent internet trends, web-based databases, and software tools in a section on the online environment. Concludes with a miscellany of special topics.

such as laws and regulations chemical hazard communication resources careers and professional education K 12 resources funding poison control centers and patents Paired with Volume Two which focuses on global resources this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field **What is Environmental Sociology?** Diana Stuart, 2021 A succinct primer on how to think critically about society environment interactions **Sources** Theodore D. Goldfarb, 1997

The Rise of the American Conservation Movement Dorceta E. Taylor, 2016-08-04 In this sweeping social history Dorceta E Taylor examines the emergence and rise of the multifaceted U S conservation movement from the mid nineteenth to the early twentieth century She shows how race class and gender influenced every aspect of the movement including the establishment of parks campaigns to protect wild game birds and fish forest conservation outdoor recreation and the movement s links to nineteenth century ideologies Initially led by white urban elites whose early efforts discriminated against the lower class and were often tied up with slavery and the appropriation of Native lands the movement benefited from contributions to policy making knowledge about the environment and activism by the poor and working class people of color women and Native Americans Far ranging and nuanced The Rise of the American Conservation Movement comprehensively documents the movement s competing motivations conflicts problematic practices and achievements in new ways

Praeger Handbook of Black American Health Ivor Lensworth Livingston, 2004 Race and Environmentalism Paul M. Ong, Evelyn Blumenberg, 1990 **Better Environmental Decisions** Ken Sexton, 1999 Better Environmental Decisions brings together leading scholars and practitioners from business government and communities to provide a comprehensive interdisciplinary introduction to the new landscape of environmental regulation and agreements Each chapter describes an important aspect of environmental decision making identifies key issues problems and barriers and recommends ways to improve both the process and the final result Throughout contributors focus on providing tools to make better decisions and on presenting solutions to real world problems This useful work will be a landmark reference and text for scholars and students as well as legislators regulators advocates and community activists *Contaminated Communities* Michael Edelstein, 2018-10-08 In this wholly revised second edition Michael Edelstein draws on his thirty years as a community activist to provide a much expanded theoretical foundation for understanding the psychosocial impacts of toxic contamination Informed by social psychological theory and an extensive survey of documented cases of toxic exposure and enlivened by excerpts drawn from more than one thousand Interviews with victims Contaminated Communities Second Edition presents a candid portrayal of the toxic victim s experience and the key stages in the course of toxic disaster The second edition introduces dozens of new cases and provides expanded considerations of environmental justice environmental racism environmental turbulence and environmental stigma as well as a fully articulated theory of lifescape The new edition moves past the well charted role of reactive environmentalism to explore issues for a proactivist approach that employs a third path

of social learning sustainable innovation consensus building and community empowerment Sociological Abstracts Leo P. Chall,1985 *Pollution Abstracts* ,1995 Indexes material from conference proceedings and hard to find documents in addition to journal articles Over 1 000 journals are indexed and literature published from 1981 to the present is covered Topics in pollution and its management are extensively covered from the standpoints of atmosphere emissions mathematical models effects on people and animals and environmental action Major areas of coverage include air pollution marine pollution freshwater pollution sewage and wastewater treatment waste management land pollution toxicology and health noise and radiation **Land Use & Environment Forum** ,1991
