McLennan, 2025-09-09 Break free from perfectionism and finish your creative projects This unconventional guide shows you how to overcome creative blocks and finally complete your work through strategic imperfection The world is full of creative people So why do some get their ideas out in the world while others don't Why are some incredibly prolific while others struggle with deadlines or can't complete projects In this book Jason F. McLennan a master in getting stuff done shares secrets to boosting productivity innovation and personal success By adopting his 3-4 baked philosophy and the key lessons that surround it readers will be able to dramatically increase their output while also keeping their creative juices flowing McLennan's recipe for creative success includes the following ideas Look forward to failure Discover the power of feedback Learn to become a trim tab Harness the power of momentum to drive creativity We've all heard the phrase the perfect is the enemy of the good Perfection is often what holds so many people back Trying to reach it means that nothing much can get completed and inspiration itself is often blocked as people either procrastinate or endlessly self edit By chasing perfection it remains elusively further away The world is full of half baked ideas but almost no perfect ones With *The Magic of*

Imperfection readers will learn how to seriously amp up what they do how fast they do it and simultaneously how well it gets done

Designing for Hope Dominique Hes, Chrisna du Plessis, 2014-10-17 A forward looking book on sustainable design that describes problems and then by providing a different way to conceptualise design and development leads on to examples of regenerative solutions Its aim is to move the discussion away from doing less but still detracting from our ecological capital to positively contributing and adding to this capital This book offers a hopeful response to the often frightening changes and challenges we face arguing that we can actively create a positive and abundant future through mindful contributive engagement that is rooted in a living systems based worldview Concepts and practices such as Regenerative Development Biophilic Design Biomimicry Permaculture and Positive Development are explored through interviews and case studies from the built environment to try and answer questions such as How can projects focus on creating a positive ecological footprint and contribute to community How can we as practitioners restore and enrich the relationships in our projects and How does design focus hope and create a positive legacy

Building in Bloom Mary Adam Thomas, 2013-05-01 Pittsburgh's Phipps Conservatory and Botanical Gardens has long been recognized as an environmental leader for its deeply green campus and its mission to promote sustainability in the natural world For the final phase of a three part expansion Phipps took a revolutionary step In 2007 it accepted the Living Building Challenge to guide the design and construction of its new administration and education space When the Center for Sustainable Landscapes opened in May 2012 Phipps demonstrated that commitment and collaboration can turn an ambitious idea into a high performance building that operates as efficiently cleanly and beautifully as a flower Combining job specific details with reflections from the team *Building in Bloom* tells the story of how this remarkable structure came to life from concept to ribbon cutting It is the first in a series of books showcasing Living Building Challenge projects
