The Political Economy of Hungary Adam Fabry, 2019-04-03 This book explores the political economy of Hungary from the mid 1970s to the present Widely considered a poster boy of neoliberal transformation in post communist Eastern Europe until the mid 2000s Hungary has in recent years developed into a model illiberal regime Constitutional checks and balances are non functioning the independent media trade unions and civil society groups are constantly attacked by the authorities there is widespread intolerance against minorities and refugees and the governing FIDESZ party led by Prime Minister Viktor Orb n controls all public institutions and increasingly large parts of the country s economy To make sense of the politico economical roller coaster that Hungary has experienced in the last four decades Fabry employs a Marxian political economy approach emphasising competitive accumulation class struggle both between capital and labour as well as different fractions of capital and uneven and combined development The author analyses the neoliberal transformation of the Hungarian political economy and argues that the drift to authoritarianism under the Orb n regime cannot be explained as a case of Hungarian exceptionalism but rather represents an outcome of the inherent contradictions of the variety of neoliberalism that emerged in Hungary after 1989 **The Political Economy of Emerging Markets and Alternative**

Development Paths Judit Ricz, Tamás Gerőcs, 2023-02-17 This volume is the continuation of our research on economic and developmental policy making in the global semi periphery in the post crisis cycle see our two recently published volumes titled Market Liberalism and Economic Patriotism in Capitalist Systems edited by Ger cs and Szanyi 2019 Palgrave Macmillan and The Post Crisis Developmental State Perspectives from the Global Periphery edited by Ger cs and Ricz 2021 Our new volume aims to be a contribution to the analysis of emerging market economies alternative development trajectories as we explore the new perspectives on semi peripheral dependent development since the Global Financial Crisis and especially amidst the new global pandemic the COVID 19 The scope of comparative capitalism research has also been altered accordingly to include the analysis of emerging economies outside the core of the world system and to make intertemporal

comparisons possible such as to define and characterise historical waves of state capitalism Still we are convinced that to better understand the current wave of state capitalism and to explore its national varieties there is a need to critically reconsider existing theoretical approaches and methodologies and to search for new ones if necessary This book aims to be a contribution to the analysis of emerging market economies alternative development trajectories and explores new perspectives on semi peripheral dependent development especially amidst COVID 19 *The Political Economy of Asian Transition from Communism* Sujian Guo,2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work **An Analysis of Karl Marx's Capital** Macat Team,2017-07-05 Marx's Capital is without question one of the most influential books to be published in the course of the past two centuries Controversial in its politics and arriving at conclusions that are passionately debated to this day it is nonetheless a fine example of the creative combination of a philosophical method the dialectic with historical and economic information to produce a new interpretation of history Marx's belief that he had arrived at a scientific way of describing the present and predicting the future may not be shared by many of his modern interpreters But his ability to connect things together in new ways is not in doubt and nor is the influence of the new hypotheses that he generated as a result of so much careful analysis **The Evolution of Intermediary Institutions in Europe** Poul F Kjaer,Eva Hartmann,2015-08-11 This book investigates the consecutive shifts between three types of intermediary institutions in the European context Corporatist Neo corporatist and Governance institutions It does so by combining insights from European Political Economy European Integration and governance studies and socio legal studies in the European context Rethinking Liberal Equality Andrew Levine,2019-04-15 For more than a quarter century academic political philosophy has been dominated by strains of liberal theory shaped decisively by John Rawls's seminal investigations of distributive justice and political legitimacy By intervening sympathetically but critically into several ongoing debates initiated by Rawls's work Andrew Levine suggests the possibility of a supra liberal egalitarian political philosophy that incorporates the insights of recent developments in liberal theory while reinvigorating the political vision of the historical Left Taking current discussions about justice equality and political neutrality as his points of departure Levine

suggests the need to rethink mainstream liberal understandings of equality and related notions. The rethinking he proposes lends support ultimately for a vision of ideal social and political arrangements of a kind intimated though only barely sketched in the work of Rousseau and Marx: a vision that not long ago was widely endorsed but that nowadays is almost everywhere regarded as hopelessly utopian. In marked opposition to the reigning consensus view, Levine argues that after compelling liberal concerns are taken into consideration, the vision of ideal social and political arrangements which motivated generations of progressive thinkers and political actors is anything but utopian and remains as timely today as it ever was. This vision, Levine insists, is indispensable for curing contemporary liberalism of its tendency to acquiesce in a status quo that is ultimately at odds with democratic, egalitarian, and even liberal values.

