The Structure Of Arguments Human Cognitive Processing:

The Structure of Arguments I. M. Schlesinger, Tamar Keren-Portnoy, Tamar Parush, 2001-01-01 An important tool for scientific study in any field is a formal language in which the phenomena can be described and hypotheses formulated In this book a formal notation is developed for the description of the cognitive structure of arguments The analyses based on this notation are more fine grained than the analyses in previous attempts and they are applicable not only to arguments but to all types of moves in a discourse Further the notational system provides a basis for the description of relations between arguments and the structure of the discourse as a whole In the final chapter some empirical studies of retention of arguments in memory and of precise writing are reported based on hypotheses formulated in terms of the notational system

Legal Knowledge and Information Systems Arno R. Lodder, Laurens Mommers, 2007 This book includes papers from the twentieth JURIX conference first organized in 1988 Over the years JURIX has become more and more international JURIX is originally a Dutch Belgian initiative Nowadays the conference papers are in majority from non Dutch authors and since 2002 JURIX is held outside the Netherlands and Belgium every other year Most accepted papers can largely be fitted into either work on argumentation or work on ontology Argumentation has been a JURIX topic during all past years and the interest in ontology has revived recently with Semantic Web initiatives The topic *Handbook of Intelligence* Robert J.

Sternberg, 2000-03-13 Not since the landmark publication of *Handbook of Human Intelligence* in 1982 has the field of intelligence been more alive than it is today Spurred by the new developments in this rapidly expanding field Dr Sternberg has brought together a stellar list of contributors to provide a comprehensive broad and deeply thematic review of intelligence that will be accessible to both scholar and student The field of intelligence is lively on many fronts and this volume provides full coverage on topics such as behavior genetic models evolutionary models cognitive models emotional intelligence practical intelligence and group difference *Handbook of Intelligence* is largely expanded covering areas such as animal and artificial intelligence as well as human intelligence It fully reflects important theoretical progress made since the early 1980s

Human Aggression Russell G. Geen, Edward D. Donnerstein, 1998-08-20 For centuries scholars have debated the causes of aggression and the means to reduce its occurrence *Human Aggression* brings together internationally recognized experts discussing the most current psychological research on the causes and prevention of aggression Scholars policy makers practitioners and those generally concerned with the growing issue of aggression find this a much needed reference work Topics include how aggression is related to the usage of drugs how temperature affects aggression the effect of the mass media on aggression violence by men against women and the treatment of anger aggression in clinical settings The book also provides a comprehensive review of theory and methodology in the study of aggression Presents the latest research findings from internationally recognized researchers Familiarizes the reader with implications of aggression research Examines the causes and prevention of aggression Offers perspectives for both the researcher and policy maker
