

# The C Standard Library

Common functions we don't need to write ourselves

- Provides a portable interface to many system calls

Analogous to class libraries in Java or C++

Function prototypes declared in standard header files

```
#include <stdio.h>          #include <stddef.h>
#include <time.h>           #include <math.h>
#include <string.h>         #include <stdarg.h>
#include <stdlib.h>
```

- Must include the appropriate “.h” in source code
  - “man 3 printf” on linuxlab shows which header file to include
- K&R Appendix B lists all functions

Code linked in automatically

- At compile time (if statically linked gcc -static)
- At run time (if dynamically linked)
  - Use “ldd” command to list dependencies
- Use “file” command to determine binary type
