The Sociology Of Disruption Disaster Punctuated Cooperation:

The Sociology of Disruption, Disaster and Social Change Hendrik Vollmer, 2013-04-18 In the wake of disruption and disaster cooperation among members of a collective is refocused on matters of status membership and the formation of coalitions In an important contribution to sociological theory Hendrik Vollmer emphasizes the processes through which disruptions not only affect but also transform social order Drawing on Erving Goffman's understanding of framing and the interaction order as well as from a range of insights from contemporary sociological theory and ethnographic historical and organizational research Vollmer addresses the dynamics of disaster and disaster response within the framework of a general theory of disruption and social order It is proposed that the adjustment of cooperation in favour of coalition forming strategies is robust in both informal and organized social settings and transcends the micro and macro approaches currently favoured by theorists Offering a systematic sociological analysis of the impact of disruptiveness this book investigates how punctuated cooperation precipitates social change

Learning and Calamities Heike Egner, Marén Schorch, Martin Voss, 2014-08-13 It is widely assumed that humanity should be able to learn from calamities e g emergencies disasters catastrophes and that the affected individuals groups and enterprises as well as the concerned disaster management organizations and institutions for prevention and mitigation will be able to be better prepared or more efficient next time Furthermore it is often assumed that the results of these learning processes are preserved as knowledge in the collective memory of a society and that patterns of practices were adopted on this base Within history there is more evidence for the opposite Analyzing past calamities reveals that there is hardly any learning and if so that it rarely lasts more than one or two generations This book explores whether learning in the context of calamities happens at all and if learning takes place under which conditions it can be achieved and what would be required to ensure that learned cognitive and practical knowledge will endure on a societal level The contributions of this book include various fields of scientific research history sociology geography psychoanalysis psychiatry development studies and political studies as well as disaster research and disaster risk reduction research

Community Revival in the Wake of Disaster Virgil Henry Storr, Stefanie Haeffele-Balch, Laura E. Grube, 2016-02-10 Rebounding after disasters like tsunamis hurricanes earthquakes and floods can be daunting Communities must have residents who can not only gain access to the resources that they need to rebuild but who can also overcome the collective action problem that characterizes post disaster relief efforts *Community Revival in the Wake of Disaster* argues that entrepreneurs conceived broadly as individuals who recognize and act on opportunities to promote social change fill this critical role Using examples of recovery efforts following Hurricane Katrina in New Orleans Louisiana and Hurricane Sandy on the Rockaway Peninsula in New York the authors demonstrate how entrepreneurs promote community recovery by providing necessary goods and services restoring and replacing disrupted social networks and signaling that community rebound is likely and in fact underway They argue that creating space for entrepreneurs to act after disasters is essential for

promoting recovery and fostering resilient communities

The "Katrina Effect" William M. Taylor, Michael P.

Levine, Oenone Rooksby, Joely-Kym Sobott, 2015-08-27 On August 29th 2005 the headwaters of Hurricane Katrina's storm surge arrived at New Orleans the levees broke and the city was inundated Perhaps no other disaster of the 21st century has so captured the global media's attention and featured in the imagination of disaster like Katrina The Katrina Effect charts the important ethical territory that underscores thinking about disaster and the built environment globally Given the unfolding of recent events disasters are acquiring original and complex meanings This is partly because of the global expansion and technological interaction of urban societies in which the multiple and varied impacts of disasters are recognized These meanings pose significant new problems for civil society what becomes of public accountability egalitarianism and other democratic ideals in the face of catastrophe This collection of critical essays assesses the storm's global impact on overlapping urban social and political imaginaries Given the coincidence and perfect storm of environmental geo political and economic challenges facing liberal democratic societies communities will come under increasing strain to preserve and restore social fabric while affording all citizens equal opportunity in determining the forms that future cities and communities will take Today 21st century economic neo liberalism global warming or recent theories of urban vulnerability and resilience provide key new contexts for understanding the meaning and legacy of Katrina

Remaking Culture and Music Spaces

Ian Woodward, Jo Haynes, Pauwke Berkers, Aileen Dillane, Karolina Golemo, 2022-11-18 This collection analyses the remaking of culture and music spaces during the ongoing COVID 19 pandemic Its central focus is how cultural producers negotiated radically disrupted and uncertain conditions by creating designing and curating new objects and events and through making alternative combinations of practices and spaces By examining contexts and practices of remaking culture and music it goes beyond being a chronicle of how the pandemic disrupted cultural life and livelihoods The book also raises crucial questions about the forms and dynamics of post pandemic spaces of culture and music Main themes include the affective and embodied dimensions that shape the experience organisation and representation of cultural and musical activity the restructuring of industries and practices of work and cultural production the transformation of spaces of cultural expression and community and the uncertainty and resilience of future culture and music This collection will be instrumental for researchers

practitioners and students studying the spatial material and affective dimensions of cultural production in the fields of cultural sociology cultural and creative industries research festival and event studies and music studies Its interdisciplinary nature makes it beneficial reading for anyone interested in what has happened to culture and music during the global pandemic and beyond

Disasters and Politics Manuel Tironi, Israel Rodríguez-Giralt, Michael Guggenheim, 2014-04-21

Disasters Kathleen Tierney, 2019-05-20 Disasters kill maim and generate increasingly large economic losses But they do not wreak their damage equally across populations and every disaster has social dimensions at its very core This important book sheds light on the social conditions and on the global national and local processes that produce disasters Topics covered

include the social roots of disaster vulnerability exposure to natural hazards such as hurricanes and tsunamis as a form of environmental injustice and emerging threats Written by a leading expert in the field this book provides the necessary frameworks for understanding hazards and disasters exploring the contributions of very different social science fields to disaster research and showing how these ideas have evolved over time Bringing the social aspects of recent devastating disasters to the forefront Tierney discusses the challenges of conducting research in the aftermath of disasters and critiques the concept of disaster resilience which has come to be seen as a key to disaster risk reduction Peppered with case studies research examples and insights from very different disciplines this rich introduction is an invaluable resource to students and scholars interested in the social nature of disasters and their relation to broader social forces **Sociology of Disasters**

ISA Research Committee on Disasters,1987 New Perspectives on Resilience in Socio-Economic Spheres Andrea Maurer,2016-05-18 This book presents a collection of papers discussing especially social factors that support individuals organizations markets and societies confronted with socio economic crises The papers were written mainly by international sociologists dealing with social resilience from different viewpoints and offering new theoretical perspectives as well as empirical facts Why are so many researchers politicians and practitioners thinking and writing about resilience today Social scientists have started only recently to deal with social resilience in various spheres Since not long ago resilience was strongly connected with the question of what makes individuals or ecosystems to overcome threats like disruption catastrophes external shocks etc Thus a new research perspective on resilience is offered **Response to Disaster** Henry W.
