Investigating Grammar in Autism Spectrum Disorders Anna Gavarró,Stephanie Durrleman,2018-08-21 Autism Spectrum Disorder ASD hereafter is a neurodevelopmental condition characterized by deficits in communicative and social skills The vast majority of research on language in ASD has focused on pragmatic difficulties while less is known about structural aspects of language in this population Work on syntax and phonology is not only sparse but the heterogeneity in these grammatical domains has moreover led to conflicting reports that they are either intact or impaired More remains to be understood about variations in grammatical profiles in ASD as well as the relation of grammar to other cognitive abilities The body of research gathered here increases our understanding of the grammatical strengths and weaknesses in ASD The contributions carefully elucidate the relations between grammar and other areas of cognition as well as unveil the similarities and differences of grammar in ASD compared to other conditions The result is a volume that provides new ways to think about language and communication in ASD and beyond which should be of interest to both linguists and clinicians

Acquisition of Romance Languages Pedro Guijarro-Fuentes,Maria Juan-Garau,Pilar Larrañaga,2016-09-12 This volume presents a collection of new articles that investigate the acquisition of Romance languages across different acquisition contexts as well as refine and propose new theoretical constructs such as complexity of linguistic features as a relevant factor forming children s adults and bilinguals acquisition of syntactical morphological and phonological structures

Handbook of Fathers and Child Development Hiram E. Fitzgerald,Kai von Klitzing,Natasha J. Cabrera,Júlia Scarano de Mendonça,Thomas Skjøthaug,2020-10-01 This

handbook provides a comprehensive review of the impact of fathers on child development from prenatal years to age five. It examines the effects of the father-child relationship on the child's neurobiological development, hormonal, emotional, and behavioral regulatory systems, and on the systemic embodiment of experiences into the child's mental models of self, others, and self-other relationships. The volume reflects two perspectives guiding research with fathers: identifying positive and negative factors that influence early childhood development, specifying child outcomes, and emphasizing cultural diversity in father involvement and examining multifaceted specific approaches to guide father research. Key topics addressed include: Direct assessment of father parenting rather than through maternal reports; The effects of father presence in contrast to father absence; The full diversity of father involvement; Father's impact on gender role differentiation; Father's role in triadic interactions of family dynamics; Father involvement in psychotherapeutic family interventions. This handbook draws from converging perspectives about the role of fathers in very early child development, summarizes what is known, and within each chapter draws attention to the critical questions that need to be answered in coming decades. *The Handbook of Fathers and Child Development* is a must-have resource for researchers, graduate students, and clinicians, therapists, and other professionals in infancy and early child development, social work, public health, developmental and clinical child psychology, pediatrics, family studies, neuroscience, juvenile justice, child and adolescent psychiatry, school and educational psychology, anthropology, sociology, and all interrelated disciplines.

New Trends in Language Acquisition Within the Generative Perspective Pedro Guijarro-Fuentes, Cristina Suárez-Gómez, 2020-01-17. This book presents a comprehensive state-of-the-art treatment of the acquisition of Indo and Non-Indo-European languages in various contexts such as L1, L2, L3, L_n, bi-multilingual heritage languages, pathology, as well as language impairment and sign language acquisition. The book explores a broad mix of methodologies and issues in contemporary research. The text presents original research from several different perspectives and provides a basis for dialogue between researchers working on diverse projects with the aim of furthering our understanding of how languages are acquired. The book proposes and refines new theoretical constructs, e.g., regarding the complexity of linguistic features as a relevant factor forming children's adults and bilingual individuals' acquisition of morphological, syntactic, discursive, pragmatic, lexical, and phonological structures. It appeals to students, researchers, and professionals in the field.

Autobiographical Memory Development Sami Gülgöz, Basak Sahin-Acar, 2020-05-20. Autobiographical memory is constituted from the integration of several memory skills, as well as the ability to narrate. This all helps in understanding our relation to self, family, contexts, culture, brain development, and traumatic experiences. The present volume discusses contemporary approaches to childhood memories and examines cutting-edge research on the development of autobiographical memory. The chapters in this book, written by a group of leading authors, each make a unique contribution by describing a specific developmental domain. In providing a multinational and multicultural perspective on autobiographical memory development and by covering a variety of theoretical and methodological approaches, this state-of-the-book is
