The Stars Learn The Bright Stars And Important Constellations:

The Stars Tom VanDamme, David Harriman, 2012-04 The Stars is the second book of a series on Astronomy created by Falling Apple Science Stargazing has never been more fun Learn about the four constellations that will help you understand the entire night sky any time of the year Step out any evening and see your favorites at Christmastime you ll find Orion along with his entourage Discover why Orion is on the run and who he happens to be chasing In the summer watch a beautiful swan fly across the evening sky Read this book and you ll always have an old friend you can find in the sky To learn about Moon phases and planetary motion see the first book of the Astronomy series Sun Moon and Planets by the same authors

A Text-Book of Astronomy George C. Comstock, 2018-09-20 Reproduction of the original A Text Book of Astronomy by George C Comstock **Photo-guide to the Constellations** C. R. Kitchin, 2012-12-06 I hope that people all around the world never forget what a wonderful thing it is to lie on your back and look up at the stars Pete Seeger What is the fascination that constellations hold for people There are probably as many different answers to that question as there are people For many though the constellations are the stepping off point into the fabulous mind bending discoveries and concepts of modern astronomy For others it is their long and intriguing history that beckons For some people the constellations provide the means for navigation and orientation over the surface of the Earth and of course there are the millions who place some faith in horoscopes But for most people the patterns in the sky are a beautiful part of their environment to be treasured alongside the forests fields and rivers that make life worth living However just as we are losing our green environment to pollution so we are losing our sky The glow from cities across the world swamps the stars in the night sky Astronomers have had to retreat to remote mountain tops to escape that light pollution The rest of us must make do with what is available From the centre of a city or any other brightly lit area probably no stars at all will be visible even on the clearest of nights From the suburbs the brighter stars should normally be seen **Exploring Great Basin National Park**