Socialism with a Human Face Gary B.

Magee, Wayne Geerling, 2022-03-31 East Germany's economic history is typically told as a story of the unravelling of an inherently flawed system. Yet while the system's inefficiency is undeniable, its economic history was much richer than its comparatively poor economic performance suggests. For many who lived there, it was a system that over its forty years was capable of achievements and generally functioned at bearable levels. This book combines the insights of behavioural economics with archival research to peel away layers of rhetoric and assumptions about the East German economy and explore aspects of that underlying functionality. Through a series of case studies that examine the establishment of socialist workplaces, the searches for productivity, growth, and efficiency, and the emergence of financial crisis, the book considers the system from the perspective of the humans who operated it and made the decisions that made it work. Unencumbered by political preconceptions, it offers a more realistic understanding of East German economic history than that derived from stagnant debates about the clash of systems. The new perspectives and approaches presented demonstrate that extracted

from its Cold War context East Germany's economic history can be analysed for what it was rather than for what it symbolised

State and Minorities in Communist East Germany Mike Dennis, Norman LaPorte, 2011-08-01 Based on interviews and the voluminous materials in the archives of the SED the Stasi and central and regional authorities this volume focuses on several contrasting minorities Jehovah's Witnesses Jews guest workers from Vietnam and Mozambique football fans punks and skinheads and their interaction with state and party bodies during Erich Honecker's rule over the communist system It explores how they were able to resist persecution and surveillance by instruments of the state thus illustrating the limits on the power of the East German dictatorship and shedding light on the notion of authority as social practice

between religion and ethnicity the intersection between culture and imperial national wartime and revolutionary political agendas migration women s and gender history ideologies and political movements the legacy of communism and the ways in which various states in East Central Europe deployed and were formed by the politics of memory and commemoration This book uses new methodologies in order to fundamentally reshape perspectives on the development of East Central Europe over the past three centuries Transnational and comparative in approach this volume presents the latest research on the social cultural political and economic history of modern East Central Europe providing an analytical and comprehensive overview for all students of this region

Modalities of Change James Wilkerson,Robert Parkin,2012-10-01 While in some cases modernity may dominate traditional forms of expression in others the modern is embraced as a welcome source of new ideas that can modify tradition while still keeping it within its own bounds Maintaining a strong and distinct cultural identity with the help of modernity helps representatives of that identity cope with the modern world more generally By contrast assimilation to a dominant culture marked as modern is clearly associated with not only the loss of a distinct identity but also its specific forms of cultural expression This book explores the consequences of the interface between modernity and tradition in selected societies in Taiwan mainland China and Vietnam The contributors examine how traditions are themselves exploiting modernity in creative ways in the interests of their own further cultural developments and to what extent this approach is likely to help a tradition survive

Variations on

Uzbek Identity Peter Finke, 2014-02-01 Throughout its history the concept of Uzbekness or more generally of a Turkic speaking sedentary population has continuously attracted members of other groups to join as being Uzbek promises opportunities to enlarge one's social network. Accession is comparatively easy as Uzbekness is grounded in a cultural model of territoriality rather than genealogy as the basis for social attachments. It acknowledges regional variation and the possibility of membership by voluntary decision. Therefore the boundaries of being Uzbek vary almost by definition incorporating elements of local languages, cultural patterns and social organization. This book combines an historical analysis with thorough ethnographic field research looking at differences in the conceptualization of group boundaries and the social practices they entail. It does so by analysing decision making processes by Uzbeks on the individual as well as cognitive level and the political configurations that surround them.

The Political Anatomy of Domination Béatrice Hibou, 2017-03-22 Rereading Marx, Weber, Gramsci and more recently Foucault, Béatrice Hibou tackles one of the core questions of political and social theory: state domination. Combining comparative analyses of everyday life and economics, she highlights the arrangements, understandings and practices that make domination conceivable, bearable, even acceptable or reassuring. To carry out this demonstration, Hibou examines authoritarian situations, especially comparing the paradigmatic European cases of fascism, Nazism and Soviet socialism and those of contemporary China or North and Sub-Saharan Africa.
