Lewis one of the editors of the current collection first moved to Norway in late 2009 he was unprepared to discover that so

many researchers in Nordic countries were producing innovative scholarship on new religions and on the new age subculture. In fact over the past dozen years or so an increasingly disproportionate percentage of new religions scholars have arisen in Nordic countries and teach at universities in Denmark, Finland, Norway, Sweden and the Baltic countries. Nordic New Religions co-edited with Inga B. T. Ilesøen surveys this rich field of study in this area of the world, focusing on the scholarship being produced by scholars in this region of northern Europe.

The World Turned Inside Out Lorenzo Veracini, 2021-09-21. A history and theory of settler colonialism and social control. Many would rather change worlds than change the world. The settlement of communities in empty lands somewhere else has often been proposed as a solution to growing contradictions. While the lands were never empty, sometimes these communities failed miserably and sometimes they prospered and grew until they became entire countries. Building on a growing body of transnational and interdisciplinary research on the political imaginaries of settler colonialism as a specific mode of domination, this book uncovers and critiques an autonomous, influential and coherent political tradition, a tradition still relevant today. It follows the ideas and the projects and the failures of those who left or planned to leave growing and chaotic cities and challenging and confusing new economic circumstances: those who wanted to protect endangered nationalities and those who intended to pre-empt forthcoming revolutions of all sorts, including civil and social wars. They displaced and moved to other islands and continents, beyond the settled regions to rural districts and to secluded suburbs, to communes and intentional communities and to cyberspace. This book outlines the global history of a resilient political idea to seek change somewhere else as an alternative to embracing or resisting transformation where one is.

Anastasia Vladimir Megre, 2008. You are about to read some of the most shocking revelations to appear in thousands of years of human history, so significant that they are changing the course of our destiny and rocking scientific and religious circles to the core.
